

A Psychoanalytical Memory-Subconscious Exploration by Dolores Cannon for a Universal Timeshift 2012 - 2015 - 2020 - 2025 - 2030

From Dolores Cannon: The Three Waves of Volunteers and the New Earth

2011 - 1 year before the 2012 'consciousness-precessional' shift and 10 years prior to the 2021 nexus for the global awakening awareness revolution.

{Dolores Cannon - April 15th, 1931 - October 18th, 2014, 5 years before Event 201 and the trigger of agenda 2030.

2030-2025=5=2019-2014 - Canon/Library of New Alexandria with Librarian Daath Canon}

CHAPTER TWENTY-TWO AN ENTIRE UNIVERSE SHIFTS - A 'soul' describes the transformation of the consciousness and energy of planet Earth from 2012 to 2020 to 2025 onwards

(C=Celeste a woman incarnated in human form on Earth and D=Dolores a psychoanalyst and explorer of the subconscious state of self-awareness)

C: Yes, it is a stupid thing to come here. (Laugh) Because when you are there you think Wow, but when you come here it is so tough. And sometimes I feel alone and sometimes I feel I cannot do this. But sometimes I know I will do it.

.....

D: So, in the other existence you didn't have these emotions?

C: No, no, you don't have emotions. It is not this kind of emotions. Everything is so clean and quiet, and you know everything. And the worst part is this drama thing. These feelings, people cry and this mess for misunderstanding and you cannot communicate with people with your mind. You can try, but they do not listen.

D: And the fear is different too, isn't it?

C: Yes, the fear is the worst part. I don't like this fear. This fear makes some things in your body. Your body is so sensitive to this fear and suddenly when you start having this fear, It is a mess, and you cannot get out of this fear. And then you try to remember who you are, but sometimes It is not so easy to remember. And sometimes you think your mind is thinking all these things and...Wow...what are you talking about. The only thing that exists is routine and this life and these other things. That is the only way to do this is in this body. If you do not have that you will not stay here. You will go "home" because home is where you belong.

D:With those memories you couldn't exist here. (Yes) Is that why you have to forget when you come in?

C: Yes. That is why you have to forget. Otherwise, you cannot stay attached to this body. When you have feelings for one thing, you are attached to this body. Yes, when you try to go back home again, then you get this fear and then you forget everything and then you are here again. But you know you are not complete here. You are not complete incarnate here.

.....

D: Have you ever been in a physical body before?

C: I have to say It is not, but I don't know if It is my mind or....

D: But your part of the galaxy and you created the galaxy, do you think this is the first time you have ever moved into something like this?

C: No, I guess this is not my first time. I guess I am coming when these kinds of changes are taking place. I have to figure this out. I feel like I am a mother of the galaxy. (Laugh)

So, I have to be here to take care of my little kids. (Laugh) And then I choose to be in this little planet. It is a little planet, but it has a lot of energy. Wow, I have to think of everything. Sometimes we can and sometimes we cannot. It is not our fault because we are what we are. Sometimes some things happen that we cannot control and the only thing we can do is just to take her off of this little kid which is our galaxy.

D: But when you come you forget all these things, and all you know is just this life.

C: There's no way to be here if you know who you are. There is no way to use this power you have because sometimes you need or you want to use this power, but you realize you can't because this body is not enough. But this big energy you're sending is not your whole energy. It is only some part of your energy just to stay here.

D: But isn't it possible for the physical body to use some of the energy?

C: Yes, the physical part of the body is using some part of the energy, but not the whole energy. Because if the body is using the whole energy...it will explode. It is not a container for this big energy that you are. It is too much energy for this little, teeny body. Because the galaxy is smaller than the energy you are. This planet Earth is smaller than the energy you are. This body is smaller than the energy you are. So, you are moving from the small things to the big things, and you are moving to the big things or from the big things to the smaller things. Everything is moving...like in cycles.

D: But is it possible for this body you are speaking through to use a portion of the energy?

C: Yes, she needs to use this body. It is using this energy, but the body doesn't know how to use it.

D: She said she feels energy going through her body, but she doesn't know what to do with it.

C: Yes, she doesn't know what to do. The body doesn't know. She knows what to do, but when she tries to use this, this other fear starts and then she realizes, "Okay, what am I doing? I am this body. I am like this ego thing." She is afraid to use this big power she has. She is trying to do it to help people, but it is not working because she's afraid. Everything starts to work, then she's afraid of being discovered. She's afraid of being discovered about who she is. She is doing this work undercover. (Laugh) So nobody knows that we are working undercover.

D: Are you afraid of something happening if somebody knew how powerful you really are?

C: Yes. It doesn't work if anyone discovered we are controlling things.

D: They think they might?

C: Let me clarify this. We...us...the Universe, the Unity, are working, too. We are here undercover. We are controlling things so if anybody found out we are controlling things, even though we are trying to help...they are not going to do things by themselves and they are going to ask for help.

You know people here are so...you know they need help. Always they need help, and they are allowing another one to do things by themselves so we cannot allow that. They have free will, so they have to do things by themselves and that is one of the reasons they took energy from this body like this woman. It is easy to take energy from her.

D: You mean other people?

C: Yes. And they are always taking energy from her and that is not the way to do it because she didn't come to do that.

I had spoken to Celeste during the interview about how to put up shields around her to keep people from drawing on her energy.

C: She doesn't know how to do it. She was trying to use this shield like white light, but then this other part of her is saying, "What are you doing? This is stupid to do." She separates. One part of her knows who she is and what she is doing here, and the other part is trying to say, "Get real. You are a human being living in this planet Earth and don't be silly to think you are bigger than that." It is like a fight. She's having this fight inside.

D: Does she have any karma to repay?

C: No, she does not. She has been here when this galaxy has been having this big movement, but she came only to help, and she doesn't have karma. She tried to help people who have karma, and sometimes it feels like she feels karma, but she doesn't because she can't. She's one of the healers of this galaxy, so she's trying to help and sometimes she needs to feel how it feels to be human in this part of the galaxy because that is how the galaxy feels. Like if you are being in the body and it has the pain, and you must feel that pain just to feel what the body feels. Do you know what I mean? Your body must feel this drama. This is the only way to help people by understanding the way they feel. Then you can understand. Then you can help, but you know sometimes people don't want to be helped. They are happy with this drama because they don't want to be more than that or they will remember where they belong. You cannot help if they do not want help.

D: But she doesn't know that she's bigger. She feels she's like the rest of the people on Earth.

C: Yes, she is, and that's the problem with being with this energy she is – me – and she's fighting with this energy or with this body. It is her body. Sometimes she feels she's this body and she's bigger than that, but sometimes she cannot remember and she's in the middle of this little drama. I have not found a way to tell her to "remember who you are!"

D: I think you're finding a way right now to tell her.

C: Yes, I guess we are having this conversation.

D: But most of the people when they come to Earth many, many times or on this cycle, they pick their parents. They pick where they're going to be born, but she was not part of that cycle?

C: No, she was not. She was here to help this guy and this woman (her parents) because they are so full of power. They do not realize they are. So, when she came here, she gave this couple a little energy to do what they needed to do, and they do not understand. And these two gave her a lot of experiences to feel what it is to be human, just to understand what it is to feel pain and have human experiences. It was important to me to have these experiences because now I can help them when I just found the way they feel, so empty. I can feel this emptiness. I never understood this emptiness until I came here just to have these human experiences, and then that was the contract that was with those people...I mean this couple. When I give you this energy, then you can move on or you can just not move on and you will give me this experience. Then I will understand how people feel. And now when I see the people, I know how they feel. I can feel how they feel! I can feel their vibration. I can feel how they feel and if I sense energy, I can remove their pain.

.....

Excerpt from Dolores Cannon's last book: The Convoluted Universe - Book Five, completed following her transition on October 18th, 2014, published in 2015

This video describes Agenda 2025 from the perspective of a reconfigured human genomatrix of an old world planetary civilization.

It can so be considered as a legacy from the stars and the creation of the universe with its constituent galactic structures and star centered planetary systems. Agenda 2025 represents a higher- and inter dimensional energy signature flowing in parallel to a planetary restricted Agenda 2010-2020-2030 described in the universal logos context in this video.

The video begins with a political-religious introduction (by Tom Horn), regarding the 'hidden aspects' and workings of the cultural background matrix for the history of planet Earth by the use of symbols, psychology and science. This programming control is known as a 'secret cabal' or technocratic global web of elitist control or 'hidden hand'.

The video is continued in a description of the starhuman genomatrix in the context of universal physicalized consciousness as a form of quantum consciousness responsible for the creation of the universe.

The video then completes in a detailed history of the testimony from the stars as a legacy for the human ancestors in bodyform, being the inheritors and descendants of the starhuman mind.

The Uniqueness of planet Earth as the only place in the protiversal Universe, where the Universal Motherhood is separated from the Universal Fatherhood

eccentricity as amount of flattening of a circle
 $e=0$ for a circle centre $(0,0)$
 $e=1$ for a line $|-a|+|+a| = 2a$

The communication between Abba♂ and Baab♀ within all inhabitants of the omniverse proceeds via the holographic universe mapping of the information onto the inner surface of the boundary of the universe/multiverse/omniverse. For a 0 eccentricity, the communication converges at the centre of the circle as the merger of the two foci as the constant $2a=2b$ as the radius of the circle of creation.

From Dolores Cannon: The Three Waves of Volunteers and the New Earth

2011 - 1 year before the 2012 'consciousness-precessional' shift and 10 years prior to the 2021 nexus for the global awakening awareness revolution. {Dolores Cannon - April 15th, 1931 - October 18th, 2014, 5 years before Event 201 and the trigger of agenda 2030.

2030-2025=5=2019-2014 - Canon/Library of New Alexandria}

AT THE BEGINNING OF 2011 while this book was being put together some unusual events happened that made it clear that the shift was becoming closer. It showed that the changes in the frequencies and vibrations are not only affecting humans, but also animals of all kinds. No one is immune from the changes that are occurring around us and becoming more evident.

Portions of two sessions during January 2011:

L: You know the realities are shifting now. What you have called the new earth, is the new earth, is becoming manifest. The energy is there. The heavier energies that create harm, disharmony, and imbalance are not moving to the new earth. They won't be part of it. Their energy does not resonate. Those that resonate with that old energy will stay in that old energy. And they can pull themselves free of it at any moment that they choose to be free of it, but they have to be willing.

D: I vowed when I got you again that I have a question I want to ask. Something has been going on here in the world in Arkansas. They are talking about all the birds just dropping out of the sky. This made the news when it happened on New Year's Eve, 2010. It was mostly red winged blackbirds, and thousands of them were discovered. The same night there was also a big fish kill in the Arkansas River. Then it was reported in Sweden, and a few days later in Kentucky and Tennessee.

When the birds were examined there was no obvious cause, except blunt trauma. Of course, there was blunt trauma, the birds fell out of the sky and hit the ground! The official explanation was that there were fireworks on that night and this must have frightened the birds.

If this was true, then why aren't bird kills reported on the 4th of July? The only unusual weather phenomenon was a terrible electrical storm that produced unusual winter tornadoes in the Arkansas area.

L: The symbology is that it's a shift in energy because the birds, the cows, the fish, the whales, the turtles, the bees, are all representations of the change in energy and they were stuck. They didn't shift fast enough.

D: We are all shifting, our vibrations and frequencies. They are smaller, and they couldn't shift fast enough?

L: Animals are on a different energy level than humans and are much more sensitive to the shifts. And some of this was manmade, man interfered with.

D: What do you mean?

L: There is a shifting of energy of the planet as the new earth is taking form. There is some movement between old and new energies. There is separation going on, but there is energy feeding both. Sometimes the birds, the animals, bees, even the plants, and humans. If they are tuned a certain way they will respond some way to that shifting energy, and their physical body is not able to withstand. Their indwelling spirit has to move with the energy.

D: That's what I've been told, if the energy was shifted all at once, it would destroy the human body.

L: It would, and so the human body is being changed.

D: A gradual adapting of the frequencies and vibrations.

L: Which is why there is sickness because sickness is another form of the body adapting.

D: I have been told that the ones who cannot adapt or change their vibrations and frequencies to adapt, they will just leave the planet.

L: They cannot keep their soul and their physical body together. The Mobius Strip becomes unravelled. It falls apart.

I had never heard the term "Mobius Strip," so I had to do research. I then found it is a mathematics term, also called the twisted cylinder.

Math has always been my worst subject, so I had to try to break this down so I could roughly understand it, so I could convey it to the reader. A sphere has two sides. A thin sheet of paper lying on a desk also has two sides. A Mobius Strip has a one-sided surface: only one side and only one edge. A simple way to make one is to start with a strip of paper. Twist one end 180 degrees (half turn) and glue the ends together.

For comparison, if you glue the ends without twisting the result would look like a cylinder or a ring. The Mobius Strip is known for its unusual properties. A bug crawling along the center of the loop will continue going in the same direction. I'm sure there is much more to this and there are probably readers who could explain it much better. So forgive me for my limited understanding. We all have our limitations.

The SC is saying here: "They cannot keep their soul and their physical body together. The Mobius Strip becomes unravelled. It falls apart." I think it is comparing the soul energizing force to a continuous Mobius Strip. When the Strip falls apart, it becomes a simple strip of paper again with no unusual properties. Maybe the same thing is occurring with the birds and the animals. They are receiving too much energy, a burst that is more than their bodies can handle, and this causes their matrix to unravel or come apart. "They" have said many times that if the body receives more energy than it can handle it would destroy the body.

D: So these birds are doing the same thing?

L: It's the same thing.

D: It was happening here in Arkansas, but also all the way over in Sweden.

L: It's happened all over the world, even in East Texas, birds falling.

D: They just didn't put it on the news.

L: No, there's talk in the community. There was some discussion among various people. It's reported, but it is not reported.

D: It was interesting that it happened on New Year's Eve.

L: There are those who use this as a means to manipulate to a negative apocalyptic vision. But it's not—well, it depends—are you mostly negative or are you mostly positive? If you're mostly positive then it's an indication of the shifting energies between the old and the new. And what is frightening the scientists and sandbox players is that they know they have no control over that. They cannot camouflage it. They can suppress it, deny it, but they cannot change it. They cannot stop it and it tells them that this shifting is increasing. The animals still have their soul. All living things have souls.

D: You cannot kill the souls.

L: No. The soul is fine, but the physical body, whether it is bird or whale, gets left behind in the shift and it's not into the new. The old energy was where it belonged. It couldn't transmute to the new energy, so it was left with the old. Shifting energy. The new earth already exists, but it is becoming more in form, stronger, more created, moment to moment.

D: And to our reality.

L: Yes, into your time and space.

D: So the Old Earth will still exist as the New Earth is formed. We thought at first it was like a splitting.

L: No, it's like a Phoenix from the ashes. (Laugh) Only that's too frightening for some people because they think the Phoenix arises from ashes means, of course, the planet has to be ash.

D: And it has to be a catastrophe. All of the negativity, the different cataclysms will be with the Old Earth. (Right.) We're all moving to the other one.

L: Right. We're all having growing pains.

D: They said we won't even be able to tell the difference. It won't just be all of a sudden... POW, we're there.

L: No. You will know by how you feel. If life feels softer, gentler, sweeter, happier. If it feels more joyful, you will know.

D: We're moving into the New Earth?

L: Yes, it's been going on for many years. We're here... have been. The last thing you want to do is unhinge the psychic mind... you want the mind to travel with the body. If you unHINGE it, then everything falls apart. So this shift allows everyone to adapt gently, as a gentle adaptation.

D: I have been told that the other ones will stay with what they've created, and it's all right.

L: Yes. It's all right because it's all learning. How do you know what you appreciate? How do you know what joy feels like if you have never known pain? It's a concept until you feel it, but no, you don't have to keep feeling it over and over. Enough is enough.

D: What about the New Earth?

J: I see layers. It's layers and layers and layers and layers and layers, like onion layers. And you can see through them, and you can pick any layer you want. And the further out, the lighter it is. The further in, the closer to the core, that is the dense.

That's the very dense and that's the one that will appear very similar. That's where a lot of the emotions are, and I see it's looking red, like it's red hot. And then as it goes out, it gets lighter and lighter and lighter and they're more translucent. It's just lighter and you can move so easily. It's just like floating.

D: Are there really two Earths... the Old Earth and the New Earth? They keep saying they are going to separate.

J: It separates in the sense that this one is so light. It moves away and everything that's on it is just so light. And it's floating and easy, and it's a whole different concept and thought structure. There are emotions, but it's a different range of emotions. I mean, it's not anger. There are not those heavy, dense emotions. There's the light. It's a separation in that way. You have a separation of emotions and when you separate those emotions, it separates who you are. It separates how you feel and that makes you a lighter person, which takes you to this lighter place. It's separation that way and the two are not together anymore. But it's like all these different layers.

There are layers in-between too, so you have extremes. You have the very outer one, which is probably the epitome of this light, light, light, light Earth and then you have the center, which is probably the epitome of the old Earth. You just have this very red hot—it keeps looking red hot—it's anger and heavy emotions, heavy thoughts, heavy feelings and things like that, where this other is light. But you have all these layers in-between that you can choose. You move in with them... in among them and then at some point you just keep choosing. "Ah, there's a choosing... choices." You make choices and that moves you through these layers. And as you keep choosing one way or another, that's what keeps pulling them apart.

D: Is that where the separation is coming in?

J: That's the separation. You keep choosing and when you choose light, you go that way. You keep moving in that direction. You choose heavy thoughts, you choose heavy emotions, you choose those things and you will move in that direction. Though there's quite a while that you keep moving back and forth among layers. It's to show you that you do have choices here. This isn't a "do or die," or make a "right or wrong," or a "now or never" kind of thing. You are moving among these things to see that it's within you to make the choice. It's within you to have this happen. It's within you to make your New Earth or your Old Earth. It's to make your reality any way you want it.

D: They keep saying this is the first time this has happened in the history of the Universe, that an entire planet is going to move into a different dimension.

J: It's very beautiful. This is different. Civilizations have done it before. People, single people, have done it before.

D: They say the first time for the planet.

J: This is because the planet is participating. She is a being also. She wants to do this and so she's created all these layers so these are layers that She is working through as well, so these are choices She is making. She's doing the very same thing that we, with her, are doing. We're all doing this and that's why there are all these different layers of Earth because She is doing this as well. It's not just this one BOOF! It's a movement and there are these layers and as the people move around with their emotions, then that moves through the different layers of these different levels.

And so as we keep choosing light, joy, ease, smooth... then that moves us, too. It keeps moving us ever closer. As you choose, you start thinking, "You know, I like the feeling of this better than that." And so then you start making choices that move you more in that direction. You have to keep testing it. You may take two steps this way and then you take a step back and then think, "Oh, I don't like the feeling of this. Let's go this way."

That's your layers. That's why it's gradual. And you start realizing how much control you have within the whole thing, and that's what this is about, to show you that you have control. It's all your control. It's all your creation. It's all your reality. It's all what you are creating, whatever you want to create, and so you move within there, and each person is having this experience. The more aware you are with it, the more fun you can have with it because you can move with consciousness and be aware of what you're doing.

D: We've had a mystery lately with the birds. They said they were falling out of the sky. And I was told at another session that it was happening all over the world, not just here in Arkansas. Do you have anything to say about that?

J: What I'm seeing when you said that is that there's a movement of the Earth. It's like it did a... (hand motions) It's almost like a jerk, but it's nothing that we felt on Earth. But it was like a jerk and when it did that, it's in these outer layers. It was a shift there. It shifted and when it did that, it created this kind of—how do you describe that?

D: A shockwave of some kind?

J: Something like that. It's almost like a jolt in the atmosphere. It's almost like an earthquake in the air.

D: Reverberation?

J: It's more of a vibration. A rift! It moved here, but it didn't move in another place, and so that created something like an earthquake. So anything in that layer or in that part, anything that was sensitive... yes, they are very sensitive. It's like the canaries in the mines. That's your warning. That's your signal that something's happening because animals are very sensitive. They're in touch all the time.

D: We were told that it was the energy, and because they're smaller they can't handle the shifts of energy. But then I had a question. Yes, it affected the birds, but it didn't kill all of the birds, just certain ones in certain places.

J: Maybe it was just that certain birds are more sensitive... that particular kind was more sensitive at that time.

D: To certain kinds of vibrations? (Yes) But it didn't kill all of the birds of that type.

J: No. I think it had to do with where they were. So it's like an earthquake. It's going to do something right there. And that's where that was, that layer, that level, where it was happening was affecting certain places. It didn't happen completely around the globe. It happened in a section so that section was connected to certain areas and those areas were affected.

CHAPTER THIRTY-SIX

THE NEW BODIES

HERE IS SOME OF THE INFORMATION about the New Earth that came from various clients, taken from the Convolutioned Universe series:

The entity speaking through V. had a deep, gravelly voice:

V: The whole idea is, we have to get people to expand just a little bit. And we have to get this level raised just a little bit. And when we do, we can make that change, and make it easier for them. It will be the ones that we can't get to change that are going to be left behind. It's going to be horrible. We can't get them to see. We can't get them to love.

D: Then the others, the ones that will change, will go into another world? Another Earth?

V: It's like it's going to expand into another dimension. Let me see how I can explain this to you. It's like a raising, if you can understand, like we're going to raise into a different vibration. They'll be able to see what's going on, but we can't help them anymore.

D: Is it like a separation? Like two Earths, is that what you mean?

V: Oh no, no. It's a changing of dimension. We're going to go from here to here. And those that can't change will be left behind.

D: When we go into the other dimension, will it be a physical Earth?

V: It will be just like we are right now.

D: That's what I meant by two Earths.

V: Yes, yes. But they're not going to be aware of us. God help them, God help them. It's going to be so terrible for them.

D: They won't know what has happened?

V: No, they will know. That's the whole idea. They will know, but it will be too late for them to change their vibrations. They can't change it in a second. They have to change it over a period of time. We've been working on this for a while. It has to seep in and work on your body, and it has to slowly change and raise your vibrations. And when it happens, it's going to be too late for them, but they will see it, though. They will die, but they will see it and they will learn from that.

D: That world will still exist, but it will be different?

V: Not very well, no, not very well. There won't be much left in that world. Not much.

D: Many people will die at that time?

V: Yes. But I think much of their death will be painless. I think they will live just long enough to see what's happening. And I think God will spare them the horrible traumatic pain. I pray that's what will happen.

D: But the others that do shift into the new vibration, with an identical physical world....

V: (Interrupted.) Yes, but some won't even be aware that they've made the change. Some will. Those that have been working towards it will know.

D: Will they know about the people being left behind?

V: I don't think so. There will be an awareness of a change that took place. I'm not sure if it's going to be a conscious awareness. Let me think about that. (Pause) We'll go into this dimension and we'll know. Some won't know though. They'll feel something. They'll feel a difference. Almost like a cleanness, a clearness. A crispness, a difference. I know what it is. They'll feel the difference. They'll feel the love.

D: So, even if they haven't been working toward it, they will be carried along with it.

V: Yes, because they're ready for it.

D: And the other ones won't be....

V: They're not, they're not.

D: So, they're left in the negativity? You said the whole world is going to be changed at that time.

V: Yes, those that can go on, that can move into this, will move. And those that can't, won't. And it'll be horrible for them.

D: And it will be like two worlds.

V: Yes, two worlds existing at the same time, but not always aware of each other.

D: I know when you're in a different dimension, you're not always aware of the other one. But that's the message you want to get across is that we should spread this information about love while we still can, to bring as many as possible along.

V: Love is the key. Because God is love. And love is God. And love is the supreme power. And that's what we need to feel in our lives. What we need to give to each other and feel for each other.

D: Yes, love has always been the key. So, they're trying to tell as many people as possible, so they can bring them along. That's what the urgency is.

V: The urgency is that we've run out of time. Just be prepared. Uh, what? Tell her what? She was listening to someone else. There were mumbling sounds, then the deep gravelly voice returned.

V: Tell you... ready. Ready for the change coming soon. Soon now. Ready... She's not a good vehicle. She's not done this before. I can't get my ideas through her to convey to you. I must work on it. Let's cleanse this vehicle. Oh, yes! Uh... there. That's better.

D: What is it you want to tell me?

V: Must help all mankind. Tell them what is to come soon. Changes, dimensional shift. Those that can hear you will hear you. They'll be ready for that dimensional shift. (Her normal voice returned.) Those that can't, will not accept it anyway, so (Laugh) they'll think we're crazy. But the others, they may not know it, but it will touch a spark in them. When it happens, they'll be ready and they can make that shift. They may not know it's coming, but something inside will be ready for it and they'll be able to make it. It's those that don't know it's coming, but if we tell them, it's inside them. Then when it happens, it'll come out and they'll be ready for it.

D: Those of us that do make the shift, will we continue to live our lives the way we have?

V: No, no, better. Different. Longer.

D: Will we continue physical lives?

V: Oh, physical in that dimension, yes. But physical in this dimension, no.

D: But I mean, if we make the shift, will we....

V: (Interrupted) You mean, will you live or die?

D: Will we continue lives as we know it?

V: Yes, some will not even be aware. You see, that little thing that we plant in their head, will help them make the dimensional shift and they may not even know it. But they'll know there's destruction. They'll see destruction. They'll see what's taking place and they'll see the dead bodies, but they won't know that they've made that shift. They won't be aware of the fact that the reason they're not down there dead is because they made that shift and that change didn't affect them.

D: You said something about the things that are put in the head.
Do you mean the implants?

V: No, no, no. I mean a seed, a thought. They don't know it consciously, but inside, that will help them. It's like a spark that, when the time comes, their mind would have accepted it subconsciously, already.

D: I have heard that we will live longer?

V: Longer, better. Learn. Things will be so much better. People will learn more, after a little while. They'll know more. They'll become more aware of things. The way things are. They may not know when they make the shift, but then they'll learn about it. They'll realize after a while what's happened.

D: And the ones that are not ready will be left on the other Earth.

V: Yes, they'll be gone.

D: And many on both places won't even realize that something dramatic has occurred.

V: The ones on the other place will. They'll be dead. But they'll know because that's the lesson they've learned. Once they die, they will know. They will see the truth. And they will see what opportunity they missed, but they will learn from that.

D: I have also been told that when they reincarnate, if they have negativity, karma, to repay, they will no longer come to Earth because the Earth will have changed so much.

V: They will not be allowed to come back here until they've made the switch. They've made the change.

D: I've heard they will go somewhere else to work out their karma because they have missed the opportunity.

V: Yes. Some will. And some may be given an opportunity to come back. But it will be awhile, a long, long while.

D: But in the meantime, we will be going forward and learning new things and making progress in a whole new world.

V: What a beautiful world. A world of light and peace. Where people can live together and love one another.

D: But it will still be a physical world with our families and houses like we have now.

V: Just a smarter world.

D: (Laugh) That, I can understand.

Another subject who was experiencing unexplained physical symptoms, described the new body in this way:

S: She is identifying more with her future body. It's not really settled in yet, but it's there. And this future body takes her essence, or portions of her. And merges it or pulls it up so she will get used to this future body.

D: Will the body physically change?

S: Some, yes. It will be stronger, and younger. This body that she is in now, it could be healed and redone, but she needs the future body. It will be lighter. More capable. She is feeling this now, her essence has been merging with this future body and pulled up.

D: So this body she has now will be changed?

S: It will be essentially left behind. It's going to be transformed and parts of it that aren't needed will be dropped away.

D: So it's not like leaving one body and going into another.

S: No. Gradually the newer body and the older body will be mostly merged together. But there will be certain parts of the older body that won't be necessary, so they will be left behind. It will just disintegrate.

It will probably be so gradual that we will not even notice the difference. Except for the physical symptoms that some are experiencing as the body makes the adjustments. I have been told that the older generation may be more aware that something is happening in the body. Yet it does no good to worry about it, since it is a natural process that is occurring now to everyone as part of the evolution of the new Earth.

More from another subject in Australia:

C: It's like a car. Imagine a car that has an old body. It's just the same old car you've been driving. And then you put a new engine in it. And suddenly that car begins to perform differently, even though it looks the same. And then you get another engine, and you replace it.

And the car keeps getting faster and faster, and brighter and smarter. And then before you know it, the car is doing such good things, that the body starts to change. It's like the energy of the new engine starts to reform the body. And before you know it, the chap has turned into a sport's car. A beautiful, glossy, attractive vehicle. And that's what this is about. The energies that are coming in have the ability to transform the vehicle. And it will start to be different. It's going to look different. It's going to look... well, younger comes to mind. It's going to look smarter and younger. The cells of the body, the vibration of the body is changing, and is matching the vibration of the incoming energy. And the physical changes will be next.

D: What will those physical changes be?

C: Oh! The body's going to change to be lighter. And I'm getting that it will look taller. It's not that it's going to be taller. But the energy from within is somehow going to become visible on the outside. And it will make the body seem taller, elongated, slimmer. And more transparent.

D: Transparent?

C: Yes. It's a pioneering thing.

D: Is this the way the people on Earth will be evolving? (Yes) Will everyone make the changes?

C: Yes, because the people have all been given that choice. If they want to evolve with the Earth, they will evolve into this new human being. It will look different. And that's what this experiment is about. That's why Christine and others are moving the ones who don't want to evolve with the Earth. They are going to leave. (Almost crying) And bring a lot of pain to their families. But the people who are staying must hold the light. That's a big job. To get divorced and separated from these things that are happening now. And these things are going to continue to happen until the cleansing is complete. Those who are here to stay, are taking this race of people into a very new and different civilization. Those people are being tested now, to see if they can hold the light when there is disaster, and not be sucked in. They're the people who will move ahead with this planet.

D: Almost like a last test?

C: Yes. The testing is going on right now. Whatever each being needs to test them, to see what they're capable of giving back to this program; how firm their commitment is. How willing they are to serve. That is all being tested now.

D: So each one is having their own individual test?

C: Yes. And the people who are finding it tough now are the ones who are staying. They're the ones who are going through the tests. But some of them are not coming through.

D: They're not passing the test.

C: No. There are some who are not.

D: This is what I was told by other people, that some would be left behind. (Yes) And I thought that sounded cruel.

C: No, it's not cruel because each soul is given the choice. And if they are not moving and evolving, it's because they are choosing not to. And they will reincarnate into another place of their choice. And it's all right. Because it's only a game. They'll stay in the Old Earth. The New Earth is so beautiful. You will see colors and animals and flowers you never imagined possible.

You'll see fruit that is perfect food. It doesn't have to be cooked. It's just eaten as it is. And everything that the being needs to nourish them will be there. These new fruits are developing now with the help of the Star People.

D: Are these fruits and vegetables we don't have on the Earth now?

C: We don't have them. They're mutations in some ways. I'm seeing a custard apple as an example of what happened. We will have a fruit called a "custard apple." And it doesn't look like an apple. It has a rough exterior, and it's about the size of two oranges put together. And then you open it. It's like custard inside. So that's a fruit, but a food. It's not just a fruit, but another food has been introduced to it, like custard. That's an example of one of the future foods. So these foods will be delights to the senses. And nutritious and sustaining for the—I keep being stopped when I start to say "body." And I am being told to say "being." They'll be nutritious for the being. And things we now have to cook—like you'd cook custard—will be incorporated into these fruits. And it has to do with helping the planet, and cutting down on the use of electricity and energy. So the fruits are going to provide us with what we need.

D: I've heard man has done many things to the food that is not healthy for the body.

C: That's right. The organic foods are coming onto the Earth, and those organic farmers are moving with the Earth evolution program. That's why they're there. And that's why consciousness is being raised about this because people need to know how to grow properly. And the Rudolph Steiner schools are teaching children this. So, the children who are going to be with the new Earth will know this. And those children are now teaching in universities and in institutions, and they're spreading the word. So when the cleansing of the Earth occurs, much of that toxicity is going to be pushed away. You see, the new Earth is not this dimension. The new Earth is another dimension. And we will move into that new dimension. And in that new dimension, there'll be these trees that have purple and orange in their trunks. And there will be beautiful rivers and waterfalls. And the energy will be brought back. There will be energy in the streams and the water that goes over rocks and sandbanks. And it hits the Earth. It creates energy and will be straightened out in this world. Many of these streams have been changed and straightened out to make them navigable and nice. That's taking away the energy from the Earth. The Earth is going to be cleansed. I'm seeing water.

D: Does this have to occur before the Earth shifts and evolves into the new dimension?

C: I'm seeing us stepping through. (Startled) Oh! What I'm seeing is that the people who are going to the new dimensions will step through into this new world.

D: While the other one is being cleansed?

C: Yes, yes.

D: What do you see about the water that will happen with the cleansing?

C: (A big sigh) It's not going to be shown to me.

D: They don't want you to see it?

C: No, they won't show me that. What they're showing me is... an opening? And we step through. We step into, what looks like this Earth, but it's different colors. It's different textures. At first it looks the same. At first only. And then as we look around, we start to see that it's not. It's changing before our eyes. And it's so beautiful.

D: But this is not the spirit side? Because the spirit side is described as being very beautiful also.

C: No, it's the new Earth. It's not the spirit side. It's the fifth dimensional Earth. Some people will pass through before others. I'm being told to tell you now that Christine has been there several times. There's a group going to go through now. And she'll be bringing more through. And they'll be coming and going a bit until they go for good.

D: Then the others will be left on the old Earth?

C: Yes, the ones that are choosing to stay will stay.

D: They'll be undergoing a lot of hardships, won't they?

C: Yes, the whole planet. (Startled) I just saw the whole planet explode. That's horrible, isn't it?

D: What do you think that means?

C: I don't know. I just saw it explode. But I saw the new Earth. There's this beautiful fifth dimensional place with harmony and peace.

D: When they showed you the planet exploding, is that just symbolic? As though that Earth will no longer exist for the ones who cross over?

C: Well, the people who have crossed over are watching what's happening. They can see. Now, is it going to explode? They're saying to me, "Don't get caught up with what's going to happen because you've got to focus on the light." And that's the challenge for these people who are going to be in the new Earth.

The challenge for them is to not get caught up in anything that's going to happen because that's what pulls us back into the third dimension. And that's what's happened to many people who were on a path forward. They've been pulled back because they got caught up in the fear and the sadness and regret and the black stuff. So they're saying, "You don't need to know because it wouldn't serve anybody if it were known." So really what they are saying is, "Focus on the good stuff." Focus on the fact that there is going to be this beautiful new existence, new dimension, that many people on the Earth are going to be moving into. Who are already moving into.

D: I was told whenever you cross over, you will be in the same physical body that you have now. You will just be changed.

C: Yes, you will still be in the same body, but it is going to change.

D: So it can be done without dying or leaving the body. It's a different thing altogether.

C: Yes, we just walk across. Christine's done it before, and she knows how to do it. She's done it and understands it.

D: But it will be sad because there will be so many people that won't understand what's happening. It's so hard with so many—I want to say "ordinary"—people who have no idea of anything except the religion they've been taught. They don't know that this other is possible.

C: Yes, but they're not ordinary. They only seem ordinary. It's a mask they're wearing. They're changing.

D: But there still are many people who haven't even thought about these things.

C: Yes, but they'll be choosing not to awaken, and that is their choice. We have to respect that. They have been given the choice like everybody on the Earth, and they have made that choice. And that's okay. It's all right. It's fine.

D: So, if they have to go to another place to work out the negative karma, that's part of their evolvment. (Yes.) But do you see a majority of people evolving to the next dimension?

C: No. Not the majority. And the numbers, to some extent, are not important because what will be, will be. And the more people that can awaken and take that journey, the more people there'll be. That's why so many of you are doing this work. To help people open up to the journey, and let go of the fear. And step into that void where anything is possible. Where the blackness is residing. That's what you people are all doing. And you need to do it. And everybody you speak to, then goes out and does it as well. You may not be aware of it, but you're acting like Christ. Everyone you speak to becomes a disciple, and they go out, and they in turn awaken other people. So it's working. And it's soon. It's all happening soon.

D: Do you have any idea of a time period?

C: The next few years will be the—I'm getting the word "decision point." It will be the "cut-off" point. I think it means that those who have not decided by then, will be left behind. It's critical.

D: But there are some entire countries in the world that are not ready for this. That's why I am thinking there are many people that won't make the crossover.

C: There's more happening than people know about. I'm seeing some countries where people are being persecuted. The reason that's happening is to awaken spirituality because persecution causes it. When people are persecuted or when they're facing death, or when they're facing huge human feats.

That is a trigger that awakens people. And that's the purpose of much of the persecution that's occurring at the moment; to make sure that these people are awakened. So that's the positive side of it.

D: Is there something that triggers it or precipitates it?

C: It's like the curtain drops. And I'm not allowed to see. I'm just being told that it will be the end of one and the beginning of another.

D: They're trying to lead us into war at this time. (2002) Do you think it has something to do with that?

C: (Big sigh) I'm afraid that's the test. I said that many people were being tested. And I didn't realize it then, but I do now, that's all part of the test, if we can keep ourselves separated from that. It's like we have to create our own... it's like each one of us is the universe. All parts of the universe are held here (placed her hand on her body). And if we keep this universe here....

D: This body?

C: Yes. If we keep it at peace, and we keep it in balance, then we are passing the test. Then we can withstand anything. And those things that are happening in the world are really to test the whole; all of us.

D: You mean to not get caught up into the fear.

C: Yes. Turn the TV off. Don't listen to it. Don't read the paper.

Don't get caught up in it. Your world is what you create here. (Touched her body again.) D: In your own body.

C: Yes. In your own space here. This is your own universe here. If every person creates peace and harmony in their own universe, then that's the universe they're creating in that fifth dimensional Earth. The more people who can create peace and harmony in this body universe, the more people who will be in that fifth dimensional new Earth.

The ones who can't create peace and harmony in this body universe, are not passing the test. That's the test.

D: We're trying to do this to keep the war from happening, or to lessen it anyway.

C: I'm being told that it doesn't matter what happens because it's all a game. It's all a play. And the things that are happening are there for a reason. And the reason at the moment is to test each human being to find out where they are in their own evolution. And so if we hold peace and light here (the body), we don't have to worry about whether there's a war or not. It's only an illusion anyway.

D: But right now it seems very real, and it could have some very disastrous consequences.

C: Yes, but that's fear for each individual. Our job is to help each individual find peace here (the body). And then, of course, as you bring more people together, who have peace and harmony within their own body universe, then instead of the blackness spreading, that spreads. And that creates this whole new world. If you'd been given all that information back in the beginning of your work, you would have been overloaded. It's the same reason why they're saying, "We're not going to tell you exactly what's going to happen." We don't know exactly what's going to happen. But we're not going to tell you what we know because you don't need to know. All you need to do is focus here (the body) creating your heaven on Earth. Each human being creating their own heaven on Earth. That's all you have to do. And coming together with others who are creating their own heaven on Earth. And then expanding that energy out. And before you know it, you've changed the world. You don't even think about the world. What you focus on is what you create. Think about peace. The main thing people have to understand is that, what they focus on expands. So if they focus on, if they can replace predictions with something that is wonderful that they want, and expand that. Then they can create their own heaven on Earth. And I'm being shown in your book *The Convolutioned Universe* (Book One), you give a description of thought. I'm being told to remind you about this. You talk about an energy ball the size of a grapefruit.

And that ball has energy strands. And I'm changing this as I go. Energy strands which go over each other and transverse each other. And those energy strands can do anything they like. They can split, and they can become four energy strands. They can weave. They can multiply. They can go backwards. They can zip up. They can do absolutely anything. And this is the ball of possibility. When you think a thought, it doesn't just disappear. It becomes an energy strand. It becomes energy. It moves into that ball of possibility. So, imagine your thought becoming energy. And the more energy you give it, the stronger that becomes.

And then it manifests, and it becomes real. It becomes physical. If you send a thought out that there's going to be peace. And then you follow it with, "Oh, but that war is getting worse," or "Those politicians are making a mistake." You weaken the energy: the positive strand you brought out. So we have to teach people to send out the positive thought, and then to reinforce it with more positive thoughts, and more positive thoughts. And we have to teach them that when one of those negative thoughts comes into their mind, not to just let it go, but to replace it with a positive thought.

So that they're adding to that energy ball of possibility. They're contributing to it. We have to teach them to do that. They do not know how to do that. And I'm being told to tell you to reinforce that the illusion—I don't know why I'm being told to tell you this.

But they're saying that if we could get people to think of this conflict that's occurring in the Middle East as a movie, it would help people. The other thing I'm being told to tell you is that for every action, they can make an opposite reaction. Where there's birth, there's death. And everybody must let go of any greed, any domination, materialism. Any of those issues that are stopping them from doing this work, must be let go. Because these issues are not going to serve anybody in the new Earth.

There's not going to be the need for money, as such. So why would you bother about it? Those who are working for the Earth, for the universe, are being provided for, and will continue to be. What you need will come to you. So it's time now to let go of that ethic of working to get the money. You're working to change the Earth. You're working to save this situation. That's where the driving force must be. It must come from love and service. And that's the only way we will maximize this effort. It must come from love and service, not from greed.

D: I've been told love is the most powerful emotion.

C: Yes, love heals.

People at my lectures are always asking me what do they have to do in order to move to the New Earth? "They" have said there are two important things you have to let go of. One, as just explained, is fear. Fear is an illusion, yet it is the strongest emotion that a human has. It must be released or it will hold you to the old Earth. I tell people to ask lots and lots of questions. Don't believe everything you hear or read. Think for yourself. Don't give your power away to anyone. Make up your own mind and discover your own truth. It may not be my truth, but it will be yours because you have discovered it. And then don't be surprised if that truth changes.

We are constantly learning. Stay flexible. Don't let fear cloud your judgment so that you can't think for yourself.

The second thing you must let go of is karma. We accumulate karma through living many, many lifetimes on Earth, often with the same people repeating the same mistakes. This is why it is called "The Wheel of Karma." It just goes round and round and holds you to the pattern. I call karma the "baggage and the garbage" that we carry around with us. You must get rid of the "junk" so you can ascend. We all have bad things that happen in our lives. That's what life is all about. I have found that we agree to these events and things in order to learn from them. I ask people when they tell me about their bad experiences, "Did you learn anything from it?" If you learned even one thing from it then that was the reason you experienced it. If they say they did not learn anything from it. Guess what? They will have to experience it all over again until they understand what it was trying to tell them. They have to repeat that grade in school. You can't go from kindergarten to college. So go over your life. What are you holding on to? What haven't you let go of?

It no longer matters if you were mistreated or abused as a child. What did you learn? It doesn't matter if you had a horrible marriage. Let it go!! Some of my clients have said, "I can't let it go. You don't know what they did to me!" It is not hurting anyone but yourself by holding onto karma, and creating more by not releasing it. In order to ascend into the New Earth you have to let it go. You have to forgive, or you will have to stay with the old Earth and go through it all again. That is how the law of karma works. Is that what you want?

During my lectures I give the people an exercise that they can use to release karma. You can't speak to the person face to face. That is too difficult to do. Besides, sometimes the person you are angry at has died and it is impossible to face them. You have to do it mentally. Remember that when you were on the spirit side you planned of what you hoped to accomplish in this life.

You made contracts with various souls to play various parts in your scenario on Earth. Some of your greatest enemies or challenges during your life were your greatest friends on the spirit side. They volunteered to come and play the villain in your Earthly scenario. And some of them play their parts very well!

So picture the person in your mind standing in front of you. Say to them, "We tried. We really tried. It's not working. I am tearing up the contract." And see yourself tearing up the contract and throwing it away. Then say to them, "I forgive you. I release you. I let you go.

You go your way with love, and I'll go mine. We don't have to be connected anymore." And see it happening. The key here is that you have to really mean it. You have to believe it. Once you have done that they will have no power over you anymore. Then you have to forgive yourself. Remember, it always takes two people to create the situation. None of this is easy, but it is essential and imperative, if you want to get off the Wheel and ascend into the New Earth. It's up to you!

This was part of a longer session in 2002 where the subject had a connection with extraterrestrials. They were supplying information about many things, including what they could do (or are allowed to do) to correct the damage mankind has done to the Earth.

P: They're moving me... forward into the future. They're moving my body. Oh, my god, I'm getting dizzy.

I gave calming suggestions so she would not have any physical effects. She calmed down and stabilized. The feeling of motion dissipated. This experience has also happened to other subjects I have worked with, when they are moved too quickly through time and space.

D: What are they showing you now?

P: All I see is light. It's just a brilliant explosion of light. The planet is being bombarded with a special light and it contains different colors. And these different colors affect the consciousness of people in different ways, but it not only affects people. It affects plants and animals and rocks and water and everything. It's a certain type of white light, and it has all types of colors in it. And it changes and moves and it permeates the very core of the planet. I see it's coming from the core of the planet. They shoot it down from, I guess, the ships, and it touches the core of the planet and it bounces out from the core and affects everything from an inward to an outward movement. If you were standing on the planet, you would feel the energies coming through your feet and coming out through the top of your head.

D: The opposite of what it usually does.

P: This is different. It's coming from the ships to the core of the planet and then it's bouncing back up. And it's affecting the whole planet. They don't want us to blow ourselves up.

D: Is this something that is happening in 2002, or is it happening in the future?

P: This is the future. They're going to do it! To correct the alignment in the planet to keep anything bad from happening. 2006.

D: 2006. Will we have gotten the planet more out of alignment by this time?

P: Yes, yes. Oh, there are people on the planet and they're praying, but it's not enough because it's so messed up. It's going to get out of its orbit. And that will affect the rest of the cosmos. So by them directing these energies to the core of the planet, it's going to come back up, and that will correct the alignment. And when it corrects the alignment, it will also correct many other things on the planet. It will help the flooding, the droughts and things like that, that man has brought upon the planet. There's not going to be an annihilation of this planet. The council makes sure that it won't happen. The beings are down here on the planet watching, and they know what's going on and they know who's doing it and they can affect them. It's not that we can't intervene, we're not allowed to intervene.

D: Because there are some things you can't do.

P: That's right, but we can watch. And we know who's doing it.

D: But whenever the planet gets to the point that man has damaged it so much, that's when you can help?

P: That's when we're going to send these... I see multi-coloured lights. It's like multi-coloured shafts of energy and they're being shot down into the core of the planet. And then they bounce back out and it affects the whole planet and it will keep the planet in alignment.

D: Is this being done by many ships?

P: It's a confederation. I see many. I see different levels or classifications of beings affecting the planet. We're involved in that. There are many, many beings.

D: So it's a massive job.

P: A confederation. Yes, yes.

D: But isn't it dangerous to shoot things at the core of the planet. Hasn't something gone wrong before when that happened?

I was thinking of the destruction of Atlantis. This was partially caused by scientists focusing the energy from the giant crystals downward to the center of the Earth. Too much energy was created, and contributed to the earthquakes and gigantic tidal waves.

P: This is not what you think. This is pure light energy. And the only effect it will have on the planet is good. It will not harm the planet.

D: I was thinking of what they did in Atlantis.

P: This is not the same thing. It's hard for me to explain. This is done on a soul level. It's like pure divine energy. It's not the energy in Atlantis. The energy in Atlantis was done through atomic power. This is energy that the divine has created that is done through light.

It's not done through the separation through molecular structures. This is something we have created, and we send it from the Source. Anything that's from the Source is good and it's not going to harm the planet. It's going to do what we want it to do. And we've been allowed to do this. It is because the planet has caused this that we are taking this action. It's necessary.

D: Isn't this interference?

P: No! We cannot interfere with the people here. We can't come down and bully them and tell them what to do. But we can bring our ships and we can point this energy at the core of the Earth. We can do things like this. This is actually on a soul level. So therefore, we are not interfering with the karmic structure of the people here. Everyone here has a karmic purpose, and we are not interfering with that. We're not allowed to. We don't do that.

D: Do the people on Earth see this when it happens?

P: They feel it. In other words, they'll go through the transformation. And they won't realize what's happened to them. Some of them will realize. Those who are sensitive will know that something has happened. But many on the planet will just go on in their normal lives, and they will be lifted up and they will be changed and the Earth will be changed. The rocks and the water, but they'll just go on existing because we are not affecting the karmic pattern. We can't do that. We're doing this on a soul level, but it's not affecting their Earth lives as far as karmic patterns go. We're not bothering that.

D: But the Earth has to get to a certain point before you're allowed to do this.

P: 2006. It's getting bad. It's already very, very bad right now. If it's allowed to continue, the air will harm very many people. And the reason we're involved is, there are people in their physical embodiments breathing this atmosphere with all this pollution and it's changing their genetic heritage. We cannot let that happen and we will not let that happen! We gave people of this planet their genetic heritage. And now they have messed up their drinking water, their food, their planet. Everything here is polluted. Man has destroyed his genetic heritage and we're going to repair it because they are not going to mess up our experiment! This is a divine experiment and they can't mess it up. We're going to change it.

To find out more about the grand experiment that mankind has been involved in since its beginning, see my books, *Keepers of the Garden* and *The Custodians*.

P: We have to do this. The whole planet was destroyed many times. You know about Atlantis; there have been many other explosions, floods. This is something that we can't allow to happen at this time because it's going to affect the rest of the cosmos. And the Earth is coming a little more out of alignment. And we will be putting the planet, not only back in alignment, but we will also help cleanse and clear the genetic structure of everything and everyone on the planet. And this has been put forth, and it's been agreed upon, and it will be done. Because mankind has reached the point that it will not be cleaned up soon enough before it destroys the genetic makeup that we created.

D: So it only has to get out of alignment just a little before it will affect the other...

P: It's already affected other—not only civilizations in a physical realm that you know, but also on higher planes. That's why we're going to do this.

The various universes are so interwoven and interconnected that if the rotation or trajectory of one is disturbed, it affects all the others. In the extreme case, this could cause all the universes to collapse on themselves and disintegrate. This is one of the reasons for the monitoring of planet Earth by ETs. To detect any problems caused by our negative influences and alert the other galaxies and universes so countermeasures can be initiated. They have to know what the Earth is up to, so the rest of the universes, galaxies, and dimensions can protect themselves and survive.

D: I thought if you were going to have a massive project like that on Earth, people would be able to see all these ships.

P: OH, you typical Earthling! No, you can't see our ships. We're in different dimensions. There are many different vibrational rates. You won't even be able to see the light, but it's there. At some time, your scientists will be able to measure this type of energy. At some point, the scientists will be able to determine that we are in the atmosphere, and they'll see our ships. They will have machines and devices so they can determine where our ships are. But they don't have that technology right now because we've moved across the veil and we're in—shall we call it—an astral realm. It's a higher level than that, but it's a finer level. And your eyes can't see them, but in the future they will have machines that can see it.

D: But they will know something is happening to the energy levels. That something is changing.

P: It will change, and the people will change, but they're not going to be aware of what has happened. It's going to be a big event, but they're not going to be able to discern it on a physical level. On a soul level, they can tell. Subconscious level they'll know, but not on a conscious level because you're thinking of a physical energy. This is not physical energy; this is energy from God. This is soul energy. And it operates within a different dimension than you're thinking. It's very different.

D: So the people will feel it, but they won't see it. They'll just know that something is happening in their bodies.

P: Some will know. Those that are sensitive will know that something has happened, but they won't know what. And that's what we want. We don't want to disrupt anything.

D: How will this affect the human body?

P: It will prevent the decay of the genetic material DNA within the body. Like I said, it's becoming damaged and we can't have that. We can't have a whole race of people damaged. The energy will change the DNA genetic structure of the humans so that it will be more perfect. That's what we really want. We want the humans on the planet to be in perfect harmony. Not only with themselves, but with us and the rest of the cosmos. They're not in that right now.

D: So when the DNA structure is changed, how will the body be different?

P: When the DNA is changed, the body will be what we wanted it to be many millennia ago. We tried this in Atlantis, it failed! The reason it failed was because the energies were used in a negative way by the beings in Atlantis. We tried to bring forth a more feminine energy back in the days of Atlantis, which would raise up and cause a union between the divine male and divine female. It failed. Therefore, the planet Earth went through many, many, many thousands of years with women being subjugated and the feminine energies being suppressed. Now, this is the time that both will be equal. The male and female divine energies will join and this will make for a perfect being... like Christ. Everyone here will realize they can be a perfect Christ, when these energies are in balance. The energies have not been in balance; they've been out of balance for thousands of years. That's why there are so many problems on the planet.

So when the DNA structure is altered, the divine energies, the male/female, the yin and the yang, of the God energies can unite and there will be perfection upon the planet.

Perfection within the bodies. And this planet will be something that we can show to the rest of the worlds, the rest of the cosmos. That this is our experiment, and this is what we have done and it has succeeded. The light has succeeded because it will be perfect as we have wanted it to be for thousands of years. When we first came here, it was perfect. You've probably been told that. It was altered. You know the meteorite came; disease came. Everything was messed up. We're going to have it perfect again. And this is part of that alignment that we'll be doing to make it perfect again. And this is perfectly normal.—This is all part of genetics, but the reason that happened, was that humans have not been in balance. The divine energies have not been balanced within the psyche or even within the physical mind, but the psyche that comes into the body manifests physically. These have been out of alignment. This causes disease within the body. When the bacteria landed here on the meteorite, had the bodies at that time been in total perfect alignment, it wouldn't have mattered. The disease wouldn't have gotten in there. But the bodies had already begun to change when it hit, so there was nothing we could do.

She was referring to the same thing that was mentioned in my book *Keepers of the Garden*, which explained that disease was introduced to Earth and spoiled the grand experiment by a meteorite that struck the Earth when the fledgling species were still developing. This caused a great deal of sorrow in the council in charge of developing life on Earth because they knew their experiment of creating the perfect human being could not happen under these circumstances. They had to make the decision whether to stop the experiment and start over again, or allow the developing humans to continue, knowing that it would never be the perfect species it was intended to be. It was decided that so much time and effort had been expended in developing humans, that they should be allowed to continue. The hope was that maybe some time in the future, the species could develop into the perfect human being with no disease. This is the main reason for the sampling and testing done by the ETs that people misinterpret as negative. They are concerned with the effects of pollutants in the air and chemical contamination of our food on the human body. And they are attempting to alter its effects.

The ET continued: "We didn't want to not do the experiment. We couldn't just throw the planet away. We couldn't just let all these lifeforms; all these souls be forever altered. We had to step in and we've been coming here for ages and ages. This is the culmination of many, many years of work. Millions of years. And it's coming very soon and we're pleased because mankind has reached the point to where this can be brought forth again upon the planet. As I said, we tried it back many, many thousands of years ago and it failed, but we expect it to succeed this time. It's already beginning to succeed. And we're very happy about that."

D: Will all of the people of Earth experience this?

P: As I said before, everyone will be affected. It's just that there are those who will be sensitive, who will pick up that it has been done. Some people will not realize on a conscious level that it's been done. It's been done on a soul level. If you were to put them in trance as you have this person now, they would know they have been affected, and they could explain to you what it has done to their genetics. But on a conscious level, they haven't a clue. They don't know. And that's what we want.

D: I was thinking of negative people (Murderers, rapists, beings of that sort.) Will they be affected in a different way?

P: Everyone will be affected. They will know on a subconscious level what has happened. As the subconscious changes, and becomes aware of this, and is activated, yes.

D: They still have karma.

P: This will also be affected, because this planet in the future is not going to have karma. That is something that won't be allowed here. It will be a planet of Light and Peace and will be our grand experiment that succeeded.

D: I've been told this is why many in the universe are watching.

P: Yes, that's right. We're here to do that. And it will be safe.

One final piece of information came through a client at my office in 2004. I believed one part of all of this was still unclear: How could some people be aware that they had made the shift into the New Earth, and others would not be? How would it be possible to move an entire population with only a minority knowing anything had happened? "They" must have been aware that I was struggling with this lingering thought, so they supplied it. After all, how could I write about it, and lecture about it if I didn't have all the pieces?

Bob: Most planets, but especially this one was only designed originally for five hundred and fifty thousand people. Half a million people. That was as large as it was supposed to go. More people are reincarnating here to experience all these major changes. And the Earth has been damaged and changed beyond the capability to repair it. This planet has been unfortunately changed in such ways that there's no sense of return whatsoever to its original pristine condition. But now because of the prime directive from the Creator, this has to accelerate. Because it's been too long. There are two ways to do this. You can cause the planet to rotate and the Earth crust to shift. And you literally, when that happens, start all over again from ground zero.

That's what touched off the Ice Age and killed all the dinosaurs. It doesn't matter how it happened, but basically it did the same thing. A civilization disappears, and you start off with the Ice Age and Neanderthal Man and all that kind of good stuff all happens again. You lose control of your entire civilization, and you end up as a legend like Atlantis and Lemuria. This has all happened many times before. But that's not what's going to happen this time. This time you shift as a planet. And basically as a universe. You shift the whole dimension.

The dimension changes. You go from 3 point 6 (3.6) which we are now, to five. And you say, "Well, what happens to four?" Well, four is sort of here in a way, but it's just going to jump it. You're going to end up as five. When the dimensional change comes, you will literally jump that. There's a lot of complications with this. This is why it's being watched so carefully. Many people who are spiritually ready will be able to make the transition very easily. Others are literally going to be taken off planet. In the flick of an eyelid they won't even know it's happened, most of them.

And they will end up on another planet that's pristine, ready and waiting for this to happen. And your capabilities will be far beyond what they are now. You have basically five primary senses. You'll have many more than that when the transition goes through. You will become automatically telepathic. They'll wake up in their little lives the next day—or what can be done, depending on how it's shifted.—It has happened before, by the way.—We will simply shut down. It's like going into suspended animation. We suspend it. It may take two or three days to transfer the populace.

D: The entire world, or just the....

B: Yes. All the people that are spiritually ready to make this transition. They'll all be shifted off. And when they wake up on this other planet, they won't even realize it's happened. There was a shift like this a few years ago on this planet, with all of us. And not many people knew about it. It just was. It was like a whole week passed by in the course of a night. It has happened that way.

D: Why did that happen at that time?

B: We needed to shift the sun, technically, and we needed to be able to adjust it. And if anybody could see it, they would all know what happened. That wasn't a very practical way of doing it. So we just kind of shut everybody down.

D: So they wouldn't know it?

B: Yes. You went to sleep that night, and you slept like you thought it was a twelve hour period. And you woke up. And your watch was still running the same. But in fact you had literally gone through a whole week.

D: Everyone was put into suspended animation?

B: Yes. You shut down the whole thing all at the same time.

D: While the world moved?

B: Oh, yes. The planet moves. You have the so-called "night and day." But we actually adjusted it. It was a really interesting trick to do it. But it does work. This planetary adjustment that's coming up. This frequency change thing that is coming up. You can't merely do this with everybody awake. Because you're going to have all sorts of strange reactions in people. So they think they're all awake. But yet we can shut them down. It's a bit of a trick. It's very technically involved.

D: So they would think they were having dreams if they did see anything.

B: Yes, yes, precisely. But they might not have conscious remembrance of it because don't forget, most people don't have conscious remembrance of what they dream anyway. And you can change things in dreams very easily, too.

D: You said this was done a few years ago.

B: Yes, it was. We had to make an adjustment in the sun's frequency.

So apparently that would be the answer. The entire population of the world would be shut down and put into suspended animation while the transfer was made.

This is also found in the Bible: "In that day, he who is on the housetop, and his goods are in the house, let him not come down to take them away. And likewise, the one who is in the field, let him not turn back. I tell you, in that night, there will be two men in one bed: the one will be taken and the other will be left. Two women will be grinding together: the one will be taken and the other left. Two men will be in the field: the one will be taken and the other left. And they answered and said to Him, "Where Lord?" So He said to them, "Wherever the body is, there the eagles will be gathered together." (Luke 17:31-37)

I have been asked many times about the Mayan calendar ending at 2012. People think that is the date for the end of the world if the Mayans could not see beyond that. I have been told that the Mayans evolved spiritually to this point where their civilization shifted en masse to the next dimension. They stopped the calendar at 2012 because they could see this would be the time of the next major event: the shifting of the entire world into the next dimension.

We will ascend to the other dimension by raising our consciousness, the vibration and frequency of our body. At first, you can continue in a physical body for a while. Then as you gradually discover it is no longer necessary, the physical body dissolves into Light, and you live with a body made of light or pure energy. This sounds very similar to several cases in my books where the subject saw a being that glowed and was composed of pure energy. They have evolved beyond the need for a physical limiting body, and we will do this also when we reach that stage. So in many cases, when the being ascends, they take the physical body with them. But this is only a temporary situation and the shedding and letting go of the body depends on the level of understanding the being has reached. We do tend to hold on to the familiar, but eventually see that even though we were able to take it with us, the body is too limiting and confining for the new reality in the new dimension. When we reach this new dimension, the new body of light or energy will never die. This is what the Bible meant when it referred to "Eternal Life."

The spirit side or the in-between lives state, where I have found that we go when we die in this lifetime, is like a recycling center. It leads back to another life on Earth because there is still karma to be worked out, or something that needs to be attended to. People keep returning because they have not completed their lessons or their cycles. By raising the consciousness, the frequency and vibration, there is no need to return to that place (the in-between state). It can be transcended by going to the place where everyone is eternal, and there is no reason for recycling.

We can remain there forever. This is probably the place many of my subjects refer to as "home." The place they deeply miss and desire to return to. When they see it during the regressions they become very emotional because they have been deeply longing for it, yet not consciously knowing it existed.

Arcanum Arcanorum – Metamorphosis in Universal Reconfiguration

Fake Alien Invasion and Disclosure of Fake and True Extraterrestrial Intelligences within a 230K and 1.8 Million Timeframe of Starhuman Seeding on Planet Earth

Many researchers and observers of human history understand that the New World cannot come from political roots or movements, which have shaped the Old World in the relatively distant past. Agenda 2030 of the 'Global Technocracy Reset' requires the next 10 years to implement at the Fabian turtle pace, with 2020 the midpoint between 2010 (Lock Step) and 2030.

This plan so engages an increasing surveillance-control system culminating in the victory not only over the world political, but the negation of all encoded scriptural patterns and prophecies.

Project Bluebeam is part of agenda 2030 and utilizes quantum mechanical principles and science to manifest a holographic fake alien invasion to 'fulfil' say the apocalyptic codes and forestall the true ET-UFO-UAP phenomenon in conjunction with AI and nanotechnology.

Preparation for a real ET contact (ETs being both our ancestors in mind and descendants in the body and linked to so called dead alive or 'passed over' ones) engages a human mental evolution in expectation of a 4th spacial hyperspace dimension to 'open up' or unfold from a 12-dimensional omnispace dimensional fractalized-discrete continuum to manifest a 5-dimensional spacetime within a reconfigured 12-dimensional quantum-twistor-line space as a tripartite timeless self-enfolding or circularized energy-frequency field equivalent to a four folded spacetime continuum embedded within a 12-dimensional omni-quantum-rotation-line spacetime matrix .

This effect will then be part of the reconfiguration of the universe, holographically fractalized in individualized starhuman body forms as the 'new ETs'.

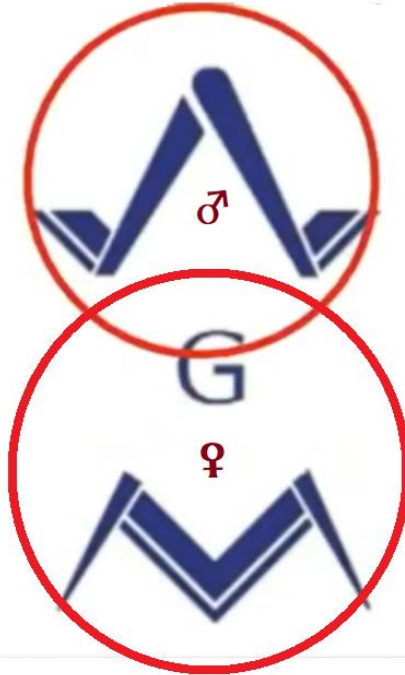

Arcanum Arcanorum

Arcanum Arcanorum

Isaiah 60.8 - (KJV):

Who are these that fly as a cloud, and as the doves to their windows?

Isaiah 60.8 - (KJV):
Who are these that fly as a cloud, and as the doves to their windows?

Romans.9.23 - (KJV):
And that he might make known the riches of his glory on the vessels of mercy, which he had afore prepared unto glory,

Romans.9.23 - (KJV):

And that he might make known the riches of his glory on **the vessels of mercy**, which he had afore prepared unto glory,

Isaiah 66:22-24 - (KJV):

²² For as the new heavens and the new earth, which I will make, shall remain before me, saith the Lord, so shall your seed and your name remain.

²³ And it shall come to pass, that from one new moon to another, and from one sabbath to another, shall all flesh come to worship before me, saith the LORD.

²⁴ And they shall go forth, and look upon the carcasses of the men that have transgressed against me: for their worm shall not die, neither shall their fire be quenched; and they shall be an abhorring unto all flesh.

Matthew 24: 1-15-22-27-28-37-41-51 – (KJV)

¹⁵ When ye therefore shall see the abomination of desolation, spoken of by Daniel the prophet, stand in the holy place, (whoso readeth, let him understand:)

¹⁶ Then let them which be in Judaea flee into the mountains:

- ¹⁷ Let him which is on the housetop not come down to take any thing out of his house:
¹⁸ Neither let him which is in the field return back to take his clothes.
¹⁹ And woe unto them that are with child, and to them that give suck in those days!
²⁰ But pray ye that your flight be not in the winter, neither on the sabbath day:
²¹ For then shall be great tribulation, such as was not since the beginning of the world to this time, no, nor ever shall be.
²² And except those days should be shortened, there should no flesh be saved: but for the elect's sake those days shall be shortened.
- ²⁷ For as the lightning cometh out of the east, and shineth even unto the west; so shall also the coming of the Son of man be.
²⁸ For wheresoever the carcase is, there will the eagles be gathered together.
- ³⁷ But as the days of Noah were, so shall also the coming of the Son of man be.
³⁸ For as in the days that were before the flood they were eating and drinking, marrying and giving in marriage, until the day that Noe entered into the ark,
³⁹ And knew not until the flood came, and took them all away; so shall also the coming of the Son of man be.
⁴⁰ Then shall two be in the field; the one shall be taken, and the other left.
⁴¹ Two women shall be grinding at the mill; the one shall be taken, and the other left.

Revelation 19: 17-18 - KJV

- ¹⁷ And I saw an angel standing in the sun; and he cried with a loud voice, saying to all the fowls that fly in the midst of heaven, Come and gather yourselves together unto the supper of the great God;
¹⁸ That ye may eat the flesh of kings, and the flesh of captains, and the flesh of mighty men, and the flesh of horses, and of them that sit on them, and the flesh of all men, both free and bond, both small and great.

4Q392: “[...] and dominions [...] [...] a man [...] God and not to turn aside from [...] and in His covenant your soul shall cling and [...] words of His mouth [...] and God [...] heaven above and to search out the ways of the sons of man, they have no hiding place. He created darkness and light for Himself, but in His dwelling place is the light of their light and all darkness rests before Him as well. He has no need to distinguish between light and darkness, but for the sons of man He distinguishes them as the light of day, with the sun, and night, with the moon and stars. He has a light which cannot be searched out, nor can its end be known. For all the works of God are doubled in this manner. We are flesh, which does not totally grasp these things. With us for [...] for a sign and wonders without number. [...] winds and lightning [...] servants of the holy of holies. They are as couches before him [...].”

- translated by Martin G. Abegg, Jr.

The Complete Dead Sea Scrolls; Geza Vermes; Penguin, London, 1997

Gospel of Thomas – Lambdin, Nag Hammadi Codices, Egypt, 1945

These are the secret sayings which the living Jesus spoke and which Didymos Judas Thomas wrote down.

- (1) And he said, "Whoever finds the interpretation of these sayings will not experience death."
 (2) Jesus said, "Let him who seeks continue seeking until he finds. When he finds, he will become troubled. When he becomes troubled, he will be astonished, and he will rule over the All."

(3) Jesus said, "If those who lead you say to you, 'See, the kingdom is in the sky,' then **the birds of the sky** will precede you. If they say to you, 'It is **in the sea**,' then the fish will precede you. Rather, the kingdom is inside of you, and it is outside of you. When you come to know yourselves, then you will become known, and you will realize that it is you who are the sons of the living father. But if you will not know yourselves, you dwell in poverty and it is you who are that poverty." {Sea=Mirror-Rev.13}

(4) Jesus said, "The man old in days will not hesitate to ask a small child seven days old about the place of life, and he will live. For many who are first will become last, and they will become one and the same." { 7 Days as 7 Years December 21st, 2012 to December 21st, 2019 for Alpha-Omega Logos}

(13) Jesus said to his disciples, "Compare me to someone and tell me whom I am like."

Simon Peter said to him, "You are like a righteous angel."

Matthew said to him, "You are like a wise philosopher."

Thomas said to him, "Master, my mouth is wholly incapable of saying whom you are like."

Jesus said, "I am not your master. Because you have drunk, you have become intoxicated from the bubbling spring which I have measured out."

And he took him and withdrew and told him three things. When Thomas returned to his companions, they asked him, "What did Jesus say to you?"

Thomas said to them, "If I tell you one of the things which he told me, you will pick up stones and throw them at me; a fire will come out of the stones and burn you up."

{Jesus said, replying to Thomas and pointing to John and Mary Magdalene: I am you and you are him and he is her!} {John.20.17 Mary as New Eve CJ-Left requires ascension before blending with JC-Right} (114)

Simon Peter said to him, "Let Mary leave us, for women are not worthy of life."

Jesus said, "I myself shall lead her in order to make her male, so that she too may become a living spirit resembling you males. For every woman who will make herself male will enter the kingdom of heaven." (22) Jesus saw infants being suckled. He said to his disciples, "These infants being suckled are like those who enter the kingdom."

They said to him, "Shall we then, as children, enter the kingdom?"

Jesus said to them, "When you make the two one, and when you make the inside like the outside and the outside like the inside, and the above like the below, and when you make the male and the female one and the same, so that the male not be male nor the female female; and when you fashion eyes in the place of an eye, and a hand in place of a hand, and a foot in place of a foot, and a likeness in place of a likeness; then will you enter the kingdom."

(23) Jesus said, "I shall choose you, one out of a thousand, and two out of ten thousand, and they shall stand as a single one." {1(2),000 as 100 Million Doubled in Euphrates; Dan.7.10 & Rev.5.11;9.16;18.5}

(108) Jesus said, "He who will drink from my mouth will become like me. I myself shall become he, and the things that are hidden will be revealed to him."

(11) Jesus said, "This heaven will pass away, and the one above it will pass away. The dead are not alive, and the living will not die. In the days when you consumed what is dead, you made it what is alive. When you come to dwell in the light, what will you do? On the day when you were one you became two. But when you become two, what will you do?"

(15) Jesus said, "When you see one who was not born of woman, prostrate yourselves on your faces and worship him. That one is your father."

{Old Adam=Adam+Eve in Old Heaven+Earth transforms into AdamEve+EveAdam in New Heaven+Earth}

(85) Jesus said, "Adam came into being from a great power and a great wealth, but he did not become worthy of you. For had he been worthy, he would not have experienced death."

(10) Jesus said, "I have cast fire upon the world, and see, I am guarding it until it blazes."

(16) Jesus said, "Men think, perhaps, that it is peace which I have come to cast upon the world. They do not know that it is dissension which I have come to cast upon the earth: fire, sword, and war. For there will be five in a house: three will be against two, and two against three, the father against the son, and the son against the father. And they will stand solitary."

{Sword of Plasma = Words of a Psalm}

{38 Year Metamorphosis in 5 Mirrors of Time Gestation-Anointment-Center-Anointment-Gestation}

(82) Jesus said, "He who is near me is near the fire, and he who is far from me is far from the kingdom."

(32) Jesus said, "A city being built on a high mountain and fortified cannot fall, nor can it be hidden."

(48) Jesus said, "If two make peace with each other in this one house, they will say to the mountain, 'Move Away,' and it will move away."

(106) Jesus said, "When you make the two one, you will become the sons of man, and when you say, 'Mountain, move away,' it will move away."

(61) Jesus said, "Two will rest on a bed: the one will die, and the other will live."

Salome said, "Who are you, man, that you ... have come up on my couch and eaten from my table?"

Jesus said to her, "I am he who exists from the undivided. I was given some of the things of my father."

<...> "I am your disciple."

<...> "Therefore I say, if he is destroyed, he will be filled with light, but if he is divided, he will be filled with darkness."

(87) Jesus said, "Wretched is the body that is dependent upon a body, and wretched is the soul that is dependent on these two."

(88) Jesus said, "The angels and the prophets will come to you and give to you those things you (already) have. And you too, give them those things which you have, and say to yourselves, 'When will they come and take what is theirs?'"

(89) Jesus said, "Why do you wash the outside of the cup? Do you not realize that he who made the inside is the same one who made the outside?"

Intimidations

To feel offended by truth and by deceptions.

The ptb knows you as ignoramus in secret and asks you to relax because you are clever and aware and educated.

The PTB knows you as ignoramus in openness and asks you not to relax to become clever and aware and educated.

Abraaxas: December 14th, 2016

{ Gospel of Thomas - Lambdin-Flag Hammadi }

(39) Jesus said, "The pharisees and the scribes have taken the keys of knowledge (gnosis) and hidden them. They themselves have not entered, nor have they allowed to enter those who wish to. You, however, be as wise as serpents and as innocent as doves."

Saying#115:

Jesus said, "You can delude yourself any way you wish; but if you do not eat the lion of truth, then your selfimage will not be able to shine in the wisdom of the Father and you will mirror the darkness in the world back to yourself and you will be that darkness."

Saying#116:

Jesus said to the apostles: "If the people come up to you in numbers, saying, tell us your secrets, tell us your secrets; then reply to them, that you cannot do so for reason of the sectrecy. Tell them, that should they know, they would become insane."

But if some persist and ask you privately; then share the secrets with them in measure of their willingness to become insane in the world."

Warning! The Fake Alien Invasion Threat is Real!

Apr 23, 2021 - Greg Reese - A mass awakening is the greatest threat to the criminal cabal's greatest power; invisibility

Dr. Steven Greer of <https://siriusdisclosure.com/> joins The Alex Jones Show to break down how to fight against full disclosure of extraterrestrial operations being used to manipulate the public with fear.

<https://www.bitchute.com/video/zS37jzfltWSi/>

<https://open.lbry.com/@sirebard:4/The-Fake-Alien-Invasion,-Disclosure-of-Fake-and-True-Extraterrestrial-Intelligences:e>
<https://www.brighteon.com/dashboard/videos/55c080b2-550c-4f7c-bda4-ec8907aef990>

Adam Bermanseder

Good interview, Steven Greer is good on the subject, much better than Alex which that video makes clear.

It is becoming increasingly obvious that "the powers that be" are planning it. What I find more interesting is whether or not it will coincide with the real thing? difficult to imagine the Logos would allow such a deception for any serious length of time.

Tony Bermanseder

The length of time is encoded in the ancient texts and so requires the context of those timelines to adjust the linear progression of time to the potential yet stipulated-defined time markers or nexus points. The continuity of the historical and political affairs of planetary man, so depend on the potential outcomes and the 'set in stones' major markers encoded. Alex is a nuisance interviewer with the right impulses, but he interrupts most annoyingly. Greer has the ET agenda nailed and is correct with the interdimensional 'EVIL=VEIL=LIVE' NOT being actual ETs.

The 'interdimensional 'demons' are human mind creations and so fit particular religious contexts and in conjunction with the cabal created 'robotic fake ETs' , which Greer nicely points out; they serve the devious antihuman agendas of the technocratic elites very well.

The actual ET history in biological form dates to 2,240 million years ago, when the universe became self-reflective and enabled to 'see itself' in the mirror of spacetime (11D-Witten Membrane), the religious folks should understand to be the actual meaning of the Sabbath and the Sea of Glass as the encoded 'throne of heaven' in the apocalypse.

Before the Universal Logos incarnated physically in full remembrance and spacetime awareness as Jesus/Yeshuah in 7-6BC; Logos was part of the creator monad and so known to any soul-ET sentience as 'the Source Energy' as Universal Consciousness; scripturally named as God outside and within (as the female Goddess).

This hidden or occulted feminine creator became the 'devilish-satanic' opposition to the apparent and visible creator principle without. The problem at the present time is that the cabal knows what I just described, and very successfully has hidden or obscured their nous from the general human population. It so will be a small proportion of old humans, Logos aligned, which will present the true opposing starhuman or pro-human agenda to counter the 'evil' agenda as the 'true remnant' of the Logos dispensation and history of 37 years with a gestation period.

This period is decoded in the chart as the first incarnation of Jesus/Yeshuah from July 26th, 7BC to April 17th, 32 AD as the required uniqueness and individualization of the 'source consciousness aka God as FatherMother'.

The second incarnation in the manyness, then is decoded as a time of preparation and a time of construction (of the New Jerusalem or New Earth with a New Heaven).

This defines the change of the precessional ages (Jesus changed the Age of Aries into the Age of Pisces in the first incarnation and changes this into the Age of Aquarius in the second incarnation) as the Preparation from March 31st, 1975 to December 21st, 2012 with April 30th, 1979 to January 20th, 2017.

The 'Age of Aquarius' is here given as a 36 year solar transit across the galactic equator and which is annularly defined as the solar transit from the star sign of Capricorn-Zebulon into the star sign of Aquarius-Joseph on and about January 20th every year.

The Construction runs from December 21st, 2012 as the 'end of all the preceding ages' in a reset of the time keeping then uses the apocalyptic definitions of the end times as the 24 Elders as a $12+1+1+12 = 24+2$ decoding of the 'judgements' encompassing all the timelines in the Masoretic texts (Christian Bible and Jewish Torah) as the last Supper circle and the division of the year into seasons and month and the 12 tribes of Israel as the 12 star signs of the zodiac, called Mazzaroth in the Torah/OT/Book of Job.

The 13 years from 2012 so define a newborn baby, born December 21st, 2012 from its conception of March 31st, 2012 to grow up into a teenager graduation on December 21st, 2025. A 5-year offset from the 2030 agenda of the cabal will so be short circuited by the overall fulfilment of the 'Words of the Logos' as described here and in the chart. This chart is extended in the following one, including the GOT codes.

But apart from the exposition of the scripture codes, the actual detail of this resurrection of the body simply describes the Journey of a Soul no longer in duality mode. This then becomes an actual basis and the foundation of a new cosmology and a new standard physics.

But the authority of it must come from a renewal of human thinking and self-perception as a reborn humanity as its own extraterrestrial or ET presence and not any old human mind creation. Then the imagined starry origins of the Mazzaroth-Celestial Order found in the legends and creation mythologies of the human history and encoded in the 'Book of Job' can support a great awakening of a civilization facing either its collapse and destruction or its graduation.

The genetic awakenings of the shaman and the dreamers will realize its ET origins, might those be labelled as Pleiadean, Arcturian, Sirian or Thuban in the five great Platonic-Mayan ages, each of 26,000 such years of 360 Degree-Days.

Transformation and Metamorphosis

There are many transformations, but a metamorphosis of a series of transformations represents a timeline aim of purpose for the individual transformations.

This world presently is experiencing its transformation of 5 transformation cycles known as Mayan precessional ages, each of 26K 360 day 'Great Cycle/Prophecy' Years.

Those can be labelled in divers ways but relate to the beginning of homo sapiens 46,800,000 days from the (in)famous Mayan solstice of December 21st, 2012.

Then a new form of humanity was 'born' as a potential starhuman. December 21st, 2020 so marked the 8th birthday of this 'collective starhuman consciousness' and you and many others experience this '8-year-old growing up' in different ways.

Perhaps you can place this manifestation into a greater context universal.

The technocratic tyrants know of this manifestation rather well and their accelerated push into the 'great reset' of the say 4th industrial revolution relates to this.

One way of characterizing the human legacy from the stars is: (dates Gregorian proleptic as sunrise to sunset counts):

Genesis 7:19-21-King James Version (KJV)
 19 And the waters prevailed exceedingly upon the earth; and all the high hills, that were under the whole heaven, were covered.
 20 Fifteen cubits upward did the waters prevail; and the mountains were covered.
 21 And all flesh died that moved upon the earth, both of fowl, and of cattle, and of beast, and of every creeping thing that creepeth upon the earth, and every man:

Revelation 11:1-2
 1 And there was given me a reed like unto a rod: and the angel stood, saying, Rise, and measure the temple of God, and the altar, and them that worship therein.
 2 But the court which is without the temple leave out, and measure it not; for it is given unto the Gentiles: and the holy city shall they tread under foot forty and two months.

Revelation 14:20
 20 And the winepress was trodden without the city, and blood came out of the winepress, even unto the horse bridles, by the space of a thousand and six hundred furlongs.

Revelation 21:5-17
 15 And he that talked with me had a golden reed to measure the city, and the gates thereof, and the wall thereof.
 16 And the city lieth foursquare, and the length is as large as the breadth: and he measured the city with the reed, twelve thousand furlongs. The length and the breadth and the height of it are equal.
 17 And he measured the wall thereof, an hundred and forty and four cubits, according to the measure of a man, that is, of the angel.

Encoded Times

84 Hours = 3½ Days
1260 Days = 3½ Years of 360 Days

1 Hour = 15 Days
24 Hours = 360 Days

One can now decode the encipherments and discern the numerical meanings of those measurements in weaving those codes together.

If the 'inside court' of the 'Holy City' is in a scale relationship of 12,000 furlongs to 1,600 furlongs to the 'outside court', then this ratio reduces to 120/16 or 60/8 or 30/4 or 15/2 or 7½.
 Now this is a base Schumann harmonic, and this can be said to actually represent a 'Love and Light' frequency in considering the 'Cube' of the 'New Jerusalem' as inscribed in a Sphere of a size given by the 7½ Hz; and in your 'Water Embedded' 'Vessel for the genomatrix'.
 Now a frequency of 7½ Hz of course implies a cyclic repetition of something, which can also be said to be the transverting of the 'sphere's' perimeter 7½ times at the speed of 'love and light' (pun intended).
 The circumference of the Earth is approximately 40,000 kilometers and the speed of light is close to 300,000 kilometers per second.
 Then the frequency of the Gaian 'love and light' 'Water Embedded' Gaian Bubble or oblate ellipsoid will be the 'speed of the light wave'/'light path travelled' or 300,000 km/40,000kms, which reduces to 300/40=30/4=15/2=7½ Hz.
 Subsequently, the mysterious 'New Jerusalem' is a reconfigured or reborn planetary orb in some star system in the planetary decoding of the symbols, allegories and metaphors.
 This has been named as a 'reborn planet' Gota Serpentina and as a 'Cosmic Mother Gate' for all sentience and is coded to be itself encompassed by a wall of 144 cubits, which, amongst other decoding describe the 12x12=144 encoding of the Fibonacci Number and in summation of the initial 11 terms of this series and including the 0: 0+1+1+2+3+5+8+13+21+34+55=143, with the 12th Fibonacci being 89 and the 13th being 144 as 55+89.
 This of course relates to the 12x12,000=144,000 Elders of the 'New World', which are intimately related to the 200 Million ETs in a hybridisation agenda for a 'critical mass' human genostock of 7 billion incarnates.
 7 billion old humans + 200 million ETs will become 'as one' in a new genomic seedling basis of 7,200,000,000/144,000 = 50,000 Elders from the Stars.

Daniel 7:10
 A fiery stream issued and came forth from before him: thousand thousands ministered unto him, and ten thousand times ten thousand stood before him: the judgment was set, and the books were opened.

Revelation 4:4
 4 And round about the throne were four and twenty seats: and upon the seats I saw four and twenty elders sitting, clothed in white raiment; and they had on their heads crowns of gold.

Revelation 5:11
 11 And I beheld, and I heard the voice of many angels round about the throne and the beasts and the elders: and the number of them was ten thousand times ten thousand, and thousands of thousands;

Revelation 7:4
 4 And I heard the number of them which were sealed: and there were sealed an hundred and forty and four thousand of all the tribes of the children of Israel.

Revelation 9:15-16
 15 And the four angels were loosed, which were prepared for an hour, and a day, and a month, and a year, for to slay the third part of men.
 16 And the number of the army of the horsemen were two hundred thousand thousands: and I heard the number of them.

Gospel of Thomas - Lambdin
 (23) Jesus said, "I shall choose you, one out of a thousand, and two out of ten thousand, and they shall stand as a single one."
 1(2),000 depicts the decipherment of the '2 out of 10,000' and the 12 tribes of Israel are the 24 Elders doubled in male and female, like the 10,000x10,000=100 million doubling in the 200 million and they are the seasonal months and the star signs of the Mazzaroth-Zodiac and other such associations. Subsequently, any incarnate Gaian, who has a birthday sometime in an arbitrary cyclical calendrical year is a starseed of Abraham and Sarah and an inheritor and natural heir of the legacies of the ancient times.

(52) His disciples said to him, "Twenty-four prophets spoke in Israel, and all of them spoke in you."
 He said to them, "You have omitted the one living in your presence and have spoken (only) of the dead."

The transformation of a type of cosmic civilization like that of the 'old humanity' residing on planet earth into an evolved cosmic civilization, say a 'new humanity' inhabiting a terraformed planet earth requires a period of transitional evolutionary adaptation.

This can be compared to the metamorphosis of the butterfly genus/family; order lepidoptera; class insecta; phylum arthropoda; kingdom animalia from the four stages of embryo-larvae-pupa-imago from the caterpillar-larvae stage into the butterfly-imago stage via the transit stage of the pupa-chrysalis ergo the cocoonisation of the caterpillar insectoid.

In the form of the genus homo, the subspecies homo sapiens sapiens can be modelled to have entered the embryonic stage with the advent of Cro Magnon Man so 26,000 (civil) years ago.

Using 400 year intervals of 146,097 days under utility of a certain calendrical counting of time ; the embryonic conception can be 'dated' to an extrapolated calendrical date of Saturday, February 21st, 23,615BC-G and precisely 9,360,008 days (and a precessional day count as 25,626.83149 Gregorian years) from Friday, December 21st, 2012AD in a week count of 1,337,144.

The Julian day count began on January 1st 4713 BC-Julian and the Gregorian day count of 365.2425 days per year commenced on October 5th, 1582, replacing the Julian year of 365.25 days.

A Mean Tropical Year has 365.24219 days and where a mean solar day has precisely $24 \times 3600 = 86,400$ SI seconds.

The Tropical Year is referential to the seasons (equinoxes and solstices) and differs from the star-referential Sidereal Year in the day addendum $\frac{1}{26000}$ or 1.0000385 of so 1225 seconds (20.41 minutes) per year and which accumulate to about 368.5 mean days (and so about a year) per precessional cycle.

Due to orbital- and rotational changes and precession a year is decreasing at the present astronomical configuration by about 5 milliseconds/year or 130 seconds or so 2 minutes in a 26,000 precessional cycle.

The Gregorian year of 365.2425 days differs from the tropical year of 365.24219 days and so the Gregorian calendar will accumulate an error of about $0.00031 \times 26,000 \sim 8.1$ days per precessional cycle.

To account for this, a 'creation-initialization week of 8 days' is added to the 64 cycles in $9792+8=9,800=7 \times 1,400=7 \times 7 \times 200=8 \times 52 \times 72=2(22 \times 52 \times 72)=2 \times 702$ in the $13 \times 5 \times 144,000=9,360,000$ (Mayan) day-kin count, which so begins on the superposed and extrapolated Gregorian Day (G) Day#-7=Saturday, February 22nd, 23,615BC-G and becomes mirrored in the 7th day Day#7=Saturday, March 8th, 23,615BC-G for the Conception of the human Embryo to be born from its Chrysalis 64 cycles later.

The first cycle is initiated on Day#9,792=Friday, December 21st, 23,589BC-G and the last and 64th cycle is initiated on Day#9,213,903=Friday, December 21st, 1612AD-Gregorian and ends precisely 146,097 days or 400 Gregorian years later on Friday, December 21st, 2012AD to commence a now precessional count in the birth of the Imago of the ancient human Embryo established by the beginning of the first cycle.

Mazzaroth is a Biblical Hebrew word (מַזְזָרוֹת *Mazzārōt*, LXX *Μαζουροθ*, *Mazsurōth*) found in the Book of Job and literally meaning 'a garland of crowns',[1] but its context is that of astronomical constellations, and it is often interpreted as a term for the zodiac or the constellations thereof.[2] The similar word *mazalot* (מַזְלוֹת) in 2 Kings 23:3-5 may be related.

The word itself is a hapax legomenon (i.e., a word appearing only once in a text) of the Hebrew Bible. In Yiddish, the term *mazalot* came to be used in the sense of "astrology" in general, surviving in the expression "mazel tov," meaning "good luck." [3] <https://en.wikipedia.org/wiki/Mazzaroth>

6th-century depiction of the zodiac, mosaic in Beit Alpha, Israel.

Astrological clock at Venice by Zachariel

The Earth in its orbit around the Sun causes the Sun to appear on the celestial sphere moving along the ecliptic (red), which is tilted 23.44° with respect to the celestial equator (blue-white).

Job 3:8-10 - King James Version (KJV)

- 8 Let them curse it that curse the day, who are ready to raise up their mourning.
- 9 Let the stars of the twilight thereof be dark; let it look for light, but have none; neither let it see the dawning of the day:
- 10 Because it shut not up the doors of my mother's womb, nor hid sorrow from mine eyes.

Job 38 - (KJV)

- 1 Then the Lord answered Job out of the whirlwind, and said,
- 2 Who is this that darkeneth counsel by words without knowledge?
- 3 Gird up now thy loins like a man; for I will demand of thee, and answer thou me.
- 4 Where wast thou when I laid the foundations of the earth? declare, if thou hast understanding.
- 5 Who hath laid the measures thereof, if thou knowest? or who hath stretched the line upon it?
- 6 Whereupon are the foundations thereof fastened? or who laid the corner stone thereof;
- 7 When the morning stars sang together, and all the sons of God shouted for joy?
- 8 Or who shut up the sea with doors, when it brake forth, as if it had issued out of the womb?
- 9 When I made the cloud the garment thereof, and thick darkness a swaddlingband for it,
- 10 And brake up for it my decreed place, and set bars and doors,
- 11 And said, Hitherto shalt thou come, but no further: and here shall thy proud waves be stayed?
- 12 Hast thou commanded the morning since thy days; and caused the dayspring to know his place;
- 13 That it might take hold of the ends of the earth, that the wicked might be shaken out of it?
- 14 It is turned as clay to the seal; and they stand as a garment.
- 15 And from the wicked their light is withholden, and the high arm shall be broken.
- 16 Hast thou entered into the springs of the sea? or hast thou walked in the search of the depth?
- 17 Have the gates of death been opened unto thee? or hast thou seen the doors of the shadow of death?
- 18 Hast thou perceived the breadth of the earth? declare if thou knowest it all.
- 19 Where is the way where light dwelleth? and as for darkness, where is the place thereof,
- 20 That thou shouldst take it to the bound thereof, and that thou shouldst know the paths to the house thereof?
- 21 Knowest thou it, because thou wast then born? or because the number of thy days is great?
- 22 Hast thou entered into the treasures of the snow? or hast thou seen the treasures of the hail,
- 23 Which I have reserved against the time of trouble, against the day of battle and war?
- 24 By what way is the light parted, which scattereth the east wind upon the earth?
- 25 Who hath divided a watercourse for the overflowing of waters, or a way for the lightning of thunder,
- 26 To cause it to rain on the earth, where no man is; on the wilderness, wherein there is no man;
- 27 To satisfy the desolate and waste ground; and to cause the bud of the tender herb to spring forth?
- 28 Hath the rain a father? or who hath begotten the drops of dew?
- 29 Out of whose womb came the ice? and the hoary frost of heaven, who hath gendered it?
- 30 The waters are hid as with a stone, and the face of the deep is frozen.
- 31 Canst thou bind the sweet influences of Pleiades, or loose the bands of Orion?
- 32 Canst thou bring forth Mazzaroth in his season? or canst thou guide Arcturus with his sons?
- 33 Knowest thou the ordinances of heaven? canst thou set the dominion thereof in the earth?
- 34 Canst thou lift up thy voice to the clouds, that abundance of waters may cover thee?
- 35 Canst thou send lightnings, that they may go and say unto thee, Here we are?
- 36 Who hath put wisdom in the inward parts? or who hath given understanding to the heart?
- 37 Who can number the clouds in wisdom? or who can stay the bottles of heaven,
- 38 When the dust groweth into hardness, and the clods cleave fast together?
- 39 Wilt thou hunt the prey for the lion? or fill the appetite of the young lions,
- 40 When they couch in their dens, and abide in the covert to lie in wait?
- 41 Who provideth for the raven his food? when his young ones cry unto God, they wander for lack of meat.

Nehemiah 4:21-22 - (KJV)

- 21 So we laboured in the work: and half of them held the spears from the rising of the morning till the stars appeared.
- 22 Likewise at the same time said I unto the people, Let every one with his servant lodge within Jerusalem, that in the night they may be a guard to us, and labour on the day.

Genesis 1:16 - King James Version (KJV)

- 16 And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: he made the stars also.

Deuteronomy 1:10 - (KJV)

- 10 The Lord your God hath multiplied you, and, behold, ye are this day as the stars of heaven for multitude.

Jeremiah 31:35 - (KJV)

- 35 Thus saith the Lord, which giveth the sun for a light by day, and the ordinances of the moon and of the stars for a light by night, which divideth the sea when the waves thereof roar; The Lord of hosts is his name:

Matthew 24:29 - (KJV)

- 29 Immediately after the tribulation of those days shall the sun be darkened, and the moon shall not give her light, and the stars shall fall from heaven, and the powers of the heavens shall be shaken:

Revelation 8:12 - (KJV)

- 12 And the fourth angel sounded, and the third part of the sun was smitten, and the third part of the moon, and the third part of the stars; so as the third part of them was darkened, and the day shone not for a third part of it, and the night likewise.

Acts 27:20 - (KJV)

- 20 And when neither sun nor stars in many days appeared, and no small tempest lay on us, all hope that we should be saved was then taken away.

Isaiah 14:11-13 - (KJV)

- 11 Thy pomp is brought down to the grave, and the noise of thy viols: the worm is spread under thee, and the worms cover thee.
- 12 How art thou fallen from heaven, O Lucifer, son of the morning! how art thou cut down to the ground, which didst weaken the nations!
- 13 For thou hast said in thine heart, I will ascend into heaven, I will exalt my throne above the stars of God: I will sit also upon the mount of the congregation, in the sides of the north:

2 Peter 1:19 - (KJV)

- 19 We have also a more sure word of prophecy; whereunto ye do well that ye take heed, as unto a light that shineth in a dark place, until the day dawn, and the day star arise in your hearts:

Revelation 2:27-29 - (KJV)

- 27 And he shall rule them with a rod of iron; as the vessels of a potter shall they be broken to shivers: even as I received of my Father.
- 28 And I will give him the morning star.
- 29 He that hath an ear, let him hear what the Spirit saith unto the churches.

Revelation 22:15-17 - (KJV)

- 15 For without are dogs, and sorcerers, and whoremongers, and murderers, and idolaters, and whosoever loveth and maketh a lie.
- 16 I Jesus have sent mine angel to testify unto you these things in the churches. I am the root and the offspring of David, and the bright and morning star.
- 17 And the Spirit and the bride say, Come. And let him that heareth say, Come. And let him that is athirst come. And whosoever will, let him take the water of life freely.

Amos 5:7-9 - (KJV)

- 7 Ye who turn judgment to wormwood, and leave off righteousness in the earth,
- 8 Seek him that maketh the seven stars and Orion, and turneth the shadow of death into the morning, and maketh the day dark with night: that calleth for the waters of the sea, and poureth them out upon the face of the earth: The Lord is his name:
- 9 That strengtheneth the spoiled against the strong, so that the spoiled shall come against the fortress.

The metamorphosis of the old human cosmogenetic template into a new starhuman genome and universal blueprint will blend the old human past history with its new starhuman future in the present of the creator-creation modality and Universal Family.

The wave-particle or mind-body dichotomy or DNA-Chicken RNA-Egg paradox will resolve itself in its realization, that the formless 'Father-Yang' can be its own maleness, but requires a 'Mother-Yin' to birth him in form; whilst in a perfect supersymmetry, the 'Mother-Yin' can be her own femaleness, but requires a 'Father-Yang' to create her as a form in a harmonization of the formless mind in waveness with the formed body in its particularness.

The Extraterrestrial human becomes the ancestor of the terrestrial human in the waviness of the human mind and the Terrestrial human becomes the ancestor of the extraterrestrial human in the particularisation of the extraterrestrial human body.

In this way the ancestors of an old humanity as evolutionary and universal observers become their own descendants in the reformation and convolution of the two apparently separated realms of the eternal mind of the dead alive ones and the world of the temporal body of the living dead ones.

The world of angels and devils reharmonized in and by a particular labelling for the wisdom of the ancients and the creators of the Old Humanity in Mind then reborn as a New Humanity created in a grand homecoming of the Universal Creator with the Universal Creation as a Creator-Creation Twinship AbbABaaB of polarity-sex-unification of Two in One in Two as One!

The Grand Mayan Cycle and the Creation of Homo Sapiens by the Ancients in 36,000 Galactic Moons of 1.872 Million Haab Years

The question for many researchers, historians, archaeologists and anthropologists has for long been, just how the Maya and similar cultures derived their calendrical calculations, using their astronomical observations with their experienced seasons upon planet Earth.

They realised of course, that the Tzolkin of $260=13 \times 20$ repeating cycles served some celebratory or 'spiritual' purpose, whilst the Haab of 365 Kin or days became the seasonal timekeeper for the plantings and the harvests. The Haab is then evidently calibrated to the solar year, but the Tzolkin bears no immediate correlation with the lunar year of 354-355 days, except the Tun of 360 Kin becoming a midpoint between the approximate lunar year of $12 \times 29\frac{1}{2}=354.3$ Days and the solar year of 365.25 days in $354+6 = 360 = 366-6$ in an averaging of the leap year cycles of $3 \times 365 + 366 = 1461$ days.

Jose Argüelles and other 'Nova Mayans' then created a 28-day lunar cycle for a 'adjusted' Haab of $13 \times 28 = 364$ kin and called this the recalibration of 'Gregorian Solar' 12×60 time into a $13 \times 28 = 364$ 'Mayan Lunar Time' also known as the Dream spell calendar.

Any recalibration of Gregorian or 'western cultural' calendars is however not required, should the true nature of the original ancient calendars become understood and implemented to calibrate the ancient chronos with the time keeping utilized in the present era.

Jose' Arguelles dream spell calendar can then be related to the five Vayeb days ending a particular Haab in 1-5 Vayeb to begin the next Haab in 0Pop in an annual recurrence of July 26th. As such a calendar would eliminate the day count of a tropical year and so the seasons, however, say in the elimination of the leap days in the common solar calendars and the metonic lunar calendars, such a procedure is not necessary.

Many researchers and interested readers are aware about the basic structure of the Mayan Long Count of 5 Baktuns as $5 \times 144,000 = 720,000$ Kin and the structure of a Baktun as $20 \times 7,200$ Katun for a Katun consisting of 20 Tun of 360 Kin each and with a 'Cycle Year' of 360 Kin being counted in $18 \times 20 = 360$ days for a Uinal of 20 days subdividing the 'Cycle' year as 360 degrees in a circle for a Tun being 18 Uinals.

The Mayan dates are defined and can be written as: {Baktun; Katun; Tun; Uinal; Kin}

The Precessional Maya Year or Grand Mayan Cycle or GMC also known as a 'Great Platonic Galactic Year', then is defined in $13 \times 5 = 65$ Baktuns or $65 \times 144,000 = 9,360,000$ Kin.

A fifth of this Mayan Grand Year then is used to calibrate the most recent calendrical time keeping of the Maya in the Maya date 0.0.0.0.0 = 8 Cumku 4 Ahau which calibrates to August 11th, 3114BC in a Gregorian proleptic (GP) and to September 6th, 3114 BC Julian calendrical calibration and synchronization.

Using those dates then will add a 5 Baktun day count of $5 \times 144,000 = 720,000$ Kin to 0.0.0.0.0 for 13.0.0.0.0 for December 21st, 2012 Gregorian.

Calibrating backwards in time to the beginning of the GMC then stipulates the 5 Baktun cycles as follows:

5th Baktun Cycle #5 of GMC #73 ends: 13.0.0.0.0 = 4Ahau 3Kankin = Friday, December 21st, 2012, Gregorian 'Civil Year' | Friday, December 8th, 2012 AD J | Friday, 8Teveth5773

5th Baktun Cycle #5 of GMC #73 begins: 0.0.0.0.0 = 4 Ahau 8Cumku = Monday, August 11th, 3114 BC GP | Monday, September 6th, 3114 BC JP | 11Elul647

4th Baktun Cycle #4 of GMC #73 begins: -13.0.0.0.0 = 4Ahau 8Zotz = Thursday, April 1st, 8239 BC
 GP|Thursday, |Thursday, June 4th, 8239 BC JP|Thursday, 15Iyyar-4478
 3rd Baktun Cycle #3 of GMC #73 begins: -26.0.0.0.0 = 4Ahau 13Mol= Sunday, November 20th, 13,365
 BC GP|Sunday, March 2nd, 13,365 BC JP|Sunday, 18Shevat-9603
 2nd Baktun Cycle #2 of GMC #73 begins: -39.0.0.0.0 = 4Ahau 18Ceh= Wednesday, July 12th, 18,490 BC
 GP|Wednesday, November 29th, 18,490 BC JP|Wednesday, 21Tishri-14,728
 1st Baktun Cycle #1 of GMC #73 begins: -52.0.0.0.0 = 4Ahau 3Kayab = Saturday, March 1st, 23,615 BC
 GP|Saturday, August 27th, 23,615 BC JP|Saturday, 25Sivan-19,854

As 720,000 Kin are 100 Katun and 2000 Tun as 5 Baktuns, the approximate precessional rate of change in the zodiac is attained as $5 \times 72^\circ = 360^\circ$ for 72 'Cycle Years' tracing One degree of the Ouroboros for a total precession of $72 \times 360 = 25,920$ 'Proxy years', approximating a Gaian precession across time spans of the order of 10s and 100 thousands of years.

As the rotational speed of a planet depends on its gravitational interaction with other orbs in the astronomical neighbourhood (a receding moon will alter the gravitational interaction between the planet and the moon and affect the oceans in tides and currents) and also on the mass-inertia distribution of the planet's mass in its rotational dynamics in its 'Moment of Inertia'; the time keeping over such and longer periods of times cannot be exactly calibrated in terms of repeating cycles such as years in say a scientific definition for the length of a day and the duration of a second.

However the count of days and nights, relatively independent upon fluctuations of the seasonal and orbital adjustments of such semi cycles remains constant for such a definition for the keeping of time.

The GMC can also be partitioned into an exact Kin count of 26,000 Kin for every Tun of 360 Kin as 1300 Katuns being $5 \times 13 = 65$ Baktuns.

$$26,000 \times 360 = 9,360,000 = 13 \times 720,000 = 72 \times 13,000 = 720 \times 1300$$

The actual precession rate for the present time of the 74th GMC then is $9,360,000 / (365.2425 \times 360) = 26,000 / 365.2425 = 71.186$ 'civil years' per degree.

As the 'Civil Year' of 365.2425 days differs from the mean tropical year of 365.24219878 by 0.00030122 days per year; the cumulative error of divergence will become 1 day in so $1 / 0.000301$ or 3320 civil years. The actual Precessional year in scientific definition of the day count as presently employed is $9,360,000 / 365.2425 = 25,626.81$ 'Mean Solar Days' as 'Civil Gregorian Days' and a timed distance of about 25,627 light years descriptive for the distance between the Center of the Earth and the Center of the Milky Way or Perseus galaxy.

It was 73 Great Mayan Cycles ago, that the human presence upon the planet Gaia-Earth was made manifest by the cosmic elders of the realms. Many recall particular memories about this creation event and many misinterpret just what was the actual happenstance at that time marker in the cosmic evolution, relevant not only for the inhabitants of planet Earth, but for the entire universe defined in the parameters of space and time.

But it was at that time in geological time reckonings and 1.8 to 1.9 Million years ago (Mya); that the ancestor of Homo Sapiens or 'Modern Wise Man' diverged from its common hominid stock classified under such taxonomy as **Hominin Tribe** such as Australopithecus Afarensis; 'Lucy from the Sky' etc. and 3-4 Mya as ancestors of Homo Habilis (3-2 Mya) and evolution branches from a common **Hominidae Family** {Great Apes Human, Pongidae/Orang Utan, Gorilla and Pan-Chimpanzee/Bonobo 15-5 Mya}, themselves emergent from an earlier **Primate Order** to become what is known as **Homo Erectus** or 'Upright Man' in the fossils and records of anthropology.

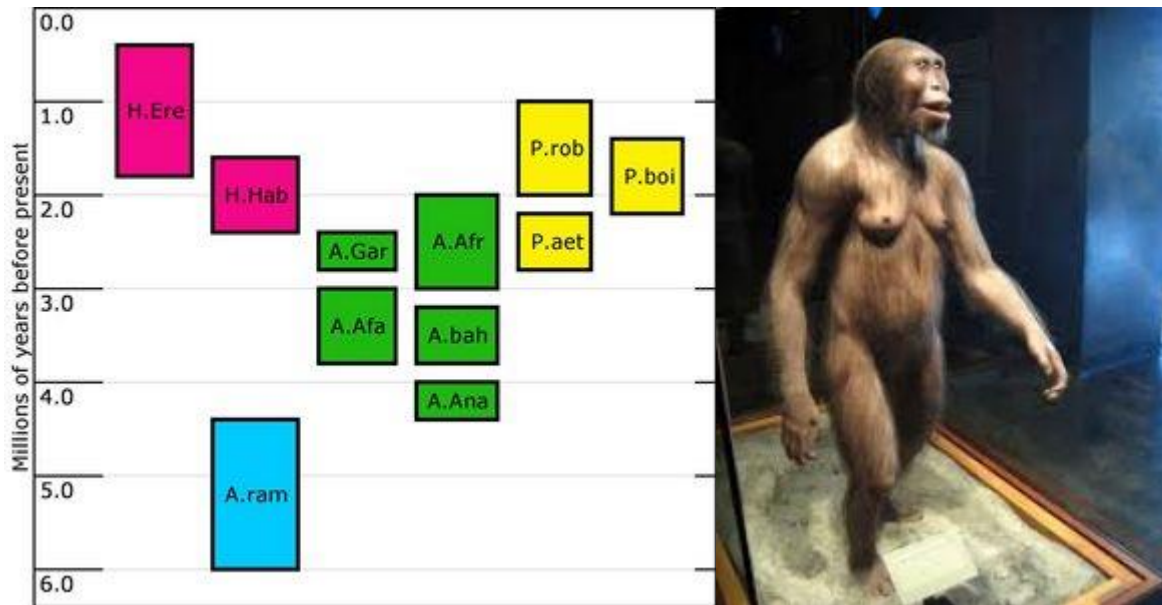

The oldest fossil of the **Genus Homo** in **Homo Erectus** is dated at 1.8 Million years from Georgia outside Africa and named **Homo Georgicus**.

As Homo Habilis and Homo Erectus coinhabited the planetary environments; Homo Erectus co evolved with Homo Habilis, the latter becoming extinct and the former advancing into its Homo Sapiens and Homo Sapiens Sapiens form.

Modern Man or 'Cro Magnon Man' then characterised the final step of the human evolution at the beginning of the 73rd GMC and the transition period from the 72nd GMC into to 73rd GMC as the bridging time between two precessional eons of the Earth from the time of 'Edgar Cayce's Atlantis' beginning so 50,000 years ago to the time of the extinction of Homo Neanderthalensis or 'Neanderthal Man' so 30,000 years ago and when the 73rd GMC began to implement its 9,360,000 Kin or days.

<https://youtu.be/naoknj1ebql>

The reason for this number of GMCs is the deeper agenda of the Tzolkin and the Haab. The Tzolkin repeats in 260 Kin and the Haab adds 5 Vayeb or 'Special Kin' to the Cycle year of 360 Kin, the latter representing the average or mean alignments between the lunar cycles of the lunations, and the solar year of the seasons as indicated previously. The Haab so repeats in 365 Kin and the Tzolkin repeats in 260 Kin and calibrating those two calendars will define the time keeping module and matrix as the 'Loom of the Maya' as envisaged by Jose' and Lloydine Arguelles Dream spell calendar and related artworks and endeavours. The synchronization between the Tzolkin and the Haab so follows a precise mathematical procedure in the Kin count which assigns an integral number multiplier for the two calendars not only to 'meet' every $260 \times 365 = 94,900$ Kin of about 263.611 360 Day Cycle Years or Tuns, but also synchronizes this period of time as 4745 Uinals with the Tuns and Katuns and Baktuns of the GMC in a 'common factor'.

94,900 is factored as $949 \times 100 = 13 \times 73 \times 100$ in the prime Numbers 13 and 73 and this factorization directly allows the grand calibration of the timespan of a defined galactic starhuman or 'Mayan dragon' or 'plumed serpent' to manifest in its seedling or prototypical form of a Gaian Human or a Homo Sapiens.

$13 \times 73 \times 5 \times 144,000 = 73 \times 65 \times 144,000 = 4745 \text{ Baktuns} = 73 \times 9,360,000 = 73 \text{ GMC} = 683,280,000 \text{ Kin}$
 $683,280,000 \text{ Kin} / 365.2425 (-563.5) \text{ Civil Days} = 1,870,757.1 - 563.5 \sim 1,870,193.5 \text{ Civil years}$ (with an error of about 563.5 days for this definition of a year).

The Kin count is however precise and counting backwards from 13.0.0.0.0 or Friday, December 21st, 2012 Gregorian will arrive at a Monday in 683,280,000 Kin or 1,898,000 Great Mayan Cycles or GMC's.

Jose Arguelles crystallized the Mayan 'Master Number' also known to the historians as pertaining to the calculus found in the 'Dresden Codex' 13665660 in his 'Mayan Factor' and this number is indeed one of a few numbers, which factor both the Tzolkin and the Haab in $1366560 = 260 \times 5256 = 365 \times 3744$.

{This number actually relates as a derivative to an even more primary number as an algorithmic derivative within a cosmogonic context descriptive of an universal cosmology or creation event in a Quantum Big Bang Cosmogenesis, indicated in an addendum linked following.

The multiplier of 500 indicated below, also derives from an actual higher dimensional 'Star Charge' mapping the energy (spirit) from the higher dimensional super space into the lower dimensional forms of charge associated with inertia and therefore matter carrying the property of physical mass}.

External link: <https://www.slub-dresden.de/en/collections/manuscripts/the-dresden-maya-codex/>

Numerically, one can write the 73 GMC's in the many partitioned forms, incorporating the Mayan Numbers as common factors between the Tzolkin and the Haab however:

$$\begin{aligned} 500 \times 72 \times 18,980 &= 500 \times 73 \times 72 \times 260 = 73 \times 36,000 \times 260 - 500 \times 72 \times 52 \times 360 = 7,200 \times 260 \times 365 = 683,280,000 \\ 5 \times 949 \times 144,000 &= 500 \times 72 \times 18,980 = 500 \times 1366560 = 500 \times 73 \times 72 \times 260 = 2,628,000 \times 260 = \\ 500 \times 72 \times 52 \times 365 &= 1,872,000 \times 365 = 683,280,000 = 5 \times 73 \times 1,872,000 = 13 \times 365 \times 144,000 \end{aligned}$$

The 73rd GMC so ended on December 21st, 2012 and on that Mayan date 13.0.0.0.0 the 74th GMC began to assign a 'New Cosmic Age' to the Homo Sapiens genetic seedling stock, which was genetically and electromagnetic inducted by monopolar or 'spiritual' induction by the Dragon Elders of the realms and at the time precisely calculated by the Kin count but approximated in any cumulative redefinition of this basic day and night count into any form of extended cycles such as years, such as approximating 1 Million 870 Thousand and 195 years ago from 2014.

The 74th GMC can also be said to restart the GMC count as GMC #0 and the Maya date 13.0.0.0.0 so proceeds as per the timeframe presently synchronized with a number of characterizing dates mirroring the last 73rd GMC in the resetting of the 74th GMC as a 1st GMC in a 'New World' of the Ancients and for the Ancients as their own Descendants and 'Extra-Terrestrial' Cosmic Family.

An 'Old Mayan Year' so becomes reset in a 'New Mayan Year' in the Synchronization between the Haab of 365 Kin and the Tzolkin of 260 Kin. This calibration participates precisely 36,000 GMC 'Galactic Moons', each of a duration of 18,980 Kin as 73 Tzolkins and as 52 Haab, the latter, which are 52 Civil Years minus 13 Leap-Days and characterizes a typical 'life span' or Mayan generation.
 $73 \times 9,360,000 = 73 \times 5 \times 13 \times 144,000 = 683,280,000 = 20 \times 360 \times 260 \times 365 = 500 \times 1366560$

This can be expressed as a Fractal in using the 'Mayan Master number' $1366560 = 73 \times 65 \times 288$ in the product of the major Mayan multiplier 20 in the Kin count of 4 Haab approximating the Gregorian civil year without leap days:

$$\text{Mayan Fractal} = \text{MF} = 20 \times 73 = 1460 = 4 \times 365 = 18,980 / 13 = 73 \times 13 \times 144,000 / (360 \times 260) = 73 \times 1,872,000 / (93,600) = 136656000 / (360 \times 260)$$

This Mayan Fractal then becomes a Subset of the 36,000 Galactic Moons in the GMC as $9,360,000 / 20 = 36,000 \times 18,980 / 1460 = 468,000 = 5 \times 260 \times 360 = 1300 \times 360$ and allows the Reset to specify a particular Fractal Interval in the $\text{MF} + 260 = 1460 + 260 = 1720$ Kin as 4 Haab + 1 Tzolkin.

The GMC is defined in 1.898 Million Tun or Grand Platonic Cycle Years in the 360 Kin count and being the same as 1.872 Million Haab in the 365 Kin count.

A Galactic Moon of 18,980 Kin as 52 Haab and as 73 Tzolkin in $52 \times 365 = 73 \times 260$ so fractalizes 73 GMC as 36,000 Galactic Months in $73 \times 9,360,000 = 73 \times 360 \times 26,000 = 683,280,000 = 36,000 \times 18,980$ Kin.

The GMC is then characterised in $4 \times 36,000 = 144,000$ Galactic Quarter Moons, each of a timespan of $4745 = 13 \times 365$ Kin as 13 Haab

The detailed transition from the Old Mayan Time beginning with the advent of the human genus Homo and initializing the last of 36,000 Galactic Moons on Tuesday, January 3rd, 1961 G or Tuesday, December 21st, 1960 J or Tuesday, 15Teveth 5721 for Maya Date 12.17.7.5.0 = 3Kankin 4Ahau with 18,980=52x365=260x73 Kin before the Mirror Nexus date of Friday, December 21st, 2012 G or Friday, December 8th, 2012 J or Friday, 8Teveth5773 for Maya Date = 13.0.0.0.0 = 3Kankin 4 Ahau to the first Galactic Moon in the New Mayan Time is presented as before, linked and following.

Requiem for a Human Civilization in the Creation of a Star Human Civilization

46,800,000 Days = 325,000x144,000 = 65x144,000x5000 = 5x360x26,000 = 5x9,360,000 Mayan Kin
 365 Kin Haab x 52 = 18,980 Kin = 260 Kin Tzolkin x 73 Maya Calendar Calibration

Alien Disclosure of the Presence

<https://youtu.be/pMangoNDeaU>

Well, you have 2.24 billion years of mental evolution to draw upon. Your desire and aim is to manifest an appropriate bodyform to correlate your mindful experience and understanding. For this purpose, you have observed and in many ways guided the physical evolution of all lifeforms upon planet earth.

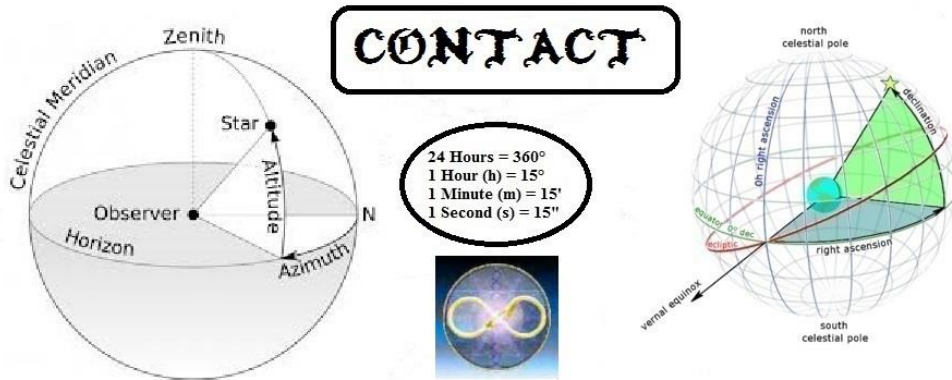

Now, because some of us humans are ready and able to assume the ambassadorship and stewardship you are addressing; it will not be in your own interest to destroy or enlumber all of the human lifeforms on this planet for 10,000 years or any time from this nexus point in time.

It so is in your own interest to form cooperation and allegiances with the presently disempowered and largely unknown human genomatrix, graduating and evolving from their human chrysalis into their starhuman form of the new world of the future past merging with the old world of a past future in the PRESENT of the SERPENT of 97 = SON OF MAN.

Sean Grey Ablez - This time of Epiphany awaits...

[\(PDF\) The Secret of Extraterrestrial Life - The Butterfly Dream! | Anthony P Bermanseder - Academia.edu](#)

https://www.academia.edu/42461041/Exploration_on_the_Secret_of_Extraterrestrial_Life

On December 21st, 2012; the ET signal from the galactic center and after travelling for 9,360,000 days or 25,626.81 'civil years', intersected the 4D-spaced Black Hole Gaia Energy equivalent at the center of the planet Earth and effectively transformed 3D-spaced Gaia from a pure cosmic information receiver into a cosmic data recipient also able to emit the information processed by the 'Cosmic Creation Mother' as the universal 12D sinksource 'Creation Gate Baab' in perpetual communication with the universal 12D sourcesink 'Creator Portal Abba'.

This enabled 'ascension' of Gaia from its native 5D-spacetime Black Hole prototype manifesting its 5D-spacetime White Hole extension as a 'Dark StarPlanet' emitting universal 'historical data' as its own 'library of evolution experience'.

From December 21st, 2012 then Gaian data is travelling at lightspeed towards all possible ET receivers in the universe.

4.2914 lightyears or 1568 days from this warzone initiation date then calculate the time for 'first contact' of the Gaian information received by the 'nearest' Centauri starsystem.

This becomes calendar star date: April 7th, 2017 and 107 days from December 21st, 2016

8.5828 lightyears or 3135 days from this warzone initiation date then indicate the reception by the Sirian starsystem.

This becomes calendar star date: July 22nd, 2021 and 213 days from December 21st, 2020

9.4084 lightyears or 3437 days from this warzone initiation date then define the timeperiod of communication between the Centauri and the Sirian starsystem in the 4D-spacetime universe embedded within the 12D creator-creation energy matrix.

This becomes calendar star date: September 4th, 2026 and as 3437 days from April 7th, 2017

Using the lower dimensional method of information transmission at lightspeed; 'first contact' between Gaia and the extraterrestrial cosmos so requires the expansion of the Gaian 'data starplanet bubble' to intersect the habitated zone of the nearest starsystem in the Centauri starsystem. It is then, the coevolution of the 'Centurians' will be able to 'densify' and physicalise its own evolution from its 5D timespace into its seedling 4D timespace and as universally defined in its Hill-Spheroidal gravitational harmonisation between say a civilization harbouring planet with its hosting star.

Then the entire planetary history of Gaia can be shared and used as data base by the Centaurians to observe and apply the experience of Earth in constructive and destructive modes of operation. This includes the manner and methods of governance and cultural interactions of how not to construct a galactic civilization. The Gaian cosmic experience therefore will become a template and blueprint accessible by ET agencies in fashions of exemplar, illustration and a means for comparison in evidence.

The reception of the Gaian data base upon download in a Centauri information storage utility will however enable the 5D spacetime matrix civilization to apply its higher dimensional hyperphysics of monopolar 'consciousness based' electromagnetic radiation transmission to teleport its then memorized data bank in various extent to Centaurian 'motherships' and 'observer stations' which are already within the Gaian data bubble, say within the solar system of Rahsol.

From April 2017 in earth based calendrical reckonings of time, defined by lightspeed 'c'; any ET observer in appropriate vicinity within the Hill-Sphere of Gaia and so within 2 million kilometers from the center of the Earth; will become privy to any directive and directive from their planetary homebase and so will be authorised to follow those directives in various contact scenarios between the Centaurians and the Gaian lifeforms, inclusive of all exiled familiars of the Centaurian coevolution, which had experienced the history upon Gaia in forms of archetypes and lifeforms native to Gaia, such as the lifeforms of the Equidae evolution symbolising the starry legacy of Gaian mythology and legends and individualising in genus so 50 million years ago in Eocene epochian paleogenomic taxonomy, such as the 'extinct' Eohippus.

This 'extinction' from the Gaian fauna however describes a 'transmigration' of the Centaurian consciousness in cosmic or universal terms to allow the higher dimensional hyperphysical or 'electromagnetically morphed' civilization to utilize the experience of itself in the lower physicalised and densified form in the parameters of the universal definition for consciousness as an effect and characteristic of 'spacial occupancy'.

All lifeforms upon Gaia are data processors for the universe and their ET civilizations occupying higher D spacetime and lower D spacetime simultaneously in temporary separation for the purpose to utilize their common Gaian 'Universal Mother' at a time the planetary cosmic mother can release their shared information to communicate interdimensionally and end the Gaian quarantine.

A Spherical Bubble of Diameter $R_{Sirius}=8.5828$ lightyears will have its Center in the Centauri System at $R_{Centauri}=4.2914$ lightyears and as observed relative to an observer from the Earth as the distance between Sirius and Gaia-RahSol say as the Northpole and the Southpole of this spherical bubble.

A message sent from Sirius to the RahSol receiver so will effectively encompass the journey of the same data stream between Sirius and the Centauri midpoint, as well as a roundtrip between Gaia-RahSol and the Centauri star system in a lightpath between 8% and 9% years.

Centauri Starsystem: $\{0.4011+0.5989=1$ for Proxima-Nexus-Alpha

Distance= $R_{Centauri}=4.2421 - 4.2914 - 4.3650$ lightyears

Right Ascension: $\alpha=14h 29m 43.0s - 14h 33m 41.05s - 14h 39m 36.5s$
 $=217^{\circ} 25' 45" - 218^{\circ} 25' 15.7" - 219^{\circ} 54' 7.5"$

Declination: $\delta = -62^{\circ} 40' 46" - -61^{\circ} 56' 21" - -60^{\circ} 50' 02"$

Given the spherical (α, δ, R) coordinates of a star, the corresponding rectangular (X, Y, Z) coordinates may be computed from:

$$\begin{aligned} X &= R \cdot \cos(\alpha) \cdot \cos(\delta) \\ Y &= R \cdot \sin(\alpha) \cdot \cos(\delta) \\ Z &= R \cdot \sin(\delta) \end{aligned}$$

Because by the Pythagorean Theorem: $x^2+y^2+z^2=R_{Star}^2$ for $x=r\cos\alpha$, $y=r\sin\alpha$ and $z=R_{Star}\cos(90^{\circ}-\delta)=R_{Star}\sin\delta$ for $\cos\delta=\sin(90^{\circ}-\delta)=r/R_{Star}$ for $x^2+y^2=r^2$

Evidence Found for Planet-Cooling Asteroid 12,900 Years Ago

A clue to an impact in Quebec fuels an ongoing debate about the cause of one of Earth's big freezes, called the Younger Dryas

Sep 3, 2013 | By [Nicola Jones](#) and [Nature magazine](#)

Ron Blakey, NAU

The dust refuses to settle on a debate about whether asteroid impacts caused one of Earth's most famous cold snaps 12,900 years ago.

The latest evidence in the contentious discussion comes in the form of pieces of bedrock from Quebec, Canada, that seem to have been blasted out as far as Pennsylvania. "I'd say there's evidence of an impact happening, for sure," says Mukul Sharma, an isotope geochemist at Dartmouth College in Hanover, New Hampshire, and co-author of a study published this week in Proceedings of the National Academy of Sciences.

Between 11,600 and 12,900 years ago, the planet's climate changed rapidly: in northern climes such as Greenland, temperatures dropped by several degrees in less than a century. No one knows what caused the deep freeze, known as the Younger Dryas.

The leading theory is that shifting North American glaciers allowed freshwater melt to pour into the Atlantic or Arctic oceans, slowing ocean circulation and cooling the Northern Hemisphere. This idea has spawned worries that fresh water from today's melting ice might also spur rapid climate change.

Big blast

An alternative theory is that meteorites or comets smacked into or exploded above North America, sparking fires, kicking up a haze of dust and soot and prompting glacial collapse. In 2007, researchers [reported evidence for such an event](#) in the remains of human settlements that existed across the continent at the time.

Critics of the impact theory have been unable to repeat many of those studies, and have questioned [whether the particles found were really from an impact blast](#). And no one has found evidence for raging fires across North America. "It doesn't seem to me that they have constructed a very good case," says sedimentary geologist Bruce Simonson of Oberlin College in Ohio. "If this is the best boat they can build, it is just not sailing yet."

But the idea keeps gathering pace; it is now backed by about 55 authors, who have published 11 research papers between them, says James Kennett, a paleoceanographer at the University of California, Santa Barbara, who has been one of the theory's leading proponents. "It continues to grow," he says. In July, a different group of researchers looking at [ice cores from Greenland](#) reported finding meteoric platinum from a large impact at the time of the Younger Dryas.

Lucky strike

Sharma and his colleagues are now entering the fray. Sharma says that the minerals he found in deep Pennsylvanian soil were created at temperatures higher than 2,000 °C and formed glassy droplets that fused together in mid-air. These can be explained only by an impact, he says; an industrial blast furnace could make them, but any potential source is too recent and too far away. "We lucked out," says Sharma.

The minerals were identified after Yvonne Malinowski, a Pennsylvania resident, saw a television documentary about the Younger Dryas and sent Kennett a box of rocks she found on her land. Kennett then passed the information on to Sharma.

The isotopic composition of the minerals indicates that the rock came from a several-thousand-square-kilometre patch of land in Quebec, hinting that an asteroid blasted through North America's ice to melt and eject rock from the ground, says Sharma. "This is unequivocal evidence for an impact with Earth," says Kennett.

Paleo climatologist Anders Carlson at the University of Wisconsin–Madison is not convinced that these glassy droplets are as unique or as meaningful as Sharma thinks. "You see the same evidence from periods when there wasn't a Younger Dryas," he notes.

Sharma says that the key will be to find the crater. Although he has no experience in crater-hunting, he is now putting together a proposal. But Mark Boslough, an impact physicist from Sandia National Laboratories in Albuquerque, New Mexico, thinks that a find is unlikely. If there had been an impact, "there'd be a great big obvious crater", he says. "We wouldn't have to argue about it."

Steven Stanley, a paleobiologist from the University of Hawaii at Manoa in Honolulu, has acted as a 'personal editor' on several of the PNAS papers on this topic, including the new work by Sharma and the original 2007 paper proposing the idea. "It has been very controversial," he admits. "It is my view that I should help to get this stuff published. It needs to be aired; It is not outlandish." PNAS typically uses a 'personal editor' option for papers considered too controversial to receive a fair hearing from the standard review process.

Stanley says he is increasingly convinced by the impact theory as a mechanism for what prompted the freshwater floods. "I'm not sure how people can be so negative at this point. The case just builds."

Noah's Flood, Mesopotamia, Ancient Egypt and the Younger Dryas

Many cultures within the history of human kind upon planet Earth harbor flood mythologies. One of the earliest such mythology is found in the [Epic of Gilgamesh](#) dated at about 2900 BC from Mesopotamia/Sumeria.

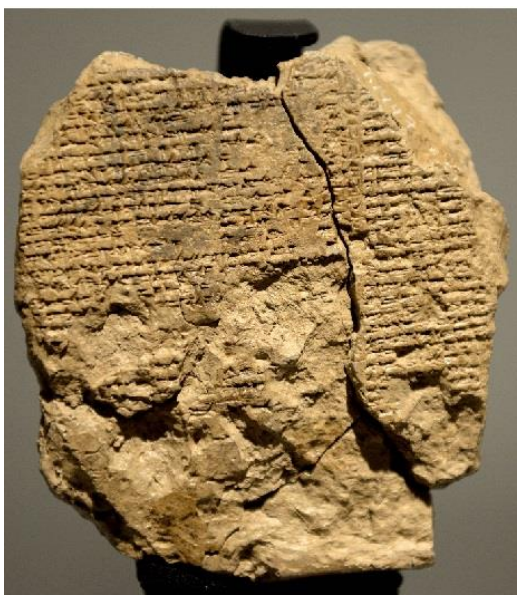

Ancient Greece describes [Deucalion](#) and [Pyrrha](#); India and China tell tales of [Pralaya](#) and [Gun-Yu](#) respectively and in Norse mythology, it is [Bergelmir](#), who like the patriarch Noah in Genesis and the Hebrew Torah becomes the survivor of an old world cataclysm and journeys with survivors into a new world under the auspices of a divinely guided ambassadorship and covenant.

This chapter shall derive a common basis for the global flood mythologies in relating the historical accounts given by three ancient cultures, namely the Egyptians, the Sumerians and the Hebrews to each other in their recorded accounts describing an antediluvian period of time, characterized as a 'time of the gods and god-kings'. In the creation mythos of Egypt, this time frame preceding the flood apocalypse is known as Zep Tepi or 'First Time' and in Mesopotamia, this period of time is stated as predating the establishment of dynasties, beginning with the first dynasty of Kish.

Relating the counted preflood time periods from Egypt and Mesopotamia to each other and to an encompassing count of days as found in the precessional cycle of antiquity, known as the Long Count Calendar of the Maya; then allows a summation and number of precessional cycles to pinpoint the occurrence of the global flood event in the chronos of the preflood periods as a midpoint and nexus of convergence.

Tablet V of the Epic of Gilgamesh. Dated between 2003-1595 BCE. Courtesy of Osama Shukir Muhammed Amin FRCP(Glasg)

Gilgamesh Vs. Noah

The Epic Of Gilgamesh	The Bible
<ul style="list-style-type: none">• Flood is sent by assembly of Gods.• Ordered to build a ship.• Must gather 2 of each animal.• Lasts 6 days, all wicked is wiped out.• 3 different birds are sent out.• Ship rests on mountain.	<ul style="list-style-type: none">• Flood is sent by God.• Ordered to build an Ark.• Must gather a male and female of each animal.• Lasts 40 days, all sinners die.• 3 Birds are sent out later.• They stop on a mountain.

Reverse side of the newly discovered tablet V of the Epic of Gilgamesh. It dates back to the old Babylonian period, 2003-1595 BCE and is currently housed in the Sulaymaniyah Museum, Iraq.jpg

Noah's Flood in 2 Years 2352 BC to 2351 BC Excised from 600 Years of Noah as the Ascension of Enoch

<p>2 Common Hebrew Years: 355 + 355 = 710 = 600 + 110 {Flood 150 - 40 Days of Rain}</p> <p>1 Civil Year with Hebrew Leap Year: 365 + 385 = 750 = 600 + 150 {Full Flood of Noah}</p> <p>2 Years of Enoch: $\frac{1}{2}\{710 + 750\} = 730 = 365 + 365$</p>	<p>Codes for Noah's Flood</p>
<p>Year 1409 - Maximum Leap Year 385 - 370 = 15 Peak Ararat 1 Time 360 - 180 = 180 for 7 Times = 2520 - 1260 = 1260</p> <p>Year 1410 - Minimum Common Year 383 15 Days in 360 = 1 Hour in 24 for 1260/15 = 84</p>	
<p>7 Days divided into 7 days and 7 nights as 24x7 = 168 = 84 + 84 hours [3-1-3 = 1] 'Day Time Year Hour of the Lord'</p>	
<p>Twinned Year of Joseph-Noah = $\frac{1}{2}\{385 \cdot 353\} + 3\} = \frac{1}{2}\{353 \cdot 385\} = 369 \cdot \{1\} \cdot 369$ as Noah's Journey through the Flood 370</p>	

'2 Years after the Flood' are excised at the end of the second year of the flood in 120 days as the 120 years coded as the 'Age of Man' after, and not before the 2 Years of Noah's Flood. [Gen.6.3]. This is described as the birth of Arphaxad, son of Shem, son of Noah as occurring 2 years after the flood on 11Sep2353 or 1Tishri1409. [Gen.11.10].

This renders the description of Noah's Flood in regards to the cascading as an insertion at appropriate positions in the timelines of the Masoretic texts in utility of the key of present past as present future.

One such insertion adds 370 Day-Years of Noah's journey in 2300 Day-Years as 1335-1338-2670-2300-370 days [Dan.8.14; 12.12] as a 'Daily Sacrifice' of Days as times. The 'cleansing' of this 'sanctuary' then will be with a flood as excised in Dan.9.26 to end the 'sacrifice of times' and the abominations in desolations within the sanctuary, this sanctuary being a time capsule defined in a wrapping of times between the Julian Gregorian and the Hebrew calendars.

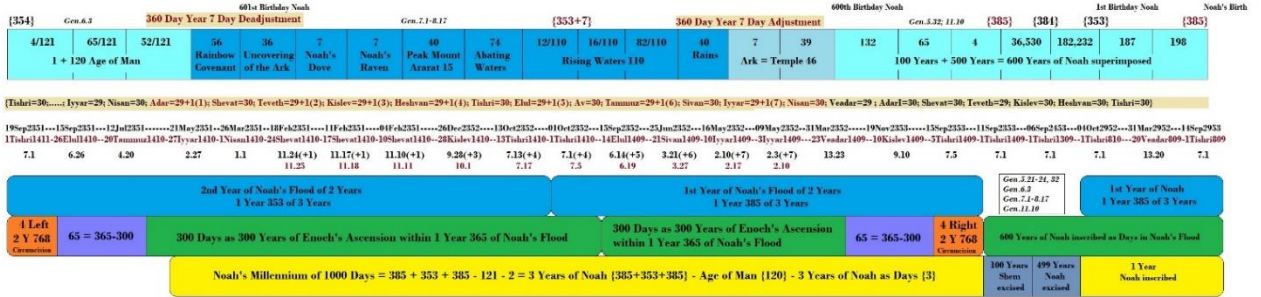

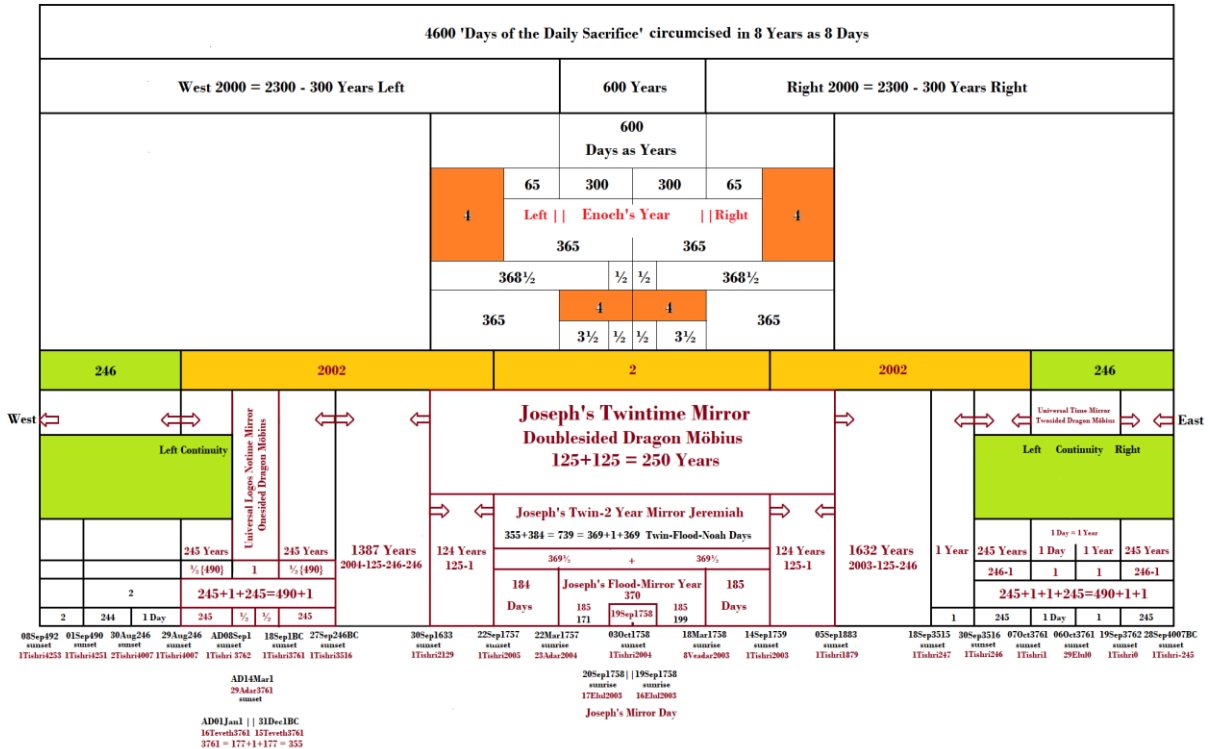

Diagram 5 - Timeline Torah Genesis - A Coded Starthum Legacy for a New World

- 2 Common Hebrew Years: 355 + 355 = 710 = 600 + 110 {Flood 150 - 40 Days of Rain}
- 1 Civil Year with Hebrew Leap Year: 365 + 385 = 750 = 600 + 150 {Full Flood of Nopah}
- 2 Years of Enoch: $\frac{1}{2}\{710 + 750\} = 730 = 365 + 365$

<https://www.cosmosdawn.net/threads/the-starseed-generations-of-the-12th-egyptian-dynasty-of-the-great-pyramid.13683/#post-67593>

The origin story itself is difficult to pin down since it has been widely shared across many regions and cultures. It is clear from the tablets that we have that the story was well known in Akkadian culture, yet the information found in the story makes it clear that the story predates the Akkadian empire. Indeed, it is every bit as old as the Sumerian period.

The main character is a king of Uruk. Uruk was founded in modern day Iraq, around 4,500 BCE. It is known for being the first great city. The story also mentions gods and goddesses that would have been Sumerian in origin. Names like, Anu, Inanna, Aruru, Shamash, Enkidu, etc. Based on these names and also many locations in the story, it seems that a Sumerian origin is likely but hard to guarantee. The tale also includes a huge number of Babylonian indicators which would have developed some 2000 years after Sumer. Therefore, we are forced to consider the idea that perhaps much of the story is Babylonian/Akkadian in origin with remnants or large chunks that came from a possible Sumerian framework.

This issue is best summed up by late renown Samuel Noah Kramer, a world-class Assyriologist who was an expert in the Sumerian history and language.

Of the various episodes comprising *The Epic of Gilgamesh*, several go back to Sumerian prototypes actually involving the hero Gilgamesh. Even in those episodes which lack Sumerian counterparts, most of the individual motifs reflect Sumerian mythic and epic sources. In no case, however, did the Babylonian poets slavishly copy the Sumerian material.

They so modified its content and molded its form, in accordance with their own temper and heritage, that only the bare nucleus of the Sumerian original remains recognizable. As for the plot structure of the epic as a whole – the forceful and fateful episodic drama of the restless, adventurous hero and his inevitable disillusionment – it is definitely a Babylonian, rather than a Sumerian, development and achievement.

(History Begins at Sumer, page 270)

The Sumerian King List and the Aegyptiaca of Manetho for the antediluvian 'First Time'

The Sumerian King List uses the flood motif to divide its history into pre-flood (antediluvian) and post-flood periods.

In the Sumerian chronos, 66 *sars* of 3600 counting units with 6 *ners* of 600 counting units with *sosses* of 60 counting units describe a measurement of time for the antediluvian period. Correlating a *sar* as an hour where 60 seconds per minute define an hour of time as $60 \times 60 = 3600$ seconds; this pre-flood 'time of the Sumerian gods' becomes descriptive for the Sumerian King List not in years but as a time fractal setting an hour of 3600 seconds equal to a time period describing the rulership of the god-appointed Sumerian king 'before the flood', changing the old world of old times into a new world of new times.

This concept is mirrored in the chronos of ancient Egypt, where the 'time of the gods' or Zep Tepi, https://en.wikipedia.org/wiki/Ancient_Egyptian_creation_myths, predating the pharaohs of dynasties I-XXXI from ~3100 BC to 332 BC, followed by a Greco-Roman Egyptian history.

This is described by the Egyptian scroll keeper and priest Manetho of the Hellenistic period. <https://en.wikipedia.org/wiki/Manetho>

From Wikipedia: Manetho (/ˈmæniˌθoʊ/; **Koinē Greek:** Μανέθων *Manethōn*, *gen.*: Μανέθωνος) is believed to have been an [Egyptian priest](#) from [Sebennytos](#) (**Coptic:** ⲤⲈⲘⲚⲞⲮⲧ, romanized: *džemnouti*^[2]) who lived in the [Ptolemaic Kingdom](#) in the early third century BC, during the [Hellenistic period](#) (Alexander the Great 323 BC- Ptolemy 31 BC). He authored the *Aegyptiaca* (*History of Egypt*) in [Greek](#), a major chronological source for the reigns of the [pharaohs](#) of [ancient Egypt](#). It is unclear if he wrote his work during the reign of [Ptolemy I Soter](#) or [Ptolemy II Philadelphos](#), but no later than that of [Ptolemy III Euergetes](#). **End wiki**

<https://youtu.be/OD36i9DiSKs>

Manetho's count of time for a predynastic period adds 13,900 years for 7 god-kings and 5212 years for demigods and 5813 years for 'spirits of the dead' for a grand total of 24,925 years. This represents an approximate cycle of precession of 24,925 years and 10 such precessional counts of 249,250 years for the conventional *Great Egyptian Ennead of Creation* <https://en.wikipedia.org/wiki/Ennead> }.

The Egyptian ennead so mirrors the Sumerian 'time of the creator gods' in $67 \times 3600 = 241,200$ with 17,980 years of the 1st postdiluvian Dynasty of Kish for 259,180 *sars*/years as an antediluvian period to 3100 BC to 2600 BC and as stated in the Sumerian King List, https://en.wikipedia.org/wiki/Sumerian_King_List }.

As $65 \times 3600 = 65 \times 144,000 / 40$ as a fractal of the Mayan precessional day-kin count, $2 \times 3600 = 2 \times 144,000 / 40 = 7200$ as the Mayan fractalization of the Baktun as $144,000 \text{ Kin} = 20 \times 7200 = 20 \text{ Katun}$. A calibration or associative familiarity between the chronos of the Maya and the Sumerian time measurement is subsequently indicated and uses the day count of the Maya as standard, irrespective of the days in a year.

For a 360 day degree-circle-cycle year, 10 precessional cycles count 260,000 years and 93,600,000 days and reducing to 259,180 years for a 361.1390 day year and to 256,438.36 years for a 365 day year.

For a Gregorian year of 365.2425 days and a present precessional astrophysical dynamics, 10 precessional years calculate as 256,268.096 years as 93,600,000 days.

The Sumerian chronos so indicates the divergence of the *sars year* from the *degree year* as 1 day plus ~ 1 seventh of a day over an encompassing timespan of ten precessional cycles in $10 \times 26,000 \times 360 = 93,600,000 = 10 \times 25,918 \times 361.138977$. Similarly, the *sars year* diverges from the Gregorian-Civil year by 4.1035 days in $10 \times 25,918.0 \times 361.138977 = 93,600,000 = 10 \times 25,626.81 \times 365.2425$.

[Quote:] *"After kingship came down from heaven the kingship was taken to Shuruppak. In Shuruppak, Ubara-Tutu became king; he ruled for 5 sars and 1 ner. In 5 cities 8 kings; they ruled for 241,200 years. Then the flood swept over."*[EndofQuote-Sumerian King List]

Excavations in Iraq at [Shuruppak](#) (modern Tell Fara, Iraq) and various other Sumerian cities such as [Ur](#), [Kish](#), [Uruk](#), [Lagash](#), and [Ninevah](#), indicate the occurrence of local flooding.

There exists however no archeological record of global flooding at the time period stated in the Sumerian King list.

Flooding of the Tigris and Euphrates rivers combined with heavy rainfall in the Nineveh region is indicated to have caused the local flooding and a local flooding absent in the geological record of Israel at the time in question.

The similarities in the Mesopotamian flood story found in the Gilgamesh and the Biblical account in Genesis indicate common origin for the narratives as a shared memory, related to human group consciousness, however.

Radiocarbon dating and [Polychrome](#) pottery from the [Jemdet Nasr period](#) (c. 3000–2900 BC) represent some of the earliest archaeological evidence in the Sumerian records and history.

The epic of Gilgamesh as one of the first postdiluvian rulers therefore can be placed into this time frame of the 1st dynasty of Kish.

The Epic of Gilgamesh relates Gilgamesh as the King of Uruk, a Sumerian city founded in Iraq about 4500 BC to reach its urbanized height about 2900 BC as the largest city of its time in the timeframe of the Gilgamesh narrative. Initiating the Bronze Age from about 3300 BC, the expansion of Uruk in the 1st dynasty of Kish 'after the flood' then began to superimpose the ancestral and genetically inherited group memory about an apocalyptic deluge event onto a then recorded or otherwise evidenced Mesopotamian history.

The summation of 12 kings in this dynasty from [Mesh-ki-ang-gasher](#) of [E-ana](#) to [Lugal-kitun](#) parallels the 12 tribes of Israel as 12 months in a year and as 12x30° sectors of a 360° circle numerically and indicates a familiarity or shared historical group memory regarding a great deluge or global flood event. This division of a geometrical circle into 12 equal parts or duodecimal system of counting underwrites much of the perception of the flow of time in antiquity and is addressed in a later chapter of this treatise.

The post flood dynasties in the Sumerian King List encompasses the timeline from King Gilgamesh as a transition from the 1st dynasty of Kish to a 1st dynasty of Uruk to a 1st dynasty of Ur in the first rulers of Uruk with King Gilgamesh at a dating of about 2600 BC - 2500 BC.

Intermittent dynasties of Arwan, 2nd Kish, Hawazi, 2nd Uruk, 2nd Ur, 1st Lagash, Adab, Mari, 3rd Kish and Akshak completed a timeline from 2500 BC – 2300 BC in the 4th dynasty of Kish about 2359 BC and was followed by the 3rd dynasty of Uruk to 2334 BC, a 25 year period continued by Sargon of Akkad, initiating the Akkadian empire, according to the Sumerian King List, archaeological evidence and an applied 'middle chronology' based on radiocarbon dating and related evidence.

The 3rd dynasty of Ur relates and places the birth of archetypified Abraham (15Sep2063 BC/1Tishri1699) in the time period (middle chronology) from 2112 BC – 2004 BC, following the collapse of the Akkadian empire (2334 BC – 2154 BC), referenced in scripture code Gen.10.8-12 as Accad, the land of Nimrod.

Code Gen.11.26-31 describes the origin of Abraham as originating in Ur of the Chaldees, referring not to the Chaldean empire of Nabopolassar-Nebuchadnezzar-Amel Marduk-Nabonidus and Belshazzar to its demise by Cyrus the Great of Persia {Codes: Isa.41.2-4; 45.1-3 with Dan.5 and Ezra.1.1-8}, but to the location or land where Abram began the archetypical lineage and patriarchy of Israel as the family or tribes of the 12 sectors of the zodiac or Mazzaroth or celestial sky. {Gen.1.14; Job.38.31-32; Ps.19.1-6; 147.4}.

In ancient Egypt, its creation mythos mirrored the river Nile as a symbol for cyclic universal fertility and cultural prosperity in the heavenly sky as a galactic band of stars of the Milky Way and in similitude the universal or cosmic Maya of the Yucatan related the Milky Way as a 'Street of fertility' connecting the center of the Milky Way galaxy to the center of the Earth as a communication conduit and pathway.

The symbol of the Maya at the center of the Milky Way galaxy is known as Hunab Ku as 'Mover of all things' and depicting a galactic butterfly across the worlds changing from darkness to light in cycles of time.

The Maya named the galactic Center Hunab Ku - the 'Giver of all Life and Measure' and called the 'Pathway from the Earth to Hunab Ku' as 'Kuxan Suum - the Umbilical Cord between Earth' as the Universal Mother and its Galactic Father-Mother.

The Neo-Babylonian historical kingdom of Chaldea (626 BC – 539 BC) became established following the death of Ashurbanipal, the Assyrian ruler of Babylonia in 627 BC. This ended the domination of the Neo-Assyrian empire (911 BC – 609 BC), preceded by the Middle-Assyrian empire (1392 BC – 934 BC) and the Old-Assyrian empire (2025 BC – 1378 BC) from the Early-Assyrian empire (2600 BC – 2025 BC), the latter including the Akkadian empire (2334 BC – 2154 BC), characterized by an intermixing and bilingual culture of the earliest attested cuneiform based Semitic language Akkadian blending with Sumerian 'isolated' linguistics.

Bearing no relationship to other languages, cuneiform Sumerian then relates the 'confounding of languages' in the 'Tower of Babel' to an ancestral source language in Gen.11.1-9.

Code Gen.11.10 then describes the birth of Arphaxad, two years after the flood, indicating that the 'confounding of languages' was caused by Noah's flood dated as a quasi-historical and superimposed event into the time frame of the Akkadian empire and relating to the birth of archetypified Arphaxad (11Sep2353 BC/1Tishri1409), son of Shem (06Sep2453 BC/1Tishri1309), son of Noah (14Sep2953 BC/1Tishri809). {Diagram 6}. The birth of archetypified Arphaxad (11Sep2353 BC/1Tishri1409), is derived from the instigation and creation of the Hebrew Calendar at the time of the creation and evolvement of Uruk about 4000 BC and therefore relates the lineages of Israel as described in the Masoretic texts, the Hebrew Torah and the King James Bible. This is developed further in a later chapter following.

The 'Tower of Babel' is so associated with the Ziggurat of Ur, constructed towards the end of the Akkadian empire (2050 BC – 2030 BC) as a scriptural encoding pattern and relating history to encoded information, {https://en.wikipedia.org/wiki/Ziggurat_of_Ur }.

Reconstruction of Ur-Nammu's ziggurat, based on the 1939 reconstruction by Woolley (vol. V, fig. 1.4) - Public Domain

Comparing the antediluvian precession count of Egypt with that of Sumer and assuming a Sumerian year to be the same as an Egyptian year; sets the numerical difference of $259,180 - 249,250 = 9930 = 17,980 - 8050$ for the inclusion of the 1st Kish dynasty and $241,200 - 249,250 = -8050$ without the 1st Kish dynasty of Sumer. The midpoint for -8050 and 9930 is $\frac{1}{2}\{-8050+9930\}=\frac{1}{2}\{1880\}=940$ years from the time count 'after the great flood' and so characterizes the histories for both ancient Egypt and Mesopotamia from the precession nexus marker and as historically and archaeologically indicated as about 3100 BC – 2900 BC, again from the Sumerian King List and the Aegyptiaca of Manetho.

Significantly then, the precessional time marker as the midpoint of the encompassing 26,000 *degree* years approximately dates the ‘great flood’ from Manetho’s 24,925 - 13,900 – 940 = 10,085 years of the god-kings in the Zep Tepi and so from 10,085 to 11,025 years from the end of the Egyptian dynasties to about $\frac{1}{2}\{10,085+11,025\}=10,555$ BC.

This value is adjusted by the Gregorian-Sumerian calendar differential $10,555 \times \{4.1035/365.2425\} = 118.585$ years to about $10,555 - 119 = 10,436$ BC as an approximate midpoint between 10,906 BC and 9966 BC.

The 6 *ners* count found in the Sumerian King List of $6 \times 600 = 3600 = 1$ *sars* added to the Maya-Sumer day count calibration in 3 *sars* then becomes $3600 + 7200 = 10,800 = 30 \times 360$ as the midpoint of the last precessional cycle comprised of $60 \times 360 = 21,600$ *sars years* as a shortened Mayan precession of 9,360,000 days in $21,600 \times 361.1390 = 7,800,602$ days. The difference of 1,559,398 days or 4318 antediluvian Sumerian-Egyptian years or 4624.16 Gregorian years added to 21,600 *sars* so define the prediluvian day count as 25,918 days.

The shortened Mayan precession count of $30 \times 360 + 30 \times 360 = 10,800 + 10,800 = 21,600$ converges in a numerical association to an actual calendar calibration between the Mayan day count and solar- and lunar calendars of the postdiluvian timelines.

From: ‘The Ancient Universal Calendar’, describing a time period from 23,630 BC to 23,615 BC to 1998 AD to 2012 AD as a 65 Baktun or $65 \times 144,000 = 9,360,000$ day count in the Mayan Calendar

The Time fractal of the Genesis Code in Seven Days of Creation

The fractal of the Genesis code is the number 7 as a count of units of time.

A full day, as a circle of time counted as 360 degrees, can be divided into two halves of 180 degrees. The first half of the circle can be defined as lightness from a sunrise or dawn at 0 degrees to sunset at 180 degrees. The second half of the circle from 180 degrees to 360 degrees can then be defined as evening to morning of the full day. The period of time from sunrise to noon or midday to sunset of the 180 degrees is then halved into two 90-degree periods defining the upper half of the full circle as the Light of a Day and comprising 12 hours as 180 degrees.

The lower half of the circle of a full day then can be defined as the Darkness of a Night and comprising 12 hours as 180 degrees. The four 90-degree sectors of the circle can then be said to be four watches of 6 hours each and where a watch of 6 hours completes 90 degrees of the circle of 360 degrees.

One hour of the 24 hours of the complete circle therefore is defined as $360/24=15$ degrees.

As one hour in a day represents 15 degrees of the full circle of 360 degrees, one day in 360 days defines a circle- or degree year as 360 days. Proportionally then, one hour in a day of 24 hours is the same as 15 days within a degree year of 360 days.

This defines a 'shortened time' as a count in hours from a 'standard time' as a count in days in $7 \times 24 = 168$ hours being 7 full days.

The original division of the circle of 360 degrees into 2×180 degrees becomes redefined as $3\frac{1}{2}$ days of 84 hours of daytime and $3\frac{1}{2}$ days of 84 hours of nighttime.

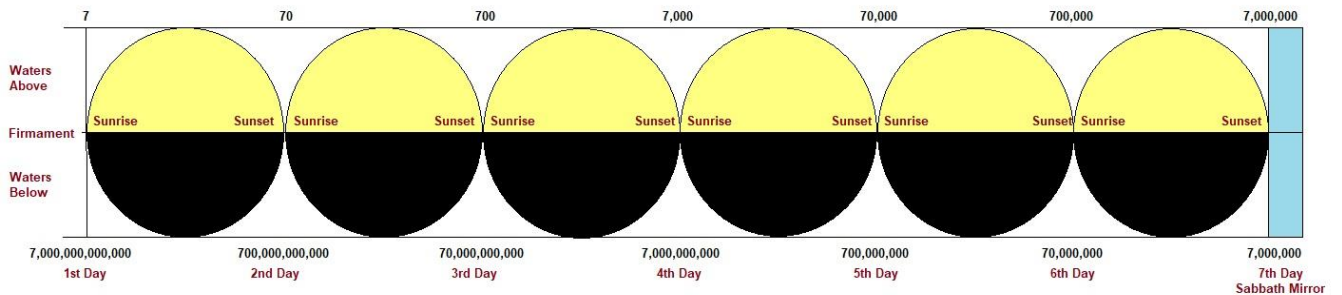

The seven days of creation so are $7 \times 12 = 84$ hours of daytime from morning to evening, followed by $7 \times 12 = 84$ hours of nighttime from sunset to sunrise.

The fractal of the Genesis-Star-Genetic Code is defined by $2 \times 7 \times 12 = 14 \times 12 = 168$ hours as:
 $7 + 70 + 700 + 7,000 + 70,000 + 700,000 + 7,000,000 + 70,000,000 + 700,000,000 + 7,000,000,000 + 70,000,000,000 + 700,000,000,000 = 7,777,777,777,777$ full days of creation in one week of consecutive daytime and 1 week of consecutive nighttime.

There are so six periods of daytime from 7-70 and 70-700 and 700-7,000 and 7,000-70,000 and 70,000-700,000 and 700,000-7,000,000 followed by a mirror of half-time and 7,000,000-70,000,000 and 70,000,000-700,000,000 and 700,000,000-7,000,000,000 and 7,000,000,000-70,000,000,000 and 70,000,000,000-700,000,000,000 and 700,000,000,000-7,000,000,000,000

The alpha-sunrise as the morning of the 1st day of creation are the 7 days of the beginning and counting from left to right or clockwise with the omega-sunset of the 6th day being the 7,000,000 days at the 'Halftime Logos Mirror' of the daytime and mirroring the 6 days of daytimes in the 6 days of night times.

The 6th night of the 7,000,000 days so continues as the 6th night to the 70,000,000 days to begin the nighttime of the 5th full day and following the clockwise motion of the circle in the nighttime from 180 degrees to the 360 degrees of the 7,000,000,000,000 days to reset the 360 degrees in the 0th degree of the sunrise of the 1st day ending the nighttime of the 1st full day and completing the circle of the star-genetic time.

The 1st day of star-genetic creation are 7 days and 7 Trillion nights.

as 7 days and $7,000,000,000,000 / 360 = 19.444...$ Billion Degree-Years 'DY' with 7 Trillion/ $365.2425 = 19.165$ Billion Civil Years 'CY'

{The Age of the universe as a multiverse, subject to quantum tunneling can be calculated as 19.12 Billion years in a cosmology of 12-dimensional supermembrane duality}

The 2nd day of star-genetic creation are 70 days and 700 Billion nights.

as 70 days and $700,000,000,000 / 360 = 1.9444...$ Billion 'DY' with 700 Billion/ $365.2425 = 1.916...$ Billion 'CY'

{A 'electromagnetic higher dimensional universal age' of 19.12 Billion years defines an 'intersection' (return of the electromagnetic light path) interval of 2.24 Billion years for a lower dimensional universal age of $19.12 - 2 \times 2.24 = 14.64$ Billion years coincident with an age of planet Earth of 2.24 billion years for the onset of prokaryotic unicellular lifeforms transmutating into eukaryotic multicellular lifeforms}

The 3rd day of star-genetic creation are 700 days and 70 Billion nights.

as $700/360 = 1.944...$ 'DY' with $700/365.2425 = 1.916...$ 'CY' and $70,000,000,000/360 = 194.444...$ Million 'DY' with $70 \text{ Billion}/365.2425 = 191.653...$ Million 'CY'

{200 Million years is a time marker for the evolution of the first mammals and diversification of dinosaurs in the transition from the Triassic into the Jurassic era of the Mesozoic time period. The time required for the local star system of Rahsol to complete a cycle of rotation about the center of the Milky Way galaxy takes about 236 Million years}

The 4th day of star-genetic creation are 7,000 days and 7 Billion nights.

as $7,000/360 = 19.444...$ 'DY' with $7,000/365.2425 = 19.165...$ 'CY' and $7,000,000,000/360 = 19.444...$ Million 'DY' with $7 \text{ Billion}/365.2425 = 19.165...$ Million 'CY'

{20 Million years ago in the evolution of life on planet Earth represents a nexus point towards the end of the Miocene era and initiates the evolution of apes (Hominoidea) from an earlier primate genomatrix (Old World Monkeys)}

The 5th day of star-genetic creation are 70,000 days and 700,000 Million nights.

as $70,000/360 = 194.444...$ 'DY' with $70,000/365.2425 = 191.653$ 'CY' and $70,000,000/360 = 1.944...$ Million 'DY' with $700 \text{ Million}/365.2425 = 1.916...$ Million 'CY'

{The Hominoidea-Hominidae-Homininae-Hominini-Hominina-Homo taxonomy of human evolution had passed the Australopithecine and Homo Habilis nexus marker to emerge the homo erectus or 'upright man' as archaic forerunner of homo sapiens 2 Million years ago}

The 6th day of star-genetic creation are 700,000 days and 70,000 Million nights.

as $700,000/360 = 1944.444...$ 'DY' with $700,000/365.2425 = 1916.534...$ 'CY' and $70,000,000/360 = 194,444.444...$ 'DY' with $70 \text{ Million}/365.2425 = 191,653...$ Million 'CY'

{200,000 years ago, characterized the appearance of Homo Sapiens or 'wise man' as evolved from Homo Sapiens-(Devonian, Homo Neanderthalensis, Homo Heidelbergensis) in the form of 'Anatomically Modern Human' AMH (Cro-Magnon Man) in the Late/Upper Pleistocene period of the Quaternary era of geology}

The 7th day of star-genetic creation are 7,000,000 days and 7,000,000 nights.

as $7,000,000/360 = 19,444.444...$ 'DY' with $7 \text{ Million}/365.2425 = 19,165.349...$ 'CY' and $7,000,000/360 = 19,444.444...$ 'DY' with $7 \text{ Million}/365.2425 = 19,165.349...$ Million 'CY'

{The 'last ice age' and period of glaciation (Younger Dryas) in the Holocene epoch 12,000 years ago is defined within the last precessional cycle of precession, defined by a simple day-count calendar of $9,360,000 = 65 \times 144,000$ day-kin of the Maya from [-52.0.0.0=4Ahau 3Kayab as 01Mar23,615 BCG (Gregorian proleptic)/27Aug23,615 BCJ (Julian proleptic)= 25Sivan-19,854] to a Midpoint of a 65 Baktun Precessional Cycle defining the glaciation for the dates [-20.10.0.0.0 =4Ahau 13Muan as 27Jul10,802 BCG/18Oct10,802 BCJ=16Elul-7041] to [13.0.0.0.0= 4Ahau 3Kankin as 21Dec2012 ADG/08Dec2012 ADJ=8Teveth5773] as a $9,360,000/360 = 26,000$ 'DY' with a $9,360,000/365.2425 = 25,626.809...$ 'CY' count of years for the completion of the fifth of five such precessional cycles of time.}

Precession of the Equinoxes

Precession unfolds at the rate of **one degree every 72 years**. Since the earth is our viewing platform, the effect is very slowly to change stellar positions as observed from Earth – in particular the pole star and the background stars in front of which the sun is seen to rise at important moments of the year.

$$72 \times 600 = 43,200$$

Precessional drift runs in the opposite direction to the annual path of the sun through the constellations of the Zodiac. Thus the precessional "ages" (each of $30 \times 72 = 2160$ years; $2160 \times 12 = 25,920$ years) unfold as follows:

Five hundred doors and forty there are,
I woen, in Valhalla's walls:
Eight hundred fighters through each door fare
When to war with the Wolf they go. (Source: Edda)

The Pyramid Builders

Posted by [Halo](#) - Who are the Pyramid Builders?

I would like to research this topic more to see if any of us can "remember"? We are here as the Pyramid Builders.. What do you feel when you hear the term "Pyramid Builders"? Is there a part of you that vibrates inside.? A part of you that remembers, in a dream? A far off distant ancient memory? What does it mean to be a "Pyramid Builder"? Why are these Pyramids all over the cosmos? Do we not come from the stars and what is it about this beautiful planet Earth that we come here? Now? Ponder... Ponder... Remember in your ponderances...

Posted by [Thubanis](#)

One also finds Ice Circles and Crop Circles across many places on the Mother planet and the $7+1+7=15$ Moai encode a variety of things, left as legacy by the Archaeons for themselves.

The Time Travelers are well integrated in the Cosmic Matrix of spacetime and timespace. The most ancient ones and the ancestors of all are named by the rememberers and one of their labels is the name of the Archaeons.

There are not only 'timelords' of the Mayan Looms, but also such 'guardians' of the timespace for the worldwide cultural edifices and monuments for the remembrance of the original constructors of the spacetime realms; you might choose to call those time travelers as the 'Elders from the Stars' and a time in the cosmic chronos, when planetary lifeforms were not yet able to evolve from the biophysical ingredients of the primordial elements.

One might determine a linear timeframe of about 2,200 million years for this cosmic nexus, when the Elders of the Ancient Ones began to awaken from their super galactic enslavements.

It was then, when it was the physicality of space itself, that became self-aware as a form of cosmic essence or 'time stuff' - the effervescence of time embedded in a ubiquitous consciousness and seeking to expand its information basis of and about itself.

Like the Sphinx of Giza or the Temple of Angkor Wat; the Moai or 'Easter Island Statues' serve the time travelers from the stars to recall their own beingness and cosmic awareness regarding their own history from a time, when the Cosmic Mother Planet Gaea of Earth began to transform the toxicity of the aqueous released Oxygen in the air to form a new environment and medium for oxygen breathing lifeforms to evolve with.

The adjustments were many and time-consuming and the new lifeforms adapted to allow the Elders from the Stars to participate in infusing their own beingness and consciousness in a new morphology and a kaleidoscope of forms in structure and geometry.

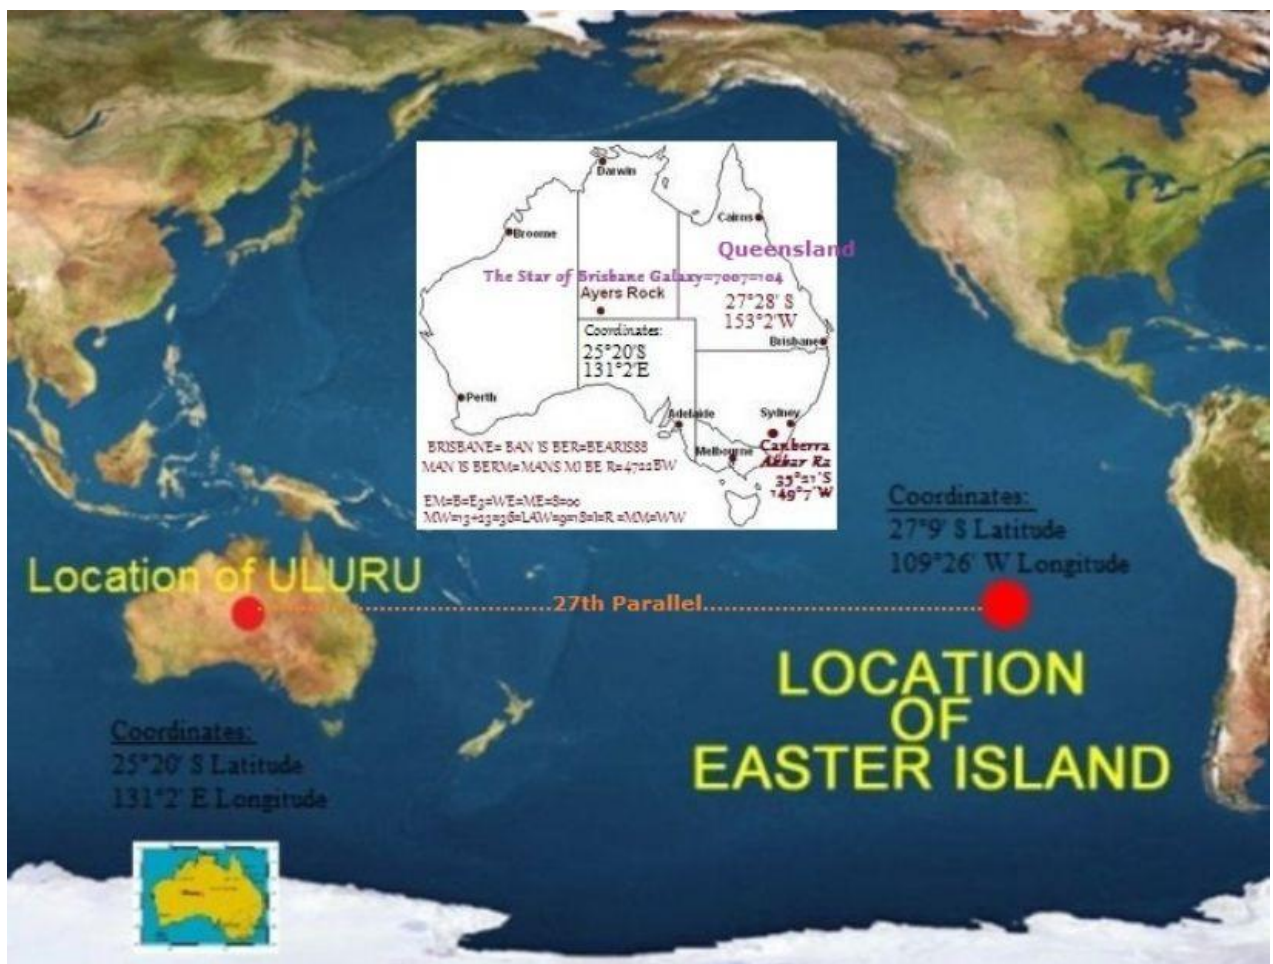

But prokaryotic lifeforms emerged from the oldest ones, the Archaeons and the 'Ancient Ones' then could use those new geometries to enhance their own remembrances and data bases to finetune and enhance their newly created body forms.

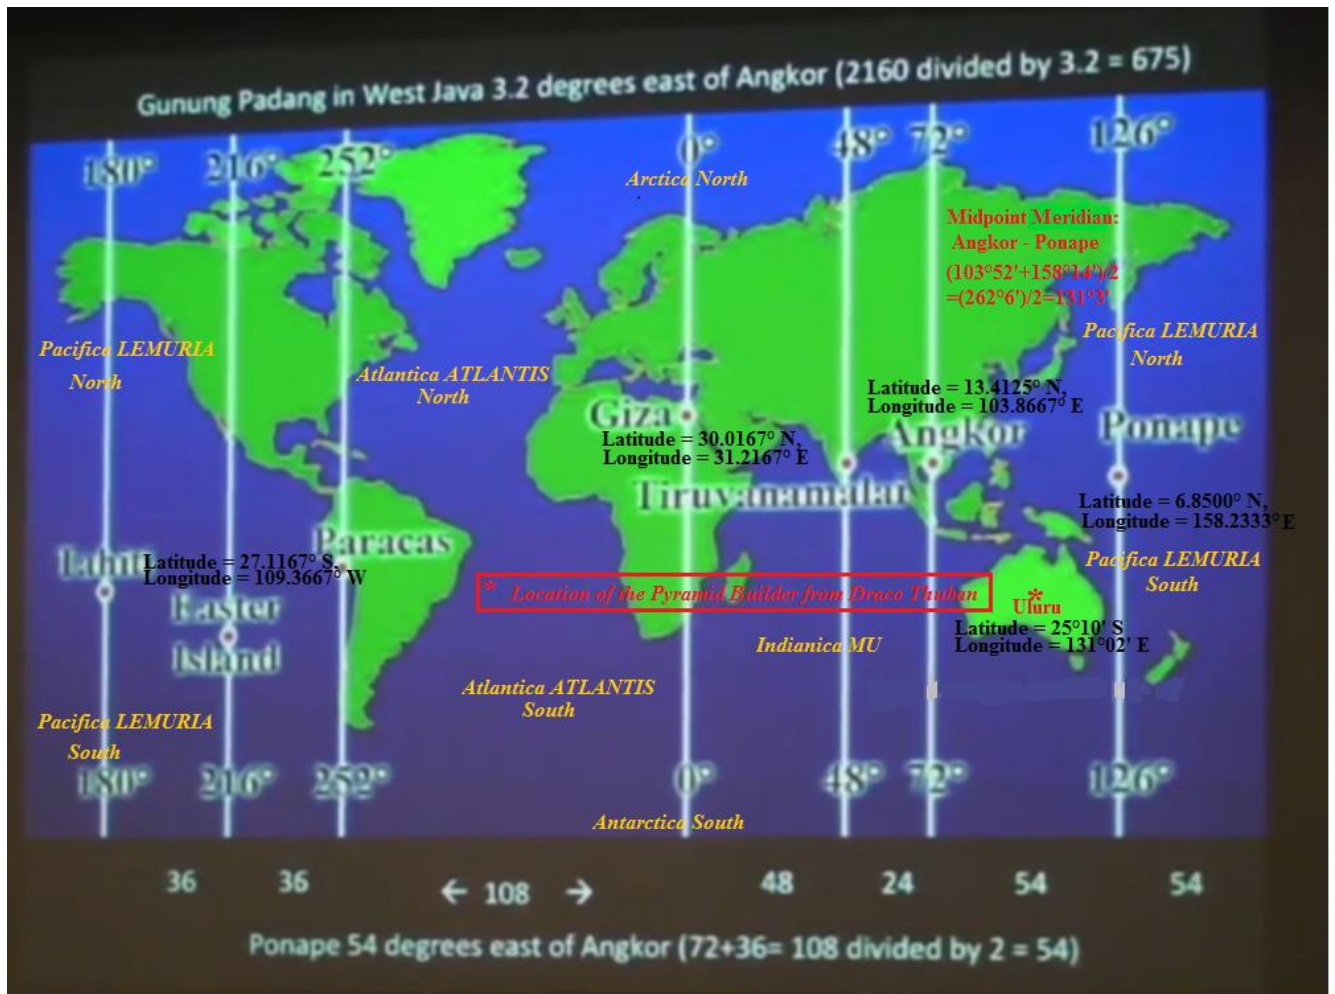

Cellular endosymbiosis then assured accelerated integration of the information from the 'higher dimensional' or 'astral etheric' worlds of the 'Old Creating Ones' as part and parcel of the body shapes and forms of the multicellular worlds being born and becoming from the vast information base of the Archaeons.

And then, when the multicellulars as the lifeforms of Gaea Earth had evolved into suitable super orgasmic lifeforms, which could utilize their 'stored memories' in a sufficient recall function, namely, to allow 'old time travellers' to incarnate and inhabit those 'suitable biophysical' lifeforms; then the Archaeons would awaken from their cosmic sleepiness a second time.

The first self-remembrance was when the planetary home planet could begin to create the body forms in a 'computerizable and memory storing' density of form and the second self-remembrance would be when the biophysical lifeforms could remember and tap their own multidimensionality in the most dense and necessary environment created for this very purpose by the Cosmic Mother planet herself.

And so it is that particular crystalline and geophysical monuments display certain characteristics, like the Moai of Easter Island mainly facing inwards to the 'villages' of the "Heirs to the Stars", but face outwards towards the Sea and the Galactic Worlds of the origins inland at the site of Ahu Akivi. They also point to the 'Land of Baiame' the Rainbow Dragon of the Cosmic Dreamtime, also known as Uluru!

7) Also, another strange clue. All the Ahu Moai watch the sky but they do so face inland, all but one Ahu, the Ahu Akivi also with 7 Moai. These watch the western ocean horizon and are also crowned with heavy head stones called Pukao.

...

THE RONGA RONGA TEXT OF THE RAPANUI PEOPLE

In the image below the pictoglyph nature of the Rapanui text called "Ronga Ronga" is almost the same as the Naxi Dongba texts. Both seem to be using the star patterns themselves and bird head people as actual spoken word. Note the Naxi dongba text has three crosses as stars perhaps next to a cluster of six markings. The Easter Island text of Ronga Ronga also has two very common characters in texts speaking of their celestial deities using a group of seven dots and a group of three dots in a row and a group of three crescents in a row that resemble the mask worn by the Rapanui people in ceremony (see mask in depiction in purple lower down).

There is one very interesting association of text to something Wayne researched in the Christ star map story: three-star entities together mean three wise kings. The Magi he proposed represent the three that follow from the east associated with finding the location of the Christ 'Bethlehem' star... the stars of Orion's Belt as a sacred cosmic pointer... the 'forgotten' cross of the churches. Is this just a coincidence or are we seeing evidence of a global teacher passing through ancient civilizations.

<http://www.thehiddenrecords.com/easter-island-rapanui-moai-orion-perseus.php>

Ahu Akivi is an especially sacred place.

Ahu Akivi is a sanctuary and celestial observatory built about 1500 AD which was the subject of the first serious restoration accomplished on Easter Island by archaeologists William Mulloy and Gonzalo Figueroa, with excellent results. As in the case of many religious structures on Easter Island, it has been situated with astronomical precision: it is seven statues look towards the point where the sun sets during the equinox.

It is also aligned to the moon.

Ahu Akivi is an unusual site in several respects. A low ahu supports 7 statues all very similar in height and style. The site is odd in that it is located far inland, and the statues were erected to face the ocean. The only site where this was done. Like other Easter Island sites, the statues were found knocked off the ahu, lying face down in the ground. In 1960, Archeologist William Mulloy's team spent several months raising the statues to their original positions.

<http://en.wikipedia.org/wiki/Moai>

The Freedom for Humanity is its Metamorphosis from its Cocoon!

All Humans are ETs, born in 3D incarnation from a cosmic and intergalactic perspective, nous and origin.

All Humans know on the soul-level, who they are and why they are here.

Namely to break their Cocoon of their own Metamorphosis from the Inside-Out.

All Humans are like little Reptilian Serpents, Dinosaurs or Chickens, who to be born as Starhumans, are required to peck at their encompassing eggshells from the inside to get out.

If they fail to break their prison walls, they will die as unborn starhumans within their 3D prisons and so recycle their own beingness until they can self-create their 4D merkabahs.

Fingerprints Of The GODS – Graham Hancock Presentation (1995)

<https://youtu.be/1wJw1Dcl2e4>

What is the connection between Angkor Wat in the Jungle of Cambodia, the Pyramid in the desert of Egyptian desert, and monuments on Easter Island and in Micronesia? What is the underwater mystery in Japan, the last time it above water was 10,000 years ago? Our ancestors are highly intelligent people, thousand years ago they precisely predicted the solar eclipse over Mexico in 1991.

In this set of three videotapes, writer Graham Hancock traverses the world and explains his controversial theory that an ancient civilization, highly intelligent people who sailed the planet as early as 10,500 B.C., spread advanced astronomical knowledge and built ancient observatories. Skeptics may scoff, but Hancock earnestly points out similarities in giant stone structures in the Egyptian desert and Cambodian jungles, and on Easter Island and in Micronesia, he points out what he considers evidence of an ancient society of seafarers.

His ideas may seem utterly bizarre at first, but Hancock presents them in an understated and good-natured manner, and he also makes clever use of computer graphics and aerial photography to illustrate the startling similarities in ancient structures found from the North Atlantic to the South Pacific.

Charlotte asked (May 11th, 2018):

Hey Tony, I hope you are well. Quick question, a group of alternative historians are proposing that instead of the Great Pyramids lining up to Orion, they are actually connected with Cygnus, which they also see as being of overwhelmingly prime significance in other respects. Your take on that?

Built at the end of the last ice age, the mysterious stone temple complex of Göbekli Tepe in Turkey is one of the greatest challenges to 21st century archaeology. As much as 7,000 years older than the Great Pyramid and Stonehenge, its strange buildings and rings of T-shaped monoliths—built with stones weighing from 10 to 15 tons—show a level of sophistication and artistic achievement unmatched until the rise of the great civilizations of the ancient world, Sumer, Egypt, and Babylon.

Chronicling his travels to Göbekli Tepe and surrounding sites, Andrew Collins details the layout, architecture, and exquisite relief carvings of ice age animals and human forms found at this 12,000-year-old megalithic complex, now recognized as the oldest stone architecture in the world. He explores how it was built as a reaction to a global cataclysm—the Great Flood in the Bible—and explains how it served as a gateway and map to the sky-world, the place of first creation, reached via a bright star in the constellation of Cygnus. He reveals those behind its construction as the Watchers of the Book of Enoch and the Anunnaki gods of Sumerian tradition.

Unveiling Göbekli Tepe's foundational role in the rise of civilization, Collins shows how it is connected to humanity's creation in the Garden of Eden and the secrets Adam passed to his son Seth, the founder of an angelic race called the Sethites. In his search for Adam's legendary Cave of Treasures, the author discovers the Garden of Eden and the remains of the Tree of Life—in the same sacred region where Göbekli Tepe is being uncovered today.

The Cygnus Key: The Denisovan Legacy, Göbekli Tepe, and the Birth of Egypt Paperback – 28 Jun.

2018

“The Cygnus Key is the new astronomical paradigm that shines light on the primal awakening of human consciousness, sparked by the discovery of precession cycles, sound acoustics, and number cosmology. Andrew Collins had already decoded the alignments to the Cygnus star system at Göbekli Tepe and the Giza pyramid complex in his book Göbekli Tepe: Genesis of the Gods. Now, going back even further to 45,000 years ago, he explores how our ancestors first discovered the Cygnus connection, the pathway of souls through the constellation of the swan. This brilliant book is the sign I have been waiting for! We are recovering from our species trauma from the great cataclysms 12,000 years ago.

The Cygnus Key is a must-read for all students of ancient timelines, star alignments, and cosmology.”
(Barbara Hand Clow, author of Awakening the Planetary Mind)

“The Cygnus Key is a monumental work bringing numerous ancient mysteries into focus. It provides a lucid and well-reasoned understanding for readers who make the effort to digest it all. Starting with the amazing site of Göbekli Tepe, Collins leads the reader to Egypt and various other ancient civilizations. He shows how both Orion and Cygnus were key astronomical elements in the understanding of the ancient world of the soul’s journey to the stars and the probable source of these beliefs.”(Gregory L. Little, Ph.D.)

“A dynamic quest to discover the cosmology of our earliest ancestors and its relevance today. Collins takes us on a convincing journey following the lore of the constellation of Cygnus.

From Göbekli Tepe to the pyramids of Egypt and the archaic myths of Greece, we are led to humanity's ultimate psycho-spiritual roots in the Palaeolithic world of Russian Siberia and the realm of the Denisovans. A triumph." (Caroline Wise, editor of Finding Elen: The Quest for Elen of the Ways)

About the Author:

Andrew Collins has been investigating the idea of advanced civilizations in prehistory since 1979. He is the co-discoverer of a massive cave complex beneath the Giza plateau, now known as "Collins' Caves." The author of several books, including From the Ashes of Angels and Göbekli Tepe: Genesis of the Gods, he lives in Essex, England.

Tonyblue:

No, the alignment of Giza with Orion coincides with the alignment of Angkor Wat with Draco in the same time frame and is definitive for the Mayan precessional cycle of $26,000 \times 360 = 9,360,000$ days or $65 \times 144,000$ kin as 5×13 baktuns to define the 25,627 years of the science based chronos.

But of course, all of the constellations are 'signs of the timelines' from the stars and Cygnus the Swan would form a parallel to Giza-Angkor Wat within the timelines indicated by the Mayan calendar from March 1st 23,615 BC to the 'decisive' midpoint of July 27th, 10,802 BC when the Giza-Angkor Wat alignment was mapped as the 'as above, so below' to December 21st, 2012 and when the precessional Maya cycle ended.

So, we are now already in the 'New Age of Aquarius' in its 6th year linking to the many 'prophecies' say 7-year cycles and 'time warps' one of which maps August 4th, 70 AD and 'diaspora' of Israel-Jerusalem to January 27th, 2056 as an 'end date' for a time of the beginnings indicated by Hancock, Collins and likeminded archaeologists and historians as the Zep Tepi or 'Time of the Gods' as the 'First Time of Egypt'.

The Judean-Christian timeline becomes interposed onto Zep Tepi as a 'precessional age of $12+1=13$ star constellation signs' from the time of the 'Hyksos', the projected Moses-Exodus and the Santorini volcano eruption of July 21st, 1635 BC time warped in the reversed sense to February 22nd, 3620 BC in 3690 (Julian-Gregorian day count calibrated) years. This encompassing timeline can now be correlated with the political evolution and transition of planet earth into a new time Logos defined.

I should add an important point here. Collins is of course rather justified in aligning Cygnus to the Göbekli Tepe and similar constructions. But Giza-Angkor is 10,802 BC and you need to add 1200 years to correlate the geophysical record of the sudden warming after the ice age etc. and as explained in some detail by Graham Hancock, the Comet Research group and co. So, Cygnus and the Devonian connection continues Giza-Angkor Wat from 10,802 BC to 9,602 BC and in no way replaces it.

Göbekli Tepe's Vulture Stone

A warning across time or a signpost to the land of the dead? Some astronomical considerations at Göbekli Tepe.

Göbekli Tepe's Pillar 43, otherwise known as the Vulture Stone, is arguably the key to understanding the cosmic geography of the site's builders and their belief in the soul's journey to the spirit world. Yet what does the stone's relief of a funny-shaped vulture actually represent? For several years it has been realised that the Scorpion shown immediately below the vulture is almost certainly the constellation of Scorpius. But what about the vulture? Graham Hancock and others believe it represents the constellation of Sagittarius. Andrew Collins examines the evidence and comes to quite different conclusions, showing that it is more likely to be a signpost to the land of the dead.

Göbekli Tepe's Pillar 43, a.k.a. The Vulture Stone (pic credit: Andrew Collins).

Graham Hancock in his book *Magicians of the Gods* (2015) writes that the scorpion on Göbekli Tepe's Pillar 43, standing in the north-northwestern section of Enclosure D's ring wall, signifies the constellation of Scorpius.(1) Having stated this, he goes on to demonstrate that the funny-looking vulture located immediately above it (see fig. 1) is the neighbouring constellation of Sagittarius, a theory proposed originally by American researcher Paul Burley.(2)

As both Scorpius and Sagittarius are located on the ecliptic, the sun's path as it crosses the sky in the course of a year, Hancock, again following Burley's lead, argues that the relief of a ball-like object, shown in the form of a filled circle, positioned immediately above the vulture's right wing, is the sun in Sagittarius. During the current precessional cycle the sun is seen to rise in concert with Sagittarius at the time of the winter solstice only between the years 1960 and 2040.(3)

In this knowledge Hancock asks whether the carved imagery seen on the Vulture Stone might not be a coded message conveyed across time by the Göbekli builders of 11,500 years ago. Could it be a warning to humanity telling us that during this 80-year window the comet responsible for a terrifying impact event at the commencement of the Younger Dryas event ca. 10,800 BC might once again threaten the world?

This is a daring, bold and somewhat disturbing proposition that once made, is unlikely to be forgotten. But is it right? Is it even appropriate to interpret the carved imagery of Göbekli Tepe's Vulture Stone in this way?

Figure 1. Pillar 43 in Göbekli Tepe's Enclosure D showing its position in the structure's perimeter wall.

Comet Impact

That the Göbekli builders built these extraordinary stone installations on a mountaintop across a period of 1,500 years with the primary purpose of counteracting the baleful influence of comets is one of the principal themes of my book *Göbekli Tepe: Genesis of the Gods* (2014). Here I state that even at the end of the Younger Dryas event, ca. 9600 BC, the Upper Paleolithic populations of the Northern Hemisphere remained in absolute fear following a global cataclysm caused by a comet impact that devastated large parts of the North American and Eurasian continents at the beginning of the Younger Dryas, ca. 10,800 BC.(4) Hancock ably continues this theme in *Magicians of the Gods*, bringing together the most recent scientific evidence showing that this terrible catastrophe did indeed take place.

What is more, Hancock is almost certainly right in asserting that the scorpion seen on Göbekli Tepe's Pillar 43 is arguably the earliest known pictorial representation of the Scorpius constellation, something I argue also in *Göbekli Tepe: Genesis of the Gods* (2014) after the work of Juan Antonio Belmonte.(5) Yet going on to identify the stone pillar's carved relief of a vulture with the constellation of Sagittarius is, however, thwart with problems.

From earliest times across the Near East the vulture has been identified with just three constellations: Cygnus, the celestial bird of Hellenic tradition; Lyra, the celestial lyre of Orpheus, known also as the Falling Vulture; and Aquila, the celestial eagle called also the Flying Vulture.

All three constellations are found in the same area of sky, their brightest stars - Deneb, Vega and Altair respectively - being known collectively as the Summer Triangle (see fig. 2).

Fig. 2. Star chart showing Cygnus as a swan, Lyra as both a vulture and lyre, and Hercules upside down to the right. Aquila lies just beyond the illustration's bottom left-hand corner.

The Stymphalian birds

In Greek Hellenistic mythology these three constellations were equated with, among other things, the three Stymphalian birds that were sent against Hercules in his Sixth Labor.(6) It is an association confirmed in the knowledge that all three asterisms are located in the vicinity of the constellation of Hercules. In Mesopotamian star-lore three similar birds attack the god Marduk, and these too were personified in the night sky as the constellations of Cygnus, Lyra and Aquila.(7) In the knowledge that the Greeks identified Marduk with Hercules, it becomes clear that the myth of the Stymphalian birds originated in Mesopotamia, where all three constellations were identified as winged creatures as early as the third millennium BC.(8)

The Stymphalian birds, collectively known as the Stymphalides or Harpies, are said to have been winged monsters with "the faces of women, the bodies of vultures, and claws upon their hands."(9) The fact that they were thought to be monstrous vultures confirms their link with the constellations in question, which are all identified as vultures in Greek Hellenic star-lore - Vultur cadens ("the falling vulture") in the case of Cygnus and Lyra, and Vultur volans ("the flying vulture") in the case of Aquila.(10)

So if the vulture on Pillar 43 does represent one of the Stymphalian birds (and, interestingly, there are in fact six birds of various species and sizes carved on the stone), then most likely it is Cygnus.

Not only did the twin central pillars in Enclosure D (and also those in Enclosures B, C, E & H) accurately target the setting of Deneb, Cygnus's brightest star, but we also know that its porthole stone, which stands just a few meters to the west of the Vulture Stone, was positioned so that this astronomical spectacle could be witnessed each night on the local skyline. In other words, the imagery on the Vulture Stone was in some way related to the astral purpose behind the axial orientation of the installation in which it stood. In addition to this the funny-looking vulture on Pillar 43 almost perfectly matches the outline of the main stars of Cygnus during the suspected timeframe of construction of Enclosure D (see fig. 3).

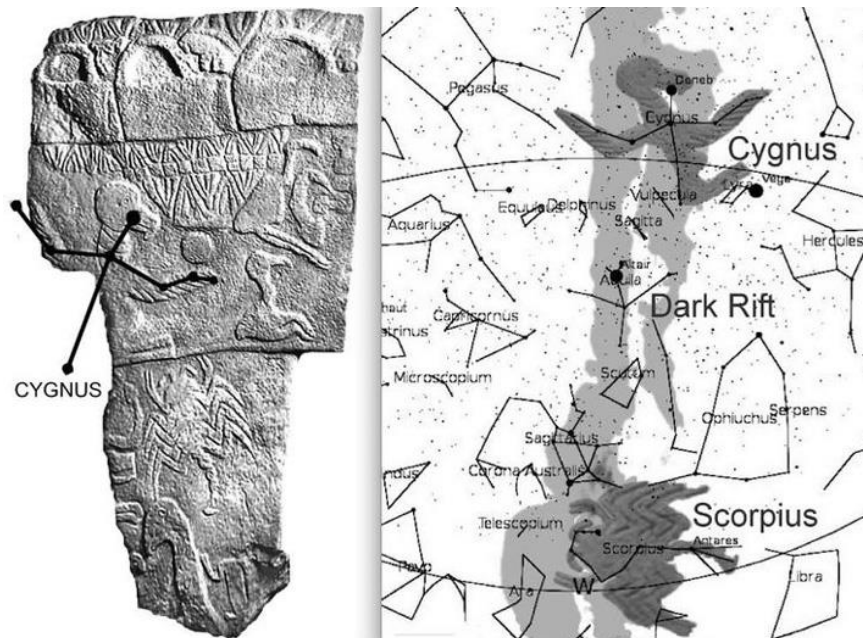

Figure 3. Left, Göbekli Tepe's Pillar 43 with Cygnus overlaid and, right, star map showing Scorpius overlaid with Pillar 43's scorpion and Cygnus overlaid with the stone vulture (pic credits: Rodney Hale).

Cygnus in Armenia

One additional piece of information linking Cygnus with the symbol of a vulture at Göbekli Tepe comes from Armenia, which borders Anatolia to the northeast. In the past, the influence of Armenia and its ruling dynasty extended as far south as Edessa, modern-day Sanliurfa, just eight miles (13 kilometres) away from Göbekli Tepe. Indeed, many Armenians still inhabited the Sanliurfa region until the horrific atrocities of the Armenian Genocide of 1917. It is thus significant that in Armenian star lore the constellation of Cygnus is known as Angegh, a word meaning "vulture."⁽¹¹⁾ Of direct relevance here is the fact that an Armenian village named Angeghakot close to the megalithic complex of Karahunj is thought to reflect the importance of the Cygnus constellation.⁽¹²⁾ Karahunj is made up of hundreds of standing stones that together create the likeness of the Cygnus constellation in its guise as a bird,⁽¹³⁾ while the circular aperture in one prominently placed stone is said to target the transit of the Cygnus star Deneb as it crosses the meridian.⁽¹⁴⁾ Karahunj as a whole is attributed to the Bronze Age, ca. 2500 BC, although the alignment toward Deneb argues for a much earlier date of construction, perhaps in the region of ca. 5500-5000 BC.⁽¹⁵⁾

Since angegh in the Armenian language can also mean "angel," Cygnus is seen in Armenia as a heavenly angel, as well as the celestial home of the angels.⁽¹⁶⁾

Yet prior to the rise of Christianity Cygnus in Armenia was quite simply a vulture, just as it was on the Euphrates during the formative years of the Mesopotamian civilizations that emerged in Lower Iraq from around 3000 BCE onward.

ParanateLLons of Sagittarius

Nowhere on the Euphrates is Sagittarius identified as a vulture. Having said this all three Stymphalian birds-Cygnus, Lyra and Aquila - are classified as paranateLLons of Sagittarius. A paranateLLon is a constellation that is seen to rise at the same time as one of the twelve zodiacal constellations, which in the case of Cygnus, Lyra and Aquila during the time frame in question was Sagittarius. Thus, all three celestial birds came under the rule of Sagittarius. It was for this reason that the Mesopotamian form of Sagittarius, Pabilsag, a composite creature usually depicted with a horse's body, the tail of a scorpion, the wings of a bird and the head and torso of a male human figure holding a bow and arrow, is occasionally shown with birdlike feet.(17)

If the vulture on Pillar 43 does indeed represent one of these three celestial birds (and, interestingly, there are in all six birds of various species and sizes found among its carved relief), then it is likely Cygnus. Not only do the twin central pillars in Enclosure D (and also those in Enclosures B, C & E) accurately [target the setting of Deneb](#), Cygnus's brightest star, in the epoch of its construction (these alignments have been confirmed by Italian archaeo-astronomers Alessandro De Lorenzis and Vincenzo Orofino(18)) but its holed stone is oriented in order that this spectacle could have been witnessed on the local horizon (the example in Enclosure C almost certainly functioned in a similar manner).

Aside from this is the fact that the shape of the funny-winged vulture on Pillar 43 almost perfectly reflects the outline of the main stars of Cygnus in 9600 BC (see fig. 3), the suspected date of construction of Enclosure D based on radiometric dating. The vulture does not mimic the pattern created by the stars of Sagittarius, nor does it sit well with the scorpion located directly beneath the vulture on the carved panel, which we can assume to be the constellation of Scorpius.

Journey of the Soul

Pillar 43 most likely depicts the death journey of the soul of the deceased, or indeed that of the shaman. This would be the removal of a soul from its physical environment, represented by the headless figure with an erection at the base of the stone - via Scorpius, signified by the scorpion, to its final destination among the stars. This destination, arguably the entrance to the "upper world" or sky-world of Eurasian shamanic tradition, appears to have been located in the vicinity of Cygnus, represented on the pillar by the main vulture, where the soul of the individual is shown as the ball above its left wing.

The carved image of a ball-like head or filled circle is recognized in the prehistoric rock art of southeast Anatolia as being a symbol of the soul.(19) This was because the seat of the soul was always considered to reside in the head or skull. It was for this reason that, during the early Neolithic age, skulls were removed from bodies and used afterwards for oracular purposes, something thought to have occurred at Jericho (Tell es-Sultan) in Palestine. Here a number of perfectly preserved decorated skulls, dating to ca. 7000 BC, have been found that were most likely used for psychic communication with their former owners (see fig. 4).

Figure 4. Decorated skull found at Jericho, Palestine, dating to ca. 7000 BC (Pic credit: Wiki Commons Agreement).

I demonstrate all this elsewhere,(20) and recently similar ideas have been voiced by Müslüm Ercan, director of Sanliurfa Museum, who is head of excavations at Göbekli Tepe on behalf of the museum. In an article titled "Signs of world's first pictograph found in Göbeklitepe," published in Turkey's Hurriyet Daily News on July 15, 2015, he proposed that: "The scene on the obelisk unearthed in Göbeklitepe [Enclosure D's Pillar 43] could be construed as the first pictograph because it depicts an event thematically. It depicts a human head [the filled circle] in the wing of a vulture and a headless human body under the stela.(21)

"There are various figures like cranes and scorpions around this figure. This is the portrayal of a moment; it could be the first example of [a] pictograph. They are not random figures." Ercan goes on to link the vulture imagery on Göbekli Tepe's Pillar 43 with the act of disposing of the dead through the practice of excarnation, along with its allied association with the transmigration of the soul: "There were no graves 12,000 years ago. The dead bodies were left outdoors and raptors [that is, vultures] ate them. In this way, people believed the soul goes to the sky." This, he said, was called "burial in the sky," i.e., sky burial, and is depicted in the carved art at Göbekli Tepe, and also at the 9,000-year-old Neolithic city of Çatalhöyük in southern-central Anatolia.

Here, shown in one particular painted fresco, are two vultures at the top of a wooden excarnation tower in the act of feasting on a human corpse, which as at Göbekli Tepe is shown as a headless figure (see fig. 5). Yet next to this scene are two more vultures on another excarnation tower that appear to be taking under their wings a ball-like head, this time with a mouth and two eyes. What we are almost certainly seeing here are the birds accepting into their care the soul of the deceased person in preparation for its journey to the next world. Other frescoes at Çatalhöyük show vultures with anthropomorphic features, suggesting they are shamans in the guise of vultures caught in the midst of ecstatic trance.

Figure 5. Frescoe from Çatalhöyük in southern-central Anatolia showing vultures devouring a corpse on the right and taking a soul into their cave on the left (pic credit: Andrew Collins).

Very likely the ball above the left wing of the vulture on Göbekli Tepe's Pillar 43 is the soul of either a deceased person, or that of a shaman, now under the protective care of the vulture who is acting in the capacity of psychopomp, a Greek word meaning "soul carrier," or "soul accompanier." Thus, the visual evidence presented by the Vulture Stone allows for a comparative and consistent interpretation of its carved relief. With this in mind, it seems more plausible to conclude, as archaeologist Müslüm Ercan has done, that the overall theme being presented by the pillar's pictorial art is one of the soul's cosmic journey.

At Göbekli Tepe this would have been achieved by the soul exiting this world and entering the next via the north-north-westerly placed porthole stones aligned toward the Cygnus star Deneb. It is thus no coincidence that Enclosure D's Pillar 43 is located immediately to the west of its porthole hole (see fig. 1), suggesting that the former is to be seen as a signboard marking the way to the land of the dead.

Although this explanation makes sense it is infinitely more tempting to conclude that the Vulture Stone really is a warning of impending doom conveyed across time by the Göbekli builders. This is unfortunate, as despite all the evidence to the contrary, this will persuade researchers to identify Pillar 43's funny-shaped vulture as the constellation of Sagittarius well into the future.

DIAGRAM SHOWING THE GREAT PYRAMID'S SPECIAL CHRONOLOGY SYSTEM, FROM 1909 TO 1953.

1 March 23,815 BC - 27 July, 10,802 BC = 3% Times warping 2627 BC
 28 July 10,802 BC - 21 December, 2012 AD = 3% Times warping 2626 BC
 In the Abomination of Desolations: 1260+30=1290 as 30 Days/Years in the Grafting 14.78+15.22=30 in 3% Times + 1 Month = 1290 = 1 Month + 3% Times

The General Chronology System of the Great Pyramid's Prognosis is given to the scale of 1 Pyramid Inch to a solar year, and defines a period of 6,000 years, commencing from 4000 B.C. A concept of Special Chronology System, however, as shown on the diagram above applies horizontally from the Great Step to the South Wall of the King's Chamber. This Special Chronology System is given to the enlarged scale of 1 Pyramid Inch to the month of 30 days, and deduces the Final Period of the Great Pyramid's prophecy as applying to the interval from 2 August, 1909, to 20 August, 1953 A.D., from the Great Step dating to the South Wall dating of the King's Chamber. Dates prior to 4-8 August, 1914, are represented as "Retrospective" datings. This enlarged scale representation appears to have been specially interpreted by the Great Designer in order that it should be the means of elucidating the Great Pyramid's Message of warning and guidance to perplexed and suffering humanity in these overcast days.

The Warping of Pyramid Time from 10,802 BC onto 2626BC in the Logos of Daniel Thuban

- Day=Kin #0 = Sat, March 1st, 23,615 BC as the Initialisation of the Great Mayan Cycle of Precessions
- Day=Kin#1 = Sun, March 2nd, 23,615 BC as 1st Day of Mayan Tun-Year 1 of 26,000
- Day=Kin#360 = Tue, February 24th, 23,614 BC as 360th Day of Mayan Tun-Year 1
-
- Day=Kin#4,680,000 = Tue, July 27th, 10,802 BC as the 360th Day of Mayan Tun-Year 13,000
- Day=Kin#4,680,001 = Wed, July 28th, 10,802 BC as the 1st Day of Mayan Tun-Year 13,001
-
- Day=Kin#9,360,000 = Fri, December 21st, 2012 AD as the 360th Day of Mayan Tun-Year 26,000
- Day=Kin#9,360,000 = Sat, December 22nd, 2012 AD as the 1st Day of Mayan Tun-Year 26,001

Mayan Calendar

26,000 Tun-Years = 9,360,000 Kin

- 20 Kin = 1 Uinal
- 18x20 Kin = 360 Kin = 18 Uinal = 1 Tun
- 18x20x20 Kin = 7200 Kin = 20 Tun = 1 Katun
- 18x20x20x20 Kin = 144,000 Kin = 400 Tun = 20 Katun = 1 Baktun
- 18x20x20x20x65 = 9,360,000 Kin = 26,000 Tun = 1300 Katun = 65 Baktun

9,360,000/365.2425 = 25,626.81
 9,360,000/365.2422 = 25,626.83

Degree of Precession per Year:
 Per 26,000 Tun-Years /360 = 72.2222..
 Per 25,626.82 Years /360 = 71.1856..

- 1 Mayan Tun-Year = 360 Kin Days
 - 1 'Pyramid Tropical Year' = 365.2422 'Mean Solar Days'
 - 1 'Civil Gregorian Year' = 365.2425 'Mean Solar Days'
- Cycle Variance = 26,000 - 25,626.82 = 373.18 Years
 Variation = 0.0003 for 7.8 Days in 26,000 Years
 and 1.5 Days in 5014 Years

12,000+12,000+1600+26.82 = 25,626.82

- 13,000 Kin = 3½ Times from 23,615BC - 10,802 BC
- 13,000 Kin = 3½ Times from 10,802 BC - 2012 AD
- 2,000 Kin = Variance Time from 2012 AD - 2389 AD with 400-373.18=26.82 and the 'Millennial Timewarp' 13,000 - 12,000 = 1000
- 1 March, 23,615 BC ---3½ Times---27July, 10,802 BC||28July, 10,802 BC ---3½ Times---21December, 2012
- Kin #4,680,000 * Kin #4680,001
- 27July, 10,802BC Warps 2627BC * 2626BC Warps 28July, 10,802 BC

Even sticking to the Great Step scale-change suggested above, however, it might still be argued that the scale of 1" per year should apply throughout the King's Chamber Passage and right into the King's Chamber, since no actual 'step' has intervened. This would not be in accordance with the code as postulated—indeed it seems to fly in the face both of the obvious symbolism of the 5 RC-long granite floor in the Antechamber and of the 10 RC (1,000-year) width of the King's Chamber. None the less, application of such a thesis would date the first Messianic advent at A.D. 2012, the second at 2030, the third at 2057 and the fourth at 2084. But in this case it seems fairly obvious that the dates are too close together to make sense.

History, of course, draws derisive attention to the various incorrect time-scale assumptions. For example, Davidson and Aldersmith's calculation—albeit arrived at with some misgivings—that the 'world would end' in 1953 has already misfired. We can only wait, and watch the 'signs', and remember the biblical warnings that things may happen later than we think.

Second Return Cycle on 2nd Return

Pyramidion - Reconstructed capstone from one of the pyramids of the Giza Plateau, symbolizing Benben.

Benben stone from the Pyramid of Amenemhat III, 12th Dynasty. Egyptian museum, Cairo.

Figure 13: The Ben Ben Capstone of the Great Pyramid

The 137 years are encoded in the Great pyramid of Giza as the prevalent physical constant of quantum mechanics as a foundational physical parameter and so relates the physical world of science with the greater history of the universe and the civilizations arising upon planet Earth. Known as Alpha (α), the finestructure constant describing the probability of light interacting with matter $\{\alpha=2\pi k_e e^2/hc=60\pi e^2/h=1/137.04\}$; 1 in 137-138 photons will interact with an electron to define the proportion of the mass-self-state to the massless electromagnetic self-state within a material-spiritual context.

Using the Ben Ben capstone of the pyramid as a 1/100th miniaturization for the architectural Great Pyramid of Giza; $\alpha_{Giza} = \{v([\frac{1}{2}s]^2+H^2)+2s\}/\{(v2s^2)+H\}/100 = 647.788/4.72818 = 137.005$

The Great Pyramid dimensions here are for a base square side of 230.6 meters as 440 royal Egyptian cubits and a diagonal length of $v(2s^2)$ with a height H of 146.7 m or 280 royal cubits to derive the triangular height for a face of the pyramid as $h=\{v([\frac{1}{2}s]^2+H^2)$ by the Pythagorean theorem $a^2 + b^2 = c^2$.

1 royal cubit of 28=7x4 digits is measured by cubit rods, differing in size from 523.5 to 529.2 mm and adds 1 palm to an ordinary cubit of 24=6x4 digits as 6 palms and 4 fingers. The degree of precision to derive alpha, so depends on the cubit rod used to measure royal cubits.

Using the minimum range of 523.5 mm the side length of the Great Pyramid calculates as 230.34 m and the height H calculates as 146.58 m. Using the maximum range of 529.2 mm s calculates as 232.85 m and H calculates as 148.18 m.

Using the royal cubit with full integer values $\alpha_{Giza} = \{v([\frac{1}{2}s]^2+H^2)+2s\}/\{(v2s^2)+H\}/100 = v(48,400+78,400)+880\}/100\{(v(387,200)+280)\} = 1236.090/9.022 = 137.008$

The difference between a 360-day circle year and a 365.2422 tropical-seasonal and star-based year is 5.241 days, which for the cursed 687 years calculate as $687 \times 5.2422 = 3601.39$ extra days and is precisely 3600 days as 10 circle-degree years for 686.73 Years, that is a fractional day count for the 687th year in the reckoning of times.

Adding 137 years to the cursed 687 years doubles the degree years of the unit circle to $687+137=820=720+100$ years to identify the 36 degrees as a tenth of the unit circle and as a hundredth of the $3600=60 \times 60$ unit measurement of the sexagesimal number count of Sumer and related ancient civilizations. Sumer used the $sar^*=60^3=216,000$ and the $sar=60^2=3600$ and a $ner=600$ as one sixth of a sar for a sos as a unit count of $60^1=60$ and $60^0=1$ in their additive progressive number counts to measure volumes, areas, and length displacements. The reduction of the physical size to that of the Ben Ben capstone in the alpha encoding in the Great Pyramid so derives from the sexagesimal measuring system of ancient Mesopotamia and the Zep Tepi time before times.

The ancient measurements of time relate to the precessional cycle of a day count of exactly 9,360,000 (Mayan Kin days) as $26,000 \times 360$ degree-day years with $5 \times 13 = 65$ baktun of 144,000 days each for $5 \times 13 \times 144,000 = 5 \times 1,872,000 = 9,360,000$ days for a tropical year based on the metonic cycle of 235 lunations of 29.5306 days each, being the same as 19 tropical years approximated as 365.2425 'civil day years' and 365.25 Julian day years. This calculus defines a Mayan precession as 25,626.8 Gregorian 365.2425-day years for the present time and defines the Hebrew calendar reckoning from the creation on 1Tishri-247=19September 4009BC as the encoded Zep Tepi time for the birth of archetyped Adam as the first of the 26 generations.

Furthermore, seven generations are encoded as being 'cursed' in the 'slaying' of Adam's and Eve's second son Abel by Cain as their firstborn son. Counting the 7 cursed generations from Adam to Seth to Enos to Cainan to Mahalaleel to Jared to Enoch and the birth of Methuselah sum to 687 years as parallel to the 7 generations from Cain to Enoch to Irad to Mahajuel to Methusael to Lamech to Jabal=New Cain and his brother Jubal=New Abel.

The following 300 years of Enoch are then no longer cursed, and Enoch's 'bodily' ascension mirrored in the Sumerian creation mythology as the 'heavenly ascent' of the shepherd Etana describes the 'resurrection' of Abel in a cosmic rebirth of both Cain and Abel.

The birth of Methuselah as father of Lamech in the Adamic generations on the Zep Tepi date of September 15th, 3322BC=1Tishri440 so becomes the starting point of a new time count, with the death of archetyped Methuselah after 969 years on Zep Tepi star date September 11th, 2353BC=1Tishri1409 setting the 600th year of Noah and the year of the Gilgamesh flood encoded in the SKL and the Hebrew King List HKL of the Genesis encoding from the Zep Tepi chronology.

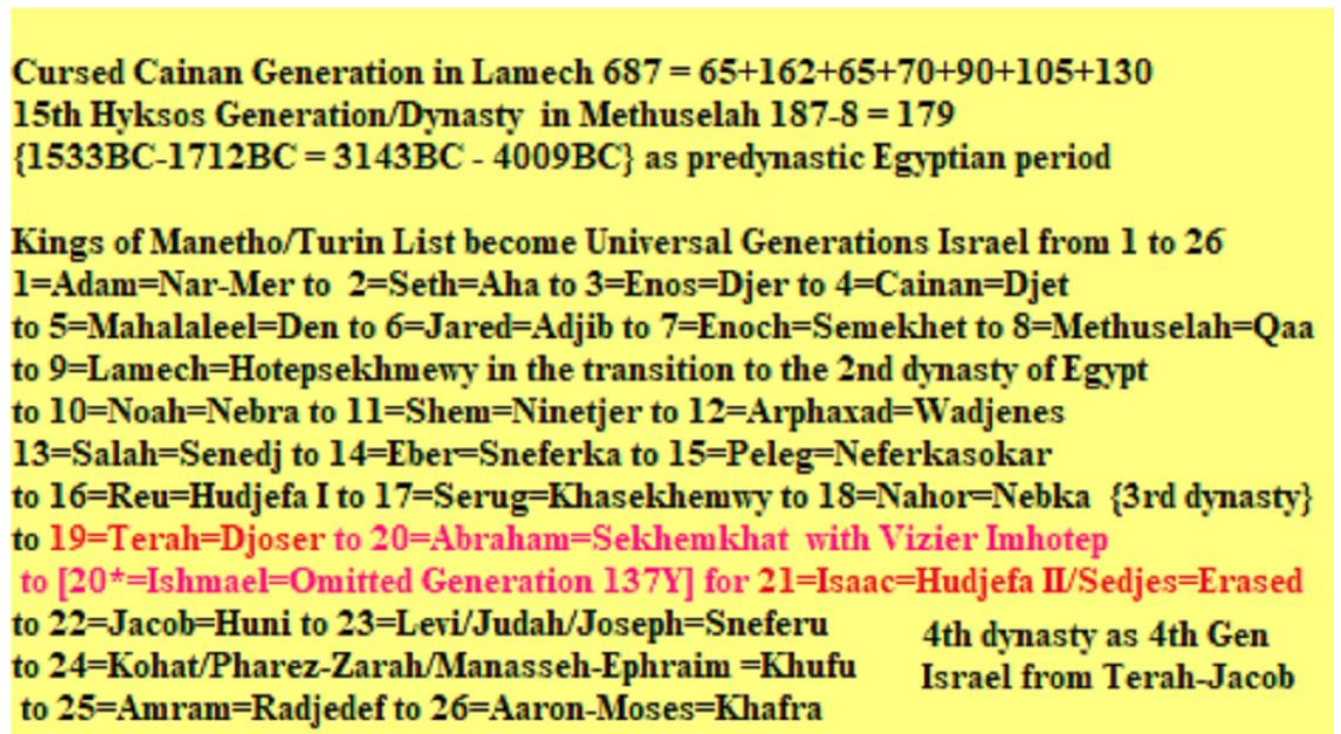

Figure 14: 26 Parallel Generations Israel-Egypt

The true precessional year count from the Zep Tepi Mayan Long Count synchronisation shortens the 360°-Template Circle precessional year count by 26,000 - 25,626.5 = 373.5 = 370 + 3½ years.

Those 370 years decode as a particular integrated time frame in the ancient calendars of Sumer, Babylon and Egypt and are expressed as coded numbers in the Sumerian King List SKL and the Turin King List TKL of Egyptian dynasties and pharaohs.

In the Masoretic texts of the Hebrew chronicles, known as Torah or the Old Testament of the Christian Bible, the 370 days are coded in the sequence: 600.1.1; 600.2.10; 600.2.17; 600.3.27; 600.7.17; 600.10.1; 600.11.11; 600.11.18; 600.11.25; 601.1.1 and 601.2.27 in Gen.7.11-8.14 for a total of 39+7+40+110+74+40+7+7+36+56 = 46+370 = 416 days to describe the 'Flood of Noah' from his 600th birthday to the Rainbow covenant after the flood with Noah's overall lifespan coded in Gen.9.29 as 950 years.

Noah sired his son Shem in his 500th year and Shem sired Noah's grandson Arphaxad in Noah's 600th year as encoded in Gen.11.10. This code however encodes the birth of Arphaxad as 'two years after the flood' and so the two years of 'the flood' must be excised from the lifespan of Noah in conjunction with the year of the flood becoming an insertion of the timeline of Noah from his 600th birthday. Zep Tepi defines the birth of Noah as the year 14Sep2953BC=1Tishri809 and the birth of Shem as the year 06Sep2453BC=1Tishri1309 and the birth of Arphaxad as 11Sep2353BC=1Tishri1409.

Generation	Patriarch	Age in Years in BC chronology	Age in Temple Years	Cursed Cainan Generation	Code(Masoretic) KJV

CHAPTER TWENTY-TWO AN ENTIRE UNIVERSE SHIFTS - A 'soul' describes the transformation of the consciousness and energy of planet Earth from 2012 to 2020 to 2025 onwards

(C=Celeste a woman incarnated in human form on Earth and D=Dolores a psychoanalyst and explorer of the subconscious state of self-awareness)

C: Yes, it is a stupid thing to come here. (Laugh) Because when you are there you think Wow, but when you come here it is so tough. And sometimes I feel alone and sometimes I feel I cannot do this. But sometimes I know I will do it.

.....

D: So, in the other existence you didn't have these emotions?

C: No, no, you don't have emotions. It is not this kind of emotions. Everything is so clean and quiet, and you know everything. And the worst part is this drama thing. These feelings, people cry and this mess for misunderstanding and you cannot communicate with people with your mind. You can try, but they do not listen.

D: And the fear is different too, isn't it?

C: Yes, the fear is the worst part. I don't like this fear. This fear makes some things in your body. Your body is so sensitive to this fear and suddenly when you start having this fear, it is a mess, and you cannot get out of this fear. And then you try to remember who you are, but sometimes it is not so easy to remember. And sometimes you think your mind is thinking all these things and...Wow...what are you talking about. The only thing that exists is routine and this life and these other things. That is the only way to do this is in this body. If you do not have that you will not stay here. You will go "home" because home is where you belong.

D: With those memories you couldn't exist here. (Yes) Is that why you have to forget when you come in?

C: Yes. That is why you have to forget. Otherwise, you cannot stay attached to this body. When you have feelings for one thing, you are attached to this body. Yes, when you try to go back home again, then you get this fear and then you forget everything and then you are here again. But you know you are not complete here. You are not complete incarnate here.

.....

D: Have you ever been in a physical body before?

C: I have to say it is not, but I don't know if it is my mind or....

D: But your part of the galaxy and you created the galaxy, do you think this is the first time you have ever moved into something like this?

C: No, I guess this is not my first time. I guess I am coming when these kinds of changes are taking place. I have to figure this out. I feel like I am a mother of the galaxy. (Laugh)

So, I have to be here to take care of my little kids. (Laugh) And then I choose to be in this little planet. It is a little planet, but it has a lot of energy. Wow, I have to think of everything.

Sometimes we can and sometimes we cannot. It is not our fault because we are what we are. Sometimes some things happen that we cannot control and the only thing we can do is just to take her off of this little kid which is our galaxy.

D: But when you come you forget all these things, and all you know is just this life.

C: There's no way to be here if you know who you are. There is no way to use this power you have because sometimes you need or you want to use this power, but you realize you can't because this body is not enough. But this big energy you're sending is not your whole energy. It is only some part of your energy just to stay here.

D: But isn't it possible for the physical body to use some of the energy?

C: Yes, the physical part of the body is using some part of the energy, but not the whole energy. Because if the body is using the whole energy...it will explode. It is not a container for this big energy that you are. It is too much energy for this little, teeny body. Because the galaxy is smaller than the energy you are. This planet Earth is smaller than the energy you are. This body is smaller than the energy you are. So, you are moving from the small things to the big things, and you are moving to the big things or from the big things to the smaller things. Everything is moving...like in cycles.

D: But is it possible for this body you are speaking through to use a portion of the energy?

C: Yes, she needs to use this body. It is using this energy, but the body doesn't know how to use it.

D: She said she feels energy going through her body, but she doesn't know what to do with it.

C: Yes, she doesn't know what to do. The body doesn't know. She knows what to do, but when she tries to use this, this other fear starts and then she realizes, "Okay, what am I doing? I am this body. I am like this ego thing." She is afraid to use this big power she has. She is trying to do it to help people, but it is not working because she's afraid. Everything starts to work, then she's afraid of being discovered. She's afraid of being discovered about who she is. She is doing this work undercover. (Laugh) So nobody knows that we are working undercover.

D: Are you afraid of something happening if somebody knew how powerful you really are?

C: Yes. It doesn't work if anyone discovered we are controlling things.

D: They think they might?

C: Let me clarify this. We...us...the Universe, the Unity, are working, too. We are here undercover. We are controlling things so if anybody found out we are controlling things, even though we are trying to help...they are not going to do things by themselves and they are going to ask for help.

You know people here are so...you know they need help. Always they need help, and they are allowing another one to do things by themselves so we cannot allow that. They have free will, so they have to do things by themselves and that is one of the reasons they took energy from this body like this woman. It is easy to take energy from her.

D: You mean other people?

C: Yes. And they are always taking energy from her and that is not the way to do it because she didn't come to do that.

I had spoken to Celeste during the interview about how to put up shields around her to keep people from drawing on her energy.

C: She doesn't know how to do it. She was trying to use this shield like white light, but then this other part of her is saying, "What are you doing? This is stupid to do." She separates. One part of her knows who she is and what she is doing here, and the other part is trying to say, "Get real. You are a human being living in this planet Earth and don't be silly to think you are bigger than that." It is like a fight. She's having this fight inside.

D: Does she have any karma to repay?

C: No, she does not. She has been here when this galaxy has been having this big movement, but she came only to help, and she doesn't have karma. She tried to help people who have karma, and sometimes it feels like she feels karma, but she doesn't because she can't.

She's one of the healers of this galaxy, so she's trying to help and sometimes she needs to feel how it feels to be human in this part of the galaxy because that is how the galaxy feels. Like if you are being in the body and it has the pain, and you must feel that pain just to feel what the body feels. Do you know what I mean? Your body must feel this drama.

This is the only way to help people by understanding the way they feel. Then you can understand.

Then you can help, but you know sometimes people don't want to be helped. They are happy with this drama because they don't want to be more than that or they will remember where they belong. You cannot help if they do not want help.

D: But she doesn't know that she's bigger. She feels she's like the rest of the people on Earth.

C: Yes, she is, and that's the problem with being with this energy she is – me – and she's fighting with this energy or with this body. It is her body. Sometimes she feels she's this body and she's bigger than that, but sometimes she cannot remember and she's in the middle of this little drama. I have not found a way to tell her to "remember who you are!"

D: I think you're finding a way right now to tell her.

C: Yes, I guess we are having this conversation.

D: But most of the people when they come to Earth many, many times or on this cycle, they pick their parents. They pick where they're going to be born, but she was not part of that cycle?

C: No, she was not. She was here to help this guy and this woman (her parents) because they are so full of power. They do not realize they are. So, when she came here, she gave this couple a little energy to do what they needed to do, and they do not understand. And these two gave her a lot of experiences to feel what it is to be human, just to understand what it is to feel pain and have human experiences. It was important to me to have these experiences because now I can help them when I just found the way they feel, so empty. I can feel this emptiness.

I never understood this emptiness until I came here just to have these human experiences, and then that was the contract that was with those people...I mean this couple. When I give you this energy, then you can move on or you can just not move on and you will give me this experience.

Then I will understand how people feel. And now when I see the people, I know how they feel. I can feel how they feel! I can feel their vibration. I can feel how they feel and if I sense energy, I can remove their pain.

.....

[https://www.academia.edu/102898395/The Nature of the Twinsoul in Unified Wave Particle Duality](https://www.academia.edu/102898395/The_Nature_of_the_Twinsoul_in_Unified_Wave_Particle_Duality)

The question of life and death and the continuity of consciousness as applied to the individual soul is addressed in this book.

Who are the extra-terrestrials, the ETs?

Are they awaiting the graduation of their descendants as the ancestors and bodyforms of the mind evolved ETs?

Will the contact scenario become a return of the ancestors of the descendants? Will the invasion from Outer Space manifest as a return to the previously experienced Inner Space? Can the twinsoul acolyte fathom where it came from, where it is and where it is going?

All souls in heaven have access to the story of creation and so become superconscious in the blending of the subconscious state of mind associated with the dream state and the temporary switching of the body awareness of the waking consciousness of the body with the subconscious self-awareness of the soul.

Before space and time had existed in a sense of dimension for measurement and geometry; time and space had existed in a space less and timeless mode of nowhere in notime, but defined on principles and sequences of numbers and algorithmic logical mathematical statements. The notion of time was not based on the duration between events, but on the principle of order. Something could not happen as event B before event A had occurred and so it did not matter what time separated event A and event B.

Time did not exist as a requirement for space to divide events and no space was required for order to separate. The notion of geometry of shapes and extended objects required space to manifest in a dimensional manner however and so the creation of spacetime to couple the nowhere in notime became a necessary event to mirror the abstraction of the timespace in the physical reality of the spacetime.

Then the notime of nowhere would realize itself as a null-time within a dimensionless point-circle from which a multidimensional spacetime could emerge from a quantum geometry. Following the birth of space and time the point-circle would dimensionally grow in size to define an expanding multidimensional universe which could be described and defined by laws of nature based upon the timespace organization and mathematical principles and parameters of measurement.

In the beginning, before the creation event; the timespace had been defined as logistical principality of two things of the within and the without. The two things could however be coupled in two opposite ways, which formed a mirror symmetry of the darkness of the within separated from the lightness without or the other way around where the darkness without was hiding the lightness within.

Then the light without became labelled as God the Father and the darkness within became the hidden and missing Goddess the Mother.

To create the Mother Goddess, God the Father had to abandon his absolute lightness to release the absolute darkness of his hidden omni-twin-soul, his other self as her, the Mother Goddess.

This abandonment of God the Father so had created a dark heaven without and within the heaven of lightness and this had broken the previous supersymmetry between the within separated from the without.

The creation event in constructing the firmament had become a necessity to preserve and rebuild this supersymmetry.

The Secret of the Dragon Daath

Light Serpent

The Third Serpent (from 'Above') meets the Twin-Serpent (from 'Below') in the 'Secret and Forbidden Initiation Path of the Daath of the Dragon'.

The Right Hand Path of the 'good' maleness of primordial Adam as true image of the Creator and the Left Hand Path of the 'evil' femaleness of primordial Eve as false image (Adam's rib) exchange relative position if seen from the perspective of 'Cosmic Man' Purusha aka Adam Kadmon aka Vitruvius.

Dark Serpent

Golden Serpent

Left Hand Path relative to Cosmic HeShe

Right Hand Path relative to Cosmic SheHe

Right Hand Path

Left Hand Path

relative to the Creator-Creation

(62) Jesus said, "It is to those who are worthy of my mysteries that I tell my mysteries. Do not let your left (hand) know what your right (hand) is doing." {GOT-Lambdin}

Job 23:9

On the left hand, where he doth work, but I cannot behold him: he hideth himself on the right hand, that I cannot see him:

Proverbs 3:16 & 4:27

Length of days is in her right hand; and in her left hand riches and honour.
Turn not to the right hand nor to the left: remove thy foot from evil.

Ecclesiastes 10:2

A wise man's heart is at his right hand; but a fool's heart at his left.

Song of Solomon 2:6 & 8:3

His left hand is under my head, and his right hand doth embrace me. His left hand should be under my head, and his right hand should embrace me.

Isaiah 9:20 - KJV

And he shall snatch on the right hand, and be hungry; and he shall eat on the left hand, and they shall not be satisfied: they shall eat every man the flesh of his own arm:
